COLLEGE OF SCIENCE AND ENGINEERING

OPERATING PROCEDURES AND EVALUATION PLAN

Updated and approved for use by the College of Science and Engineering
Policy, Planning and Budget Council

May 25, 2023
(Department addenda are approved independently)

COLLEGE OF SCIENCE AND ENGINEERING

OPERATING PROCEDURES AND EVALUATION PLAN

Table of Contents

I. INTRODUCTION

The College Operating Procedures and Evaluation Plan (COPEP) supports individual faculty members and the goals of the departments, the College of Science and Engineering (CSE), and Western Washington University. The purpose of this document is to communicate essential elements of the policies and procedures of all College formal evaluation practices as they are conducted within the policies and procedures of the University. The current faculty Collective Bargaining Agreement (CBA) takes precedence over the COPEP when there is a conflict between the two.

Each department and program shall have well-defined goals and identified priorities to use as a basis for establishing the expectations for individual faculty members. These goals and priorities are expected to align with the mission and the strategic goals of the College. Departments and programs may include criteria, procedures, and specification of the types of materials faculty members should assemble for evaluation within each domain that go beyond the general University and College recommendations. The department-specific and program-specific recommendations, the Department/Program Addenda to the COPEP, must be approved by the Policy, Planning and Budget Council, the Dean, and the Provost prior to their application and inclusion in this document.

II. ORGANIZATION

A. POLICY, PLANNING, AND BUDGET COUNCIL

Charge

PPBC represents the members of the faculty of the College of Science and Engineering. PPBC is responsible for policy and procedures regarding academic quality in the College and advises the Dean on budget and planning.

This charge requires that the PPBC be consulted during the process of decisions and be kept informed about issues affecting academic quality. PPBC receives support as available from the Dean's office for the administration of these duties.

Responsibilities

a.   Reviews and maintains the document setting policies and procedures for the College (the COPEP) and ensures that it is consistent with the faculty CBA.

b.   Approves and upholds the departmental addenda to the COPEP with standards for Annual Review, Tenure and Promotion, and Post-Tenure Review.

c.   CSE Policy, Planning, and Budget Council will review departmental operating procedures and policies for compliance with WWU's CBA, Faculty Handbook and CSE's COPEP.

d.   Works with the Dean to develop and revise a strategic plan consistent with the University's strategic plan and College initiatives.

e.   Advises the Dean on budgetary matters, including allocation of faculty hires.

f.   Appoints College faculty representatives to University committees.

g.   Oversees activity of the other College governance committees: Curriculum; Personnel; Technical Operations[1]; Diversity, Equity and Inclusion.

h.   Communicates issues important for academic quality to the faculty of the College and the University Faculty Senate.

Membership

a.   The faculty of each department and program (see below) in the College selects one member for the council. The member shall be a tenure-track or tenured faculty member and shall not be the departmental chair or program director.

A center or group qualifies as a "program" for the purpose of membership when it meets the following criteria: (1) It includes faculty members from different departments with at least 75% of them housed in departments of the College and (2) it has its own criteria or processes for developing curriculum, for review of faculty performance, and/or for hiring tenure-track or non-tenure-track faculty. The current programs in the College are the Science, Math, and Technology Education group (SMATE) and the Advanced Materials Science and Engineering Center (AMSEC).

b.   The term of service is two years, with approximately half of the membership selected each year. No member shall serve more than six consecutive years.

c.   The Dean and any members of the Dean's office designated by the Dean may be invited to council meetings, but are not voting members of the council.

d.   The Associated Students senators representing CSE are invited to serve as ex-officio non-voting members of the committee.

d.   A majority of voting members shall constitute a quorum for all business of the council. The council determines its own procedures and officers, typically designating a chair and a secretary at the start of the academic year.

B. CURRICULUM AND ASSESSMENT COMMITTEE

Charge

The Curriculum and Assessment Committee is the curricular governing body of the College of Science and Engineering. The committee reports to PPBC and advises the Dean.

Responsibilities

a.   Approves all academic courses, programs, and majors within the College

b.   Makes recommendations to the Dean on curricular matters, including enhancing quality of programs, student outcomes, and efficiency.

c.   Reviews and coordinates assessment procedures of the College, departments, AMSEC and SMATE.

d.   Collects assessment data from the College units and includes a summary of the data in the annual activity report.

e.   Reports on annual activities to PPBC before the end of spring quarter each year.

Membership

a.   The faculty of each department and program (see below) in the College selects one member for the committee. The member shall be a tenure-track or tenured faculty member and shall not be the departmental chair or program director.

A center or group qualifies as a "program" for the purpose of membership when it meets the following criteria: (1) It includes faculty members from different departments with at least 75% of them housed in departments of the College and (2) it has its own criteria or processes for developing curriculum, for review of faculty performance, and/or for hiring tenure-track or non-tenure-track faculty. The current programs in the College are the Science, Math, and Technology Education group (SMATE) and the Advanced Materials Science and Engineering Center (AMSEC).

b.   The term of service is two years, with approximately half of the membership selected each year. No member shall serve more than six consecutive years.

c.   A majority of voting members shall constitute a quorum for all business of the committee. The committee determines its own procedures and officers, typically designating a chair at the start of the academic year.

d.   As delegated by the Dean, the Associate Dean is an ex-officio non-voting member of the committee and is eligible to serve as chair.

C. PERSONNEL COMMITTEE

Charge

The Personnel Committee considers applications forwarded to it by the Dean and makes recommendations to the Dean regarding the four following personnel matters in the College of Science and Engineering:

- Professional Leave
- Tenure and Promotion

- Post Tenure Review
- Special Merit, Equity/Compression, and Other Salary Adjustments

Responsibilities

a.   Recommends changes in policy or procedures to the Policy, Planning, and Budget Council.

b.   Verifies that standards set in the COPEP, departmental addenda to the COPEP, and the CBA are applied fairly and that appropriate procedures are followed.

c.   Requests, through the office of the Dean, additional information and/or consultation to make its recommendations.

d.   Reports on annual activities to PPBC before the end of spring quarter each year.

Membership

a.   The faculty of each department and program (see below) in the College selects one member for the committee. The member shall be a tenured faculty member and shall not be the departmental chair or program director.

A center or group qualifies as a "program" for the purpose of membership when it meets the following criteria: (1) It includes faculty members from different departments with at least 75% of them housed in departments of the College and (2) it has its own criteria or processes for developing curriculum, for review of faculty performance, and/or for hiring tenure-track or non-tenure-track faculty. The current programs in the College are the Science, Math, and Technology Education group (SMATE) and the Advanced Materials Science and Engineering Center (AMSEC).

b.   The term of service is two years, with approximately half of the membership selected each year. No member shall serve more than six consecutive years.

c.   A majority of voting members shall constitute a quorum for all business of the committee. The committee determines its own procedures and officers, typically designating a chair and at the start of the academic year.

D. TECHNICAL OPERATIONS COMMITTEE

Function

The committee advises the Dean on planning issues related to the technical facilities and resources of the College of Science and Engineering. Such matters include scientific instrumentation, equipment, computers, laboratories supported by University level student fees, and physical facilities.

Responsibilities

a.   Reports on annual activities to PPBC before the end of spring quarter each year.

b.   Reviews and ranks annual Student Technology Fee proposals.

c.   Reviews minor capital improvement proposals.

d.   Plans and oversees regular upgrades of faculty and staff office computers.

e.   Develops process for allocating one-time resources to existing needs.

f.   Appoints two College representatives to the Academic Technology Committee (ATC).

g.   Maintains relationships with other campus entities including: Scientific and Technical Services, the College of Humanities and Social Sciences, Huxley College, the Shannon Point Marine Center, and Academic Technology User Services (ATUS).

Membership

a.   The faculty of each department and program (see below) in the College selects one member for the committee. The member shall be a tenure-track or tenured faculty member and shall not be the departmental chair or program director.

A center or group qualifies as a "program" for the purpose of membership when it meets the following criteria: (1) It includes faculty members from different departments with at least 75% of them housed in departments of the College and (2) it has its own criteria or processes for developing curriculum, for review of faculty performance, and/or for hiring tenure-track or non-tenure-track faculty. The current programs in the College are the Science, Math, and Technology Education group (SMATE) and the Advanced Materials Science and Engineering Center (AMSEC).

b.   The term of service is two years, with approximately half of the membership selected each year. No member shall serve more than six consecutive years.

c.   A majority of voting members shall constitute a quorum for all business of the committee. The committee determines its own procedures and officers, typically designating a chair and at the start of the academic year.

E. EQUITY, INCLUSION AND DIVERSITY COMMITTEE

Charge

The Equity, Inclusion and Diversity (EID) Committee works to promote, and advocates for, equity, inclusion, and diversity in the College of Science and Engineering. The committee reports to PPBC and advises the Dean.

Responsibilities

    a. Identifies and examines policies and procedures within CSE that inhibit diversity, equity, and inclusion related to all members of the University community.
    b. Coordinates and collaborates with relevant groups both within and outside of CSE on developing issues related to diversity, equity, and inclusion. The goal is to communicate and engage with other equity stake holders on campus.
    c. Supports, encourages, and informs department-level efforts related to diversity, equity, and inclusion. Support can be in the form of documentation or sharing of resources created by the DEI committee.
    d. Assessment and evaluation of the CSE strategic goals related to diversity, equity, and inclusion.

Membership

    a. The faculty of each department and program selects one faculty member, tenured or tenure track, for the committee. In addition, up to four at-large faculty/staff members will be recommended by the EID Chair for approval by PPBC. These at-large positions may be filled by staff or tenured, tenure-track, or NTT faculty.
    b. The EID committee will include four student representatives, typically the two CSE representatives to the Student Senate, and two at-large positions. Representatives shall be currently enrolled at WWU, and current, former, or intended majors or graduate students in a CSE program.
    c. The term of service for faculty/staff committee members is two years, with approximately half of the membership selected each year. The term of service for student members is one year. No member shall serve more than six consecutive years.
    d. In spring quarter, the EID committee will determine the number of open at-large positions for the following academic year, solicit applications for those positions and make recommendations to PPBC and the Associated Student Senate so that at-large members can be approved and appointed before the beginning of the next academic year. Applications for new committee members, and the final composition of the committee, shall be solicited and announced broadly, using college-wide communications. EID members shall not be departmental chairs or program directors.
    e. Diverse representation, broadly defined, will be prioritized in the selection of at-large members. Compensation for NTT and student appointments are subject to approval by the CSE Dean.

f. A majority of voting members shall constitute a quorum for all business of the committee. The committee determines its own procedures and officers, typically designating a chair at the start of the academic year.

F. DEAN'S ADVISORY COUNCIL

Membership and Function

The Dean's Advisory Council (DAC) consists of all department chairs and program directors in the College of Science and Engineering. DAC is responsible for implementing College policy, and may advise the Dean with respect to all matters of common interest to the College.

III. REVIEW OF FACULTY: PROCEDURES

Effect of COVID-19. In light of the disruptions, both professional and personal, brought on by COVID-19, it is recognized that faculty members' teaching, scholarly, and service activities are, or were, negatively affected due to the public health crisis. The disruptions are wide ranging and will have long-lasting ramifications, affecting faculty in different ways. For future review actions, faculty may include in their personal statements in their dossier how their teaching, scholarly, and service activities are, or were, adapted due to these disruptions. Departments, programs, the CSE Personnel Committee, and the CSE Dean will take all of these factors into consideration when reviewing teaching, scholarly, and service activities that were affected/adapted.

Evaluation under current or previous Departmental Standards. As described in Section 7.5.8 in the CBA between WWU and UFWW, valid for 9/16/21 -9/15/23 (published 11/01/21), probationary faculty may opt to be reviewed during any review according to standards either (i) outlined in the COPEP and addenda in place at the time of hire or (ii) the set of documents in place at the time the dossier is submitted. Similarly, tenured faculty may opt to be reviewed during any review according to standards either (i) outlined in the COPEP and addenda in place at the time of their most recent review (dated as the day that their previous dossier was due) or (ii) the set of documents in place at the time the dossier is submitted. As outlined in the Guidelines for Dossier Preparation sections of this COPEP, dossiers should include a copy of the COPEP and addenda that the probationary or tenured faculty have selected for their evaluation. In conducting their review, the reviewer should focus solely on the candidate's selected COPEP and addenda.

A. REVIEW OF NON-TENURE-TRACK FACULTY

Preface

The teaching effectiveness of Non-Tenure-Track faculty is essential for the academic mission of departments, the College, and the University. Non-tenure track faculty shall be evaluated by their departmental chair in a manner established by the departmental addendum and on the basis of expectations and duties defined in the Letter of Offer. The timing and frequency of reviews shall be in accordance with the CBA. The CBA takes precedence over the COPEP when there is a conflict between the two.

Responsibilities

The Faculty Member:

1.   Is evaluated annually, or once during the period of appointment if Senior Instructor.

2.   Provides access to materials required for review as specified in the department COPEP addendum, program COPEP addendum (if relevant), and the letter of offer.

3.   Receives a copy of the chair's summary letter and has the opportunity to respond before it is submitted to the Dean.

The Department Chair:

1.   Reviews the faculty member in a manner established by the department COPEP addendum, program COPEP addendum (if relevant), and the letter of offer.

2.   Prepares a written review.

3.   Shares the review with the faculty member and allows them five days to correct errors of fact.

4.   Forwards the review to the Dean.

B. ANNUAL EVALUATION OF PROBATIONARY FACULTY

Preface

The probationary period is a time when the department chair and faculty focus on providing regular feedback to the probationary faculty member regarding his/her progress toward tenure and promotion through the probationary faculty evaluation process. Reasonable support and encouragement will be provided to ensure that areas needing further attention to meet departmental, program (if relevant), College, and University requirements for tenure and promotion are identified and addressed.

All probationary tenure-track faculty will be reviewed annually. The chair's annual letter of evaluation will summarize the faculty and department chair's assessment of the probationary faculty member's progress toward meeting expectations and contributions to the department. The timing of the review shall be in accordance with the CBA. The CBA takes precedence over the COPEP when there is a conflict between the two. The candidate will be reviewed under the COPEP and COPEP addendum that has been identified by the candidate according to their allowed options as defined in section 7.5.8 of the CBA. The candidate must include their selected COPEP and COPEP addendum/addenda in their dossier.

Evaluations of probationary faculty indicate success, or failure, in progress on a trajectory leading to meeting requirements for tenure. They do not, directly, indicate whether or not a candidate has already met such requirements. Furthermore, an evaluation on any given year should focus on the year of review, in the context of the candidate's overall progress. Significant changes in numerical ratings should be addressed in written comments.

Responsibilities

The Candidate:

1. Reviews the CBA, COPEP, departmental COPEP addendum, and program COPEP addendum (if relevant).

2. Prepares a collection of files for review in the dossier (not required in the first year of appointment) by the end of January; see Guidelines for dossier preparation below.

3. Meets with the department chair to discuss standards, goals, and the letter summarizing the review. If necessary, the candidate has five working days to respond to errors of fact in a letter addressed to the Dean and submitted to the chair. This letter will be included with the material forwarded to the Dean.

The Tenured Department Faculty:

1. Required to participate in the review process and complete the review form, including an individual written assessment, by a date set by the department that is no later than February 15. Completed review forms must address the candidate's progress towards tenure and clearly document any deficiencies. Ratings given on the form must be consistent with the rating scale and the written assessments.

The Department Chair:

1. Advises the candidate and faculty of the review and upcoming deadlines by December 15.

2. Writes a letter summarizing the review, including assessment of the dossier and summary of department faculty evaluation and recommendations for or against renewal for candidates beyond the first year of appointment. The chair's letter to the Dean shall include a complete and substantial assessment of the candidate's dossier and recommend for or against renewal, as well as evaluate the candidate's progress towards tenure. The chair's letter should not directly state the candidate's preparedness for promotion in the upcoming year. If disparities exist among the individual written faculty

evaluations, the chair must include an assessment that reflects on the basis of these disparities.

In instances when serious deficiencies arise that could lead to future non-reappointment, the review letter must explain the following: the specific deficiencies, planned measurements that will determine whether the deficiencies have been remedied, and the time frame allowed for correction.

3.   Meets with the tenured faculty of the department, or a subset of tenured faculty as specified in the department addendum, to review a draft of the letter. This meeting will be purely informational and no vote will be taken. The chair may revise the letter based on feedback from the tenured faculty.

4.   Meets with the candidate to discuss standards, goals, and a timeline for applying for tenure.

5.   Shares the letter with the candidate and allows them five working days to correct errors of fact.

6.   Forwards the chair's letter and the candidate's response letter (if submitted) to the Dean.

The Dean:

1.   Notifies each department chair of the probationary faculty in the department to be reviewed.

2.   Annually sets dates for the submission of the evaluation letters by the department chairs.

3.   Receives and reviews the department chair's letter of evaluation to verify compliance with department and college standards.

4.   Provides a copy of the final letter to the candidate and the Provost by March 15.

5.   Works with the department chair to provide support to the candidate toward achieving tenure and promotion.

Guidelines for Dossier Preparation for Annual Review of Probationary Faculty

The electronic dossier (referred to as the dossier in this document) conveys to colleagues and evaluators one's involvement and accomplishments in the varied functions of the University and the profession. It is critical that the dossier be accurate, complete, well organized, and professionally presented.

The dossier should include information regarding all activities and accomplishments pertinent to performance since the last review, with sufficient detail to enable the reviewers to conduct a complete assessment of the faculty member's performance in the areas of teaching, scholarship, and service.

It is recognized that some valued professional activities will not fit neatly into one of the three categories and that others may involve more than one of the categories. It is expected that the candidate's contributions to the college's goals regarding diversity, equity, and inclusion will be described in at least one of the personal reflections within the three categories.

The dossier materials are organized into the six primary folders described below and consist of a collection of files for review. The folders should be partitioned into sections with labeled subfolders in a way that facilitates review of all enclosed material, with a limited number of subfolders. The faculty member's name and department should be clearly indicated. The sections and subsections of the dossier must be organized in the following manner:

1. Curriculum Vitae
2. Departmental Standards
   - COPEP and addendum/addenda selected by the candidate for their evaluation
3. Previous letters of evaluation from the chair
4. Teaching
   - personal reflection
   - peer observations
   - student evaluations
   - course materials
   - other materials related to teaching
5. Scholarship and/or creative activity
   - personal reflection
   - copies of published papers
   - grant proposals (funded and unfunded, including reviews)
   - other scholarly contributions such as conference proceedings, posters, abstracts, reports, etc.
6. Service
   - personal reflection
   - other materials related to service

Details of Sections:
1.   The *Curriculum Vitae* should allow readers to become familiar with the candidate's background and the activities and accomplishments in teaching, scholarship and service, and make clear the period of time for which the candidate is evaluated. The CV should include the following information:

a) Background. Documents the education, employment and honors or awards of the candidate.

b) Teaching. Documents all relevant teaching activities conducted by the candidate as defined by the department's COPEP addendum. For instance, it could include classes taught, students advised and curriculum developed. The candidate should clearly identify the teaching activities conducted during the review period.

c) Scholarship. Documents all relevant scholarly work conducted by the candidate, including scholarly publications, grants, scientific presentations, technical reports, and other documents. The candidate should clearly identify the scholarship activities conducted during the review period.

The publications listed for the review period should identify the following:
- Peer-reviewed and non-peer-reviewed publications.
- Unambiguous publication status (accepted, in review, etc.).
- Relative contribution from the candidate to each collaborative publication (in parentheses after the publication citation).
- Graduate and undergraduate co-authors and contributors.

d) Service. Documents all relevant service activities conducted by the candidate for the institution, the profession, and the community as defined by the department's COPEP addendum. For instance, the institutional component could include departmental, colleges, and university committees in which the candidate served and efforts taken to advance the department, college, and university's diversity, equity, and inclusion goals; the professional component could include task forces or panel reviews in which the candidate served or reviews of grant proposals and of manuscripts for peer-reviewed journals as well as other committee or editorial work for professional organizations; the community component could include outreach activities in which the candidate engaged. The candidate should clearly identify all the service activities conducted during the review period.

2. The *Departmental Standards* section should include a copy of the section of the department's current COPEP addendum relevant to tenure review and/or promotion review. If the candidate is also a member of a College program, such as SMATE and AMSEC, a copy of the section of the program's current COPEP addendum should be included as well.

3. Previous letters of evaluation from the chair should be included in a single folder.

4. Teaching. The teaching folder should include all relevant materials documenting the teaching activities conducted by the candidate as defined by the department's COPEP addendum. These must include:

a) A teaching reflection supporting the assertion that they are an effective teacher, assessing their growth gained as teacher, including strengths and areas for improvement, responses to previous concerns, and describing future teaching goals. Evidence of teaching effectiveness may include students' gains, teaching methods employed, use of teaching practices and other contributions to increase equity and inclusion, and teaching innovations and curriculum developed pertinent to the review period. Self-reflections from previous dossiers should not be included.

b) The departmental teaching feedback forms completed by faculty observers during the review period and provided to the candidate after being observed.

c) All student evaluations, including comments, for all classes taught during the review period.

d) Course materials that demonstrate teaching effectiveness. Examples include pre- and post-course test scores and other assessment of student learning, syllabi, course materials, curriculum development and innovation, and samples of student work.

5. Scholarship and/or creative activity. The scholarship folder should document all relevant scholarly work conducted by the candidate. This must include a scholarship reflection and other materials supporting the candidate's scholarship activity.

a) A scholarship reflection must be included. This reflection should support the assertion that they engaged in productive scholarship or creative activity, assess the achievements and impacts of their scholarship or creative activity, and describe future research directions and goals. Examples in disciplinary research and/or in the area of diversity, equity, and inclusion within a specific professional field could include publications, grants, conference presentations, and technical reports. Reflections from previous evaluations should not be included.

b) Other materials that should be included are:
   a. copies of all scholarly publications since the original appointment as defined by the departmental COPEP addendum (do not include entire books or journals),
   b. copies of grant proposals and grant reviews (funded and unfunded)
   c. other scholarly contributions such as conference presentations, posters, abstracts, technical reports, etc. Evidence of these contributions such as

conference proceedings, tables of contents, email confirmation, etc. must be included.

6. Service. The service folder must include a service reflection. It can also include other materials that document the candidate's service contributions to the department, college, university, profession, and community.

   a) A service reflection supporting the assertion that they actively participated in service, assessing their specific contributions to the service activities listed in the curriculum vitae and pertinent to the review period, and describing future service goals. These contributions could include, but are not limited to, participation in workshops or other professional development activities, service to the department, college, university, and/or profession, engaging in outreach, including to underserved communities, and efforts to improve campus and department climate. Reflections from previous evaluations should not be included.

   b) Other materials related to service.

C. TENURE AND PROMOTION

Preface

The purpose of tenure is to free the faculty to teach, inquire, create, publish, and serve with intellectual integrity and a commitment to the advancement of knowledge. For this reason, the granting of tenure carefully limits the conditions under which a faculty member can be removed from his/her position. The granting of tenure must, therefore, be the result of a fair and full evaluation of the candidate's credentials according to the best judgment of the faculty and administration.

When a candidate applies for promotion, the total professional profile of the individual will be considered. In evaluating these accomplishments it is recognized that each case is unique and discretion must always be allowed. Decisions shall be based on reasoned judgment rather than set formulas.

The review process and receipt of the President's recommendation to the Board of Trustees is to be completed by March 15. The timing of the review shall be in accordance with the CBA. The CBA takes precedence over the COPEP when there is a conflict between the two. The candidate will be reviewed under the COPEP and COPEP addendum that is current at the time of the review. Significant recent changes to requirements as described by the COPEP should be addressed by the candidate, in the candidate's materials.

Responsibilities

The Candidate:

1.   Reviews the CBA, COPEP, department COPEP addendum, and program COPEP addendum (if relevant).

2.   Prepares a collection of files for review in the dossier; see Guidelines for Dossier Preparation below.

3.   Meets with the department chair to discuss the letter summarizing the review. If necessary, the candidate has five working days to respond to errors of fact in a letter addressed to the Dean and submitted to the chair. This letter will be included with the material forwarded to the Dean.

The Tenured Department Faculty:

1.   Participate in the review process, complete the review form, including an individual written assessment, and submit a vote for or against tenure. Ratings given on the form must be consistent with the rating scale and the written comments, and should be consistent with the annual reviews the tenured faculty member had submitted for the candidate.

The Department Chair:

1.   Begins the process of requesting external review letters during the previous spring quarter if external reviews are required, as specified by the department COPEP addendum.

2.   May hold a meeting of faculty eligible to participate in the review to discuss the candidate, provided such a meeting is described in the departmental evaluation plan. Discussion in such a meeting shall be limited to the materials in a candidate's dossier. Such a meeting shall be purely informational, with no vote taken at the meeting.

3.   Writes a letter summarizing the review and completes the "Chair's Summary of Departmental Evaluation of Candidate for Tenure and/or Promotion" form. The letter must include a summary of department faculty evaluations and any external evaluations, the departmental vote (based upon the review forms), an assessment of the candidate's file, and recommendation for or against tenure. The chair's evaluation must be comprehensive and detailed and should describe the candidate's performance in the context of the department and the discipline. The criteria for judgments of teaching, scholarship and service should be clear. Specific evidence—such as quotations, summaries of letters, numerical data, and information about scholarly venues—should be offered for all judgments (see Guidelines for Chair's Evaluation of Candidates for Tenure and Promotion in the Guidelines for Letters section of the COPEP). If disparities exist among the individual written faculty evaluations, the chair must include an assessment that reflects on the basis of these disparities.

4. Meets with the tenured faculty of the department, or a subset of tenured faculty as specified in the department addendum, to review a draft of the letter. The chair may revise the letter based on feedback from the tenured faculty.

5. Shares the letter with the candidate and allows them five working days to correct errors of fact.

6. Makes available the candidate's dossier, external review letters (if required by the department addendum), department faculty recommendations, chair's letter, and the candidate's response letter (if submitted) to the Dean.

The Dean:

1. Informs the department chairs and faculty of the deadline dates for the various steps of the tenure and promotion process.

2. Forwards to each member of the Personnel Committee a copy of the most recent version of the COPEP with department addenda.

3. Makes the candidate's dossier available, as well as physical evaluations by individual faculty members, the department chair's letter, and the candidate's response letter (if submitted) available to the Personnel Committee.

4. Upon receipt of the committee's recommendation, reviews the candidate's dossier and the recommendations in order to make a recommendation to the Provost.

5. Writes a letter summarizing the review.

6. Shares the letter and the Personnel Committee's recommendation with the candidate and the department chair, and allows the candidate five working days to correct errors of fact.

7. Makes available the candidate's entire dossier, as well as all recommendations, and the candidate's response letter (if submitted) to the Provost.

8. Appoints, in consultation with the department faculty, a tenured faculty member to evaluate/summarize the application when a department chair applies for promotion.

The Personnel Committee:

1. Receives all materials for its consideration through the office of the Dean and, through the office of the Dean, requests additional information and/or consultation with the department chair if desired. In order to confirm that the department's evaluation conforms to the

standards specified in the addendum, the committee will evaluate the dossier relative to the CBA, COPEP, and departmental addendum to the COPEP.

2.   Deliberates in closed session and makes its judgment as to each candidate's qualifications for tenure and/or promotion following the criteria for each rank outlined in the COPEP, and the departmental addendum to the COPEP. Following this judgment, the committee forwards its final written recommendations, with copies for the candidate and the departmental chair, the bases for those recommendations in each of the areas of teaching, scholarship and service, and the results of the committee's vote on the candidate to the Dean.   In keeping with the CBA (section 7.7.2.3), any Personnel Committee member who is also a member of the candidate's department, or holds a joint appointment in the candidate's department, is recused, and shall not participate in any way in the candidate's review.

3.   Reports any recommendations for changes in the procedures to the Policy, Planning, and Budget Council.

Guidelines for Dossier Preparation for Tenure and Promotion

The electronic dossier (referred to as the dossier in this document) conveys to colleagues and evaluators one's involvement and accomplishments in the varied functions of the University and the profession. It is critical that the dossier be accurate, complete, well organized, and professionally presented.

The dossier should include information regarding all activities and accomplishments pertinent to performance since the time of the original appointment as a probationary faculty member in the case of tenure review or since the last promotion in the case of promotion review, with sufficient detail to enable the reviewers to conduct a complete assessment of the faculty member's performance in the areas of teaching, scholarship, and service.

It is recognized that some valued professional activities will not fit neatly into one of the three categories and that others may involve more than one of the categories. It is expected that the candidate's contributions to the college's goals regarding diversity, equity, and inclusion will be described in at least one of the personal reflections within the three categories.

The dossier materials are organized into the six primary folders described below and consist of a collection of files for review. The folders should be partitioned into sections with labeled subfolders in a way that facilitates review of all enclosed material, with a minimum number of subfolders. The faculty member's name and department should be clearly indicated. The sections and subsections of the dossier must be organized in the following manner:

1. Curriculum Vitae.
2. Departmental Standards.
   - COPEP and addendum/addenda selected by the candidate for their evaluation
3. Teaching
   - personal reflection
   - peer observations
   - student evaluations
   - course materials
   - other materials related to teaching
4. Scholarship and/or creative activity
   - personal reflection
   - copies of published papers
   - grant proposals (funded and unfunded, including reviews)
   - other scholarly contributions such as conference proceedings, posters, abstracts, reports, etc.
5. Service
   - personal reflection
   - other materials related to service
6. Letters of support (optional)

Details of Sections:
1. The *Curriculum Vitae* should allow readers to become familiar with the candidate's background and the activities and accomplishments in teaching, scholarship and service, and make clear the period of time for which the candidate is evaluated. The CV should include the following information:

   a) Background. Documents the education, employment and honors or awards of the candidate.

   b) Teaching. Documents all relevant teaching activities conducted by the candidate as defined by the department's COPEP addendum. For instance, it could include classes taught, students advised and curriculum developed. The candidate should clearly identify the teaching activities conducted during the review period.

   c) Scholarship. Documents all relevant scholarly work conducted by the candidate, including scholarly publications, grants, scientific presentations, technical reports, and other documents. The candidate should clearly identify the scholarship activities conducted during the review period.

   The publications listed for the review period should identify the following:
     - Peer-reviewed and non-peer-reviewed publications.

- Unambiguous publication status (accepted, in review, etc.).
- Relative contribution from the candidate to each collaborative publication (in parentheses after the publication citation).
- Graduate and undergraduate co-authors and contributors.

d) Service. Documents all relevant service activities conducted by the candidate for the institution, the profession, and the community as defined by the department's current COPEP addendum. For instance, the institutional component could include departmental, colleges, and university committees in which the candidate served and efforts taken to advance the department, college, and university's diversity, equity, and inclusion goals; the professional component could include task forces or panel reviews in which the candidate served or reviews of grant proposals and of manuscripts for peer-reviewed journals as well as other committee or editorial work for professional organizations; the community component could include outreach activities in which the candidate engaged. The candidate should clearly identify all the service activities conducted during the review period.

2.   The *Departmental Standards* section should include a copy of the section of the department's current COPEP addendum relevant to tenure review and/or promotion review. If the candidate is also a member of a College program, such as SMATE and AMSEC, a copy of the section of the program's current COPEP addendum should be included as well.

3.   Teaching. The teaching folder should include all relevant materials documenting the teaching activities conducted by the candidate as defined by the department's COPEP addendum. These must include:

a) A teaching reflection supporting the assertion that they are an effective teacher, assessing their growth gained as teacher, including strengths and areas for improvement, responses to previous concerns, and describing future teaching goals. Evidence of teaching effectiveness may include students' gains, teaching methods employed, use of teaching practices and other contributions to increase equity and inclusion, and teaching innovations and curriculum developed pertinent to the review period. Self-reflections from previous dossiers should not be included.

b) The departmental teaching feedback forms completed by faculty observers during the review period and provided to the candidate after being observed.

c) All student evaluations, including comments, for all classes taught during the review period.

d) Course materials that demonstrate teaching effectiveness. Examples include pre- and post-course test scores and other assessment of student learning, syllabi, course materials, curriculum development and innovation, and samples of student work.

4. Scholarship and/or creative activity. The scholarship folder should document all relevant scholarly work conducted by the candidate. This must include a scholarship reflection and other materials supporting the candidate's scholarship activity.

   a) A scholarship reflection must be included. This reflection should support the assertion that they engaged in productive scholarship or creative activity, assess the achievements and impacts of their scholarship or creative activity, and describe future research directions and goals. Examples in disciplinary research and/or in the area of diversity, equity, and inclusion within a specific professional field could include publications, grants, conference presentations, and technical reports. Reflections from previous evaluations should not be included.

   b) Other materials that should be included are:
      a. copies of all scholarly publications since the original appointment as defined by the departmental COPEP addendum (do not include entire books or journals),
      b. copies of grant proposals and grant reviews (funded and unfunded)
      c. other scholarly contributions such as conference presentations, posters, abstracts, technical reports, etc. Evidence of these contributions such as conference proceedings, tables of contents, email confirmation, etc. must be included.

5. Service. The service folder must include a service reflection. It can also include other materials that document the candidate's service contributions to the department, college, university, profession, and community.

   a) A service reflection supporting the assertion that they actively participated in service, assessing their specific contributions to the service activities listed in the curriculum vitae and pertinent to the review period, and describing future service goals. These contributions could include, but are not limited to, participation in workshops or other professional development activities, service to the department, college, university, and/or profession, engaging in outreach, including to underserved communities, and efforts to improve campus and department climate. Reflections from previous evaluations should not be included.

   b) Other materials related to service.

6. The *Letters of Support* section is optional, but may be used to help describe the value and contribution of the candidate's activities in teaching, scholarship and/or service. These materials are recognized as useful, however letters in support of scholarship will not satisfy the requirement for external letters of review, if such a requirement exists in the department.

7. The requirement of the *External Letters* section is defined in the candidate's departmental addendum to the COPEP. If external letters are required, they will be made available to the department faculty for review and included in the dossier by the department's chair upon forwarding to the College.

D. ANNUAL TENURED FACULTY CONSULTATION

Tenured faculty of the College meet annually with their department chairs for informal consultation. The consultation is designed to facilitate more informed discussions between the chairs and the Dean regarding departmental matters, including ways to contribute to individual faculty growth.

E. POST-TENURE REVIEW

Preface

The Post-Tenure Review is based on performance since the last successful review in the areas of teaching effectiveness, scholarly activity, and service to the institution and profession. Faculty shall be evaluated based on departmental standards for their rank. These departmental standards shall provide for flexibility to allow for fluctuations in the relative emphasis on teaching, scholarship or creative activity, and service across the career life cycle of the individual faculty member. The CBA takes precedence over the COPEP when there is a conflict between the two. The candidate will be reviewed under the COPEP and COPEP addendum that is current at the time of the review. Significant recent changes to requirements as described by the COPEP should be addressed by the candidate, in the candidate's materials.

Responsibilities

The Candidate:

1. Reviews the CBA, COPEP, department COPEP addendum, and program COPEP addendum (if relevant).

2.   Prepares a collection of electronic files with materials since last review or promotion; see Guidelines for Dossier Preparation below.

3.   Meets with the department chair to discuss standards, goals, and the letter summarizing the review. If necessary, the candidate has five working days to respond to errors of fact in a letter addressed to the Dean and submitted to the chair. This letter will be included with the material forwarded to the Dean.

4.   Failure to submit a PTR file, or submitting it after departmental deadlines, constitutes failure of the post tenure review.

The Department Faculty:

1.   Tenured faculty members are required to participate in the review process and complete the review form by a date set by the department. The candidate should be evaluated as meeting department standards, exceeding department standards or not meeting department standards in areas of teaching, scholarship, and service based on departmental standards.

The Department Chair:

1.   Advises the candidate and faculty of the review and upcoming deadlines.

2.   Writes a letter summarizing the review, including assessment of the dossier and summary of department faculty evaluations. If disparities exist among the individual written evaluations, the chair must include an assessment that reflects on the basis of these disparities.

3.   Meets with the candidate to discuss standards, goals, and the letter summarizing the review.

4.   Shares the letter with the candidate and allows them five working days to correct errors of fact.

5.   Makes available the candidate's dossier, department faculty recommendations, chair's letter, and the candidate's response letter (if submitted) to the Dean.

The Dean:

1.   Makes available to the Personnel Committee the candidate's dossier, as well as evaluations by individual faculty members, the department chair's letter, and the candidate's response letter (if submitted).

2.   Reviews the candidate's dossier, upon receipt of the committee's recommendation, and makes a final evaluation. A copy of the evaluation will be sent to the candidate and the department chair.

3.   Makes available the evaluation to the Provost.

Personnel Committee:

1.   Reviews the candidate's dossier, evaluations by individual faculty members, and the chair's summary letter, and evaluates the candidate's performance, based on departmental standards, as meeting department standards, exceeding department standards, or not meeting department standards in areas of teaching, scholarship, and service, and forwards its recommendation to the Dean.

Guidelines for Dossier Preparation for Post-Tenure Review

The electronic dossier (referred to as the dossier in this document) conveys to colleagues and evaluators one's involvement and accomplishments in the varied functions of the University and the profession. It is critical that the dossier be accurate, complete, well organized, and professionally presented.

The dossier should include information regarding all activities and accomplishments pertinent to performance since the last successful review, with sufficient detail to enable the reviewers to conduct a complete assessment of the faculty member's performance in the areas of teaching, scholarship, and service.

It is recognized that some valued professional activities will not fit neatly into one of the three categories and that others may involve more than one of the categories. It is expected that the candidate's contributions to the college's goals regarding diversity, equity, and inclusion will be described in at least one of the personal reflections within the three categories.

The dossier materials are organized into the six primary folders described below and consist of a collection of files for review. The folders should be partitioned into sections with labeled subfolders in a way that facilitates review of all enclosed material, with a minimum number of subfolders. The faculty member's name and department should be clearly indicated. The sections and subsections of the dossier must be organized in the following manner:

1. Curriculum Vitae.
2. Departmental Standards.

- COPEP and addendum/addenda selected by the candidate for their evaluation
3. Teaching
   - personal reflection
   - peer observations
   - student evaluations
   - course materials
   - other materials related to teaching
4. Scholarship and/or creative activity
   - personal reflection
   - copies of published papers
   - grant proposals (funded and unfunded, including reviews)
   - other scholarly contributions such as conference proceedings, posters, abstracts, reports, etc.
5. Service
   - personal reflection
   - other materials related to service
6. Letters of support (optional)

Details of Sections:

1. The *Curriculum Vitae* should allow readers to become familiar with the candidate's background and the activities and accomplishments in teaching, scholarship and service, and make clear the period of time for which the candidate is evaluated. The CV should include the following information:

   a) Background. Documents the education, employment and honors or awards of the candidate.

   b) Teaching. Documents all relevant teaching activities conducted by the candidate as defined by the department's COPEP addendum. For instance, it could include classes taught, students advised and curriculum developed. The candidate should clearly identify the teaching activities conducted during the review period.

   c) Scholarship. Documents all relevant scholarly work conducted by the candidate, including scholarly publications, grants, scientific presentations, technical reports, and other documents. The candidate should clearly identify the scholarship activities conducted during the review period.

   The publications listed for the review period should identify the following:
   - Peer-reviewed and non-peer-reviewed publications.
   - Unambiguous publication status (accepted, in review, etc.).
   - Relative contribution from the candidate to each collaborative

publication (in parentheses after the publication citation).
- Graduate and undergraduate co-authors and contributors.

d) Service.   Documents all relevant service activities conducted by the candidate for the institution, the profession, and the community as defined by the department's COPEP addendum.   For instance, the institutional component could include departmental, colleges, and university committees in which the candidate served and efforts taken to advance the department, college, and university's diversity, equity, and inclusion goals; the professional component could include task forces or panel reviews in which the candidate served or reviews of grant proposals and of manuscripts for peer-reviewed journals as well as other committee or editorial work for professional organizations; the community component could include outreach activities in which the candidate engaged.   The candidate should clearly identify all the service activities conducted during the review period.

2. The *Departmental Standards* section should include a copy of the section of the department's current COPEP addendum relevant to post-tenure review. If the candidate is also a member of a College program, such as SMATE and AMSEC, a copy of the section of the program's current COPEP addendum should be included as well.

3. Teaching. The teaching folder should include all relevant materials documenting the teaching activities conducted by the candidate as defined by the department's COPEP addendum. These must include:

a) A teaching reflection supporting the assertion that they are an effective teacher, assessing their growth gained as teacher, including strengths and areas for improvement, responses to previous concerns, and describing future teaching goals. Evidence of teaching effectiveness may include students' gains, teaching methods employed, use of teaching practices and other contributions to increase equity and inclusion, and teaching innovations and curriculum developed pertinent to the review period. Self-reflections from previous dossiers should not be included.

b) The departmental teaching feedback forms completed by faculty observers during the review period and provided to the candidate after being observed.

c) All student evaluations, including comments, for all classes taught during the review period.

d) Course materials that demonstrate teaching effectiveness. Examples include pre- and post-course test scores and other assessment of student learning, syllabi, course materials, curriculum development and innovation, and samples of student work.

4. Scholarship and/or creative activity. The scholarship folder should document all relevant scholarly work conducted by the candidate. This must include a scholarship reflection and should include other materials supporting the candidate's scholarship activity.

   a) A scholarship reflection must be included. This reflection should support the assertion that they engaged in productive scholarship or creative activity, assess the achievements and impacts of their scholarship or creative activity, and describe future research directions and goals. Examples in disciplinary research and/or in the area of diversity, equity, and inclusion within a specific professional field could include publications, grants, conference presentations, and technical reports. Reflections from previous evaluations should not be included.

   b) Other materials that should be included are:
      a. copies of all scholarly publications since the original appointment as defined by the departmental COPEP addendum (do not include entire books or journals),
      b. copies of grant proposals and grant reviews (funded and unfunded)
      c. other scholarly contributions such as conference presentations, posters, abstracts, technical reports, etc. Evidence of these contributions such as conference proceedings, tables of contents, email confirmation, etc. must be included.

5. Service. The service folder must include a service reflection. It can also include other materials that document the candidate's service contributions to the department, college, university, profession, and community.

   a) A service reflection supporting the assertion that they actively participated in service, assessing their specific contributions to the service activities listed in the curriculum vitae and pertinent to the review period, and describing future service goals. These contributions could include, but are not limited to, participation in workshops or other professional development activities, service to the department, college, university, and/or profession, engaging in outreach, including to underserved communities, and efforts to improve campus and department climate. Reflections from previous evaluations should not be included.

   b) Other materials related to service.

6. The *Letters of Support* section is optional and allows colleagues and students to describe the value and contribution of the candidate's activities in teaching, scholarship and/or service.

IV. REVIEW OF FACULTY: GUIDELINES FOR LETTERS AND WRITTEN EVALUATIONS

A. GUIDELINES FOR INTERNAL FACULTY EVALUATIONS

It is the responsibility of each person conducting an evaluation for any of the purposes described in this document to seek and obtain sufficient evidence upon which to base a judgment, and to describe the bases for his/her judgment when requested to do so. Where sufficient evidence to make an informed judgment is not available, the evaluator should abstain from making a judgment and state reasons for doing so. Refer to appropriate section above.

Records of faculty evaluations are closed to the public, meaning that they remain available only to the committee and administrators making the decision until the review is complete. Candidates under review do not have access to the votes or written comments of individual reviewers until the review process is complete. After the completion of the review process, state law allows the candidate to request access to the written review materials submitted by internal faculty members.

B. GUIDELINES FOR EXTERNAL LETTERS

Rationale

External letters can be used to position a candidate's research and scholarship within the larger world of his/her discipline or sub-discipline.

External letters provide university-level tenure and promotion review teams — as well as department colleagues whose specialties reflect varying paradigms — with additional, independent assessment of candidates' career contributions. External letters broaden the positions that can be represented in schismatic disciplines. Their use can also enhance the ability of the Personnel Committee to ensure a uniform standard is being applied to candidates from all departments.

In some disciplines external letters are standard practice among major institutions. Having an option to use these letters may be attractive for some departments.

Recommendation

Individual departments should vote on whether or not to make procuring outside letters standard procedure within that department, recognizing that the process will be more useful in some disciplines than in others. In departments where outside letters are not made part of the standard tenure and promotion dossier, individual candidates may request that the chair obtain outside letters.

If external letters of review are used, departments should follow this procedure:

- *Outside Reviewers*. There should be a minimum of three letters of external review. The candidate will suggest a slate of reviewers, with an associated rationale and relationship to the candidate for each. The department chair will select three reviewers. Two are from the candidate's list, unless fewer than two are available. The department chair will then follow through on the external review process and is responsible for soliciting the outside letters in a timely fashion.

  Reviewers should be selected for their knowledge of the candidate's field and ability to offer an objective analysis of the candidate's position in it. The list of reviewers is not to include mentors or co-authors.

- *Standard Letters.* Each department should develop a standard letter to use in requesting outside reviews; these letters should address criteria for tenure and promotion at Western Washington University should include a copy of the departmental standards for tenure and promotion.

  The letter should include a request for the reviewer to provide an abbreviated curriculum vitae and a statement of his/her relationship to the candidate.

  The external review should assess the candidate's impact on the discipline as well as the likelihood of future significant contributions to the discipline. The chair will instruct the external reviewers *not* to provide an opinion about the likelihood of candidates with similar records being promoted at institutions similar to Western.

- *Confidentiality.* Every effort should be made to keep the outside letters confidential. In particular, they are not to be given to the candidate. The chair will provide the candidate with a written summary of the contents of the letters.

- *Materials to Submit*. The chair will transmit the letters to the Dean along with the following information:

  1. Department's policy on external review letters.
  2. Copy of the chair's letter requesting external review.
  3. Abbreviated curriculum vitae of each reviewer.
  4. Statement of each reviewer's relationship to the candidate.

- *Other Letters.* From time to time candidates for promotion will include reference letters from outside parties, such as publishers, coauthors, grant reviewers and the like, in their dossier. These materials are recognized as useful and are strongly encouraged. However, they will not satisfy the requirement for external letters of review, if such a requirement exists in the department.

C. GUIDELINES FOR CHAIR'S TENURE/PROMOTION LETTERS

The chair's evaluation of a candidate for tenure and/or promotion is of great importance in the tenure and promotion process. To represent a candidate's credentials and the department's role in the process effectively, the chair's evaluation must be comprehensive and thorough. The following guide indicates tasks that an evaluation should accomplish, and kinds of evidence that might be used in producing an evaluation, adapted as appropriate to a particular department and discipline and the context of the particular application.

General Expectations

- Explain specific expectations that were established for the candidate at the time of the appointment, referring to the letter of appointment if needed.

- Discuss the candidate's accomplishments in the context of expectations for candidates for promotion/tenure in the COPEP and the more specific expectations for candidates in the departmental addenda. This should include the general weighting of teaching, scholarship/creative activity, and service within the department.

- In those cases in which there are seriously discrepant opinions concerning the candidate's qualifications, provide a context for the Dean and Personnel Committee to use in reading the faculty evaluations.

- If external letters of evaluation are solicited, summarize the essential points of the letters.

Evaluation of Teaching

Overall, the recommendation should accomplish the following:

- Make clear the range and nature of the candidate's teaching activities, kinds and levels of courses taught, any supervision of undergraduate and graduate students on an individual or small group basis, advising.

- Clearly identify the strengths and qualities that characterize the candidate's teaching both in the classroom (pedagogy) and outside the classroom in such areas as course development, innovations in course design, contributions to equity and inclusion at the departmental level, and other activity in support of department teaching goals.

- Summarize and analyze the evidence in order to formulate a judgment as to the quality of the candidate's teaching accomplishments.

Issues and kinds of evidence may include:

- Outcomes, such as assessment data, noteworthy student work, or information from recent graduates, to show that students are prepared for work and more advanced study.

- Degree of challenge in courses taught, as evidenced by syllabi and other course materials, and testimony from students and colleagues.

- Connections to the candidate's scholarship.

- Recognitions, such as teaching awards.

- Recurrent themes in student and peer evaluations. Any quotations should be carefully chosen to be representative or typical.

- Analysis of numerical ratings in the student evaluations, which can include patterns over time, relative to course level and class size in comparison to typical patterns in the department.

  Course evaluations provide valuable feedback for the instructor regarding classroom performance, preparedness and attention to the details of the teaching process. Course evaluations, however, have certain limitations in their use as a tool for assessing teaching effectiveness. Therefore, judgments about the evidentiary value of such evaluations should be exercised with care. In particular, low raw scores, or very high raw scores are not in themselves sufficient to establish poor performance, or teaching excellence, respectively. Race, gender, ethnicity, and other attributes of the instructor irrelevant to teaching performance can influence evaluations. Course workload, difficulty, and expected grade may also be factors that impact evaluations. Any set of comments might include negative remarks not merited by actual teaching performance.

Evaluation of Scholarly Activity

Overall, the evaluation should accomplish the following:

- Describe and define the full range and nature of the candidate's scholarship.

- Describe the work done at Western since appointment or last promotion as well as prior

scholarship (if any) to provide a sense of the candidate's scholarly career.

- Assess the significance of the candidate's contribution in relation to scholarly activity in the candidate's field, the level of work done in the department, and departmental expectations.

- Summarize and analyze the evidence that supports a judgment on the quality of the candidate's accomplishments in scholarly activity.

Issues and kinds of evidence may include:

- The relationships between the candidate's scholarship and teaching and contributions to curriculum and program development.

- The quality, reputation or significance of venues: conferences, exhibits, etc. in which work has been published/exhibited/presented.

- Reception of the work in reviews or citations. Quotations should be carefully chosen to be representative or typical.

- Assessments of the contribution by those with particular expertise, members of the department or external reviewers. Quotations should be carefully chosen to be representative or typical.

- Time and effort required to develop discipline-based programs that support the curriculum (laboratories, galleries, field work, learning centers, etc.).

- Efforts to obtain external funding for scholarly activities if these are important to the candidate's field.

- The status of work in progress and how it fits into the overall accomplishment.

- The particular contribution of the candidate to work jointly produced with others.

Evaluation of Service Activities

Overall, the evaluation of service should accomplish the following:

- Describe and define the full range and nature of the candidate's service activity.

- Describe the service activities since appointment or last promotion as well as prior

professional service (if any) to provide a sense of the candidate's service career.

- Assess the significance of the candidate's service contribution in relation to the level of work done in the department; and in relation to departmental expectations regarding service to the department, the College, the University, the community, and the profession, as well as professional service to the community.

- Summarize and analyze the evidence in order to formulate a judgment as to the quality of the candidate's service.

The chair's letter should also describe and evaluate any cross-cutting activities, particularly those which advance the department and college's equity and inclusion goals.

V. DEPARTMENT CHAIRS

A. ROLE OF DEPARTMENT CHAIR

The major responsibility of the chair is to advocate and coordinate efforts to improve and support teaching, scholarship, and service to the University, College, department, and discipline. The chair consults with department members concerning matters affecting the department, especially new appointments, curriculum, scheduling, space, budget, utilization of equipment, outreach, and faculty evaluations. The chair normally presides at regular departmental meetings at which these and other relevant issues are discussed or acted upon.

The chair is evaluated on the following criteria:

- Effectiveness as a leader;

- Success in establishing goals and directions for the department in coordination with all departmental faculty members and with the Dean;

- Efforts as a representative, advocate, and spokesperson for the department;

- Contributions to faculty and staff development;

- Promotion of a collegial atmosphere, including willingness and ability to interact with, consult with, and respond to members of the faculty in matters of importance to the department;

- Scheduling of courses to meet enrollment and degree requirements and appropriateness of faculty course assignments;

- Handling of budget resources, including setting priorities for distribution and keeping faculty informed of budget status;

- Participation in and coordination of community outreach and of fund-raising.

The chair of a department is appointed by the Provost on the joint recommendation of the department and the Dean. The chair normally serves a four-year term and may be reappointed for subsequent terms.

B. REVIEW OF CHAIR

1. New chairs are evaluated informally in the spring quarter of their first year of appointment. The purpose of the first-year evaluation is to provide a guide for mentoring and the development of leadership skills.

2. The Dean sends the First-Year Chair Evaluation form to the faculty and staff of the department. Evaluation forms are returned directly to the Dean.

3. The Dean meets with the chair to discuss results of the evaluation and plan a course of action.

4. After the meeting with the chair to discuss the results of the evaluation, the Dean summarizes the department's comments and rating, adds his/her assessment, and writes the letter of evaluation.

5. New Chairs in their second year of appointment are formally reviewed using steps 2 through 4, except that the Chair Evaluation form is used.

C. REVIEW AND REAPPOINTMENT OF INCUMBENT CHAIR

1. No later than November of the fourth year of a chair's term, the Dean meets with the chair to determine whether or not the incumbent is willing to serve another term.

2. In the event the incumbent is willing to serve another term, the Dean sends the chair Evaluation form to the faculty and staff of the department. The form asks the department faculty and staff to evaluate the chair's performance and to indicate whether or not they should be retained. Evaluation forms are returned directly to the Dean.

3. Prior to voting, the department determines clearly established guidelines for voting eligibility. If two-thirds or more of the eligible voters wish to retain the incumbent, the Dean accepts this judgment unless, in his/her estimation, there are compelling reasons not to do so.

4. When the incumbent chair is selected by the department, the Dean again meets with them to review areas of strength and those needing improvement identified in the evaluations, as well as priorities and goals for the department during the next term.

5. The Dean prepares a letter to the Provost recommending reappointment. The letter includes a summary of the evaluation (without attribution) and specific priorities discussed with the chair.

6. The Provost notifies the Dean of his/her decision regarding the recommendation; the Dean then notifies the Chair of the Provost's decision.

D. SEARCH FOR NEW CHAIR

1. In the event a chair is not willing or able to serve another term, if more than one-third of the department favors change, or if the Provost does not approve the appointment, the Dean initiates the search process for a new chair unless, in his/her estimation, there are compelling reasons not to do so.

2. When deemed necessary, the Dean meets with the department to review the chair search procedure and discuss any concerns prior to establishing the Chair Search Committee.

3. The incumbent chair may serve as an advisor to the Dean during the search.

4. The Dean selects a Chair Search Committee to conduct the search and election and convey the results to the Dean. The chair of the Search Committee is from another department.

5. When a majority of the department supports one candidate and the Dean accepts the department's judgment, the Dean meets with the nominee to discuss priorities for the Chair and the department.

6. The Dean prepares a letter to the Provost recommending appointment. The letter includes the points discussed at the meeting. Copies of this letter are made available to all department faculty.

7. The Provost notifies the Dean of his/her decision regarding the recommendation; the Dean then notifies the nominee of the Provost's decision.

8. The Dean meets with unsuccessful candidates prior to the announcement of the new chair.

E. CHAIR SEARCH COMMITTEE

1. The Chair Search Committee for an internal chair consists of at least two department faculty members and one faculty member from outside the department, who serves as chair of the committee.

2. The Dean solicits recommendations for committee members from the department and normally makes selections from those recommendations. The Dean may use his/her

discretion in selecting the committee, and in some cases it may consist of more than the usual three members.

3.   The Chair Search Committee's charge is to:

- Advertise for and find the most highly qualified candidates available, either from on-campus or off-campus, as determined by the Dean;

- Contact each faculty and staff member of the department regarding direction and leadership needed by the department and distribute a summary of responses to the department and to the Dean;

- Provide adequate opportunity for all department faculty to meet with each candidate, usually via a departmental forum;

- Conduct an election involving all eligible voters as determined by the department's operating procedures;

- Maintain confidentiality of all matters relating to the election;

- Keep the Dean appraised of the progress of the search and report the results of the election to the Dean.

The committee does not select the chair but may make recommendations to the Dean if desired or requested.

VI. DEPARTMENTAL PROCEDURES

Departmental Procedures

1. Each department shall have a departmental operating procedures and policies (DOPP) document which shall include a description of its standing committees, provisions for elections to departmental committees if such are conducted, provisions for calling a departmental meeting, and other items. The DOPP must be compliant with WWU's CBA, Faculty Handbook and CSE's COPEP. These procedures shall be approved by the department and made available to the department and to the public. Initially, the tenured/tenure-track (T/TT) faculty must determine if staff and non-tenure-track (NTT) are eligible to vote to approve the DOPP; this eligibility can subsequently be defined in the DOPP itself. Regardless of whether NTT and staff are eligible to vote, there must be a mechanism for input from NTT and staff. CSE Policy, Planning, and Budget Council will review the DOPP for compliance with WWU's CBA, Faculty Handbook and CSE's COPEP.

2. Each department shall have procedures for the evaluation of faculty members, including evaluation of non-tenure track members, evaluation of probationary faculty, evaluation for promotions to Senior Instructor, evaluation for tenure and promotion to Associate Professor, post tenure review, and evaluation for promotion to Full Professor. These procedures shall be published in the addenda to the COPEP and available to departmental faculty members and to the public. CSE Policy, Planning, and Budget Council also approves and upholds the departmental addenda to the COPEP with standards for Annual Review, Tenure and Promotion, and Post-Tenure Review.

3. Each department shall develop policies for setting the schedule for summer classes and determining procedures for selecting faculty members to staff summer classes. These policies shall describe the priorities used in determining which classes are offered, and how classes are assigned to individual instructors, including the number of classes assigned to each instructor and the assignment of specific courses.

4. By the end of January of each year departments shall submit their list of proposed summer classes and instructors to the college in a "planning sheet" which shall include projected enrollment numbers. The office of the dean shall respond to departments no later than February 10th, with budget approval as appropriate. Departments are encouraged to coordinate the classes offered in the summer through discussions with other departments or through the Associate Dean.

VII. INDIVIDUAL DEPARTMENTAL ADDENDA

Departmental (and Program) Addenda detail how the broadly defined standards in the COPEP are applied within the context of specific academic disciplines. Departmental Addenda must include, at minimum, standards, expectations and procedures for the following:

1. Evaluation of non-tenure track faculty

2. Promotion and tenure evaluation, with explicit guidelines for each rank

3. Post-tenure review, with explicit guidelines for evaluating meeting vs. exceeding standards

4. Obtaining and using evaluation information from secondary appointment units for faculty with dual appointments

5. Clear demarcation of which faculty are required to participate in what types of evaluations and which faculty are allowed to participate in what types of evaluations.

The Policy, Planning and Budget Council, the Dean, and the Provost must approve these addenda and any subsequent changes.

DEPARTMENT ADDENDUM – BIOLOGY

Approved by the College of Science and Engineering Policy, Planning and Budget Council, April 29, 2021

Updates approved by the Biology Department on March 29, 2021 and adopted on April 29, 2021.

This document outlines the Biology Department's expectations for faculty appointments, promotions, and review.

Biology Department Preamble

> The department acknowledges that circumstances outside the control of the university can arise that influence the ability to meet the requirements of promotion. In these circumstances, the department will consider evidence for the candidate's trajectory to meet specific requirements as evidence of meeting those requirements. Candidates should provide the evidence for their trajectory and explain how circumstances prevented them from meeting a requirement. Candidates are also encouraged to explain how their overall and relative balance among teaching, research, and service was altered and whether other parts of their application balance any missing requirements. The department only intends to consider an exception to the requirements under exceptional circumstances (e.g., the COVID global pandemic, when teaching and research loads were severely altered or restricted), and recognizes the impacts of exceptional circumstances might last well after the circumstances have returned to "normal."

Teaching

The Biology Department values high-quality teaching at all levels, from undergraduate GUR courses, to courses for Biology majors, to graduate seminars. We emphasize deep biological knowledge, scientific-process skills, critical thinking, and problem-solving skills, all rooted in scientific methods. Along with formal courses, we consider research mentorship of undergraduates and/or graduate students to be an important aspect of our teaching responsibilities. To be promoted, faculty members should demonstrate substantial achievement in teaching assigned courses and in mentoring students in research through individualized instruction. The department also values highly the development of curricula and courses.

Scholarship

The Biology Department values the generation, application, and/or synthesis of new scientific and pedagogical knowledge, for its role in faculty development, for its impact upon training graduate and undergraduate students as future scientists, and for its value in informing and guiding the work of a wide variety of professional and community scientists.

Service

The Biology Department values the contribution of the faculty to the effective functioning of the department, the college, the university, the profession, and the community.

Equity, Inclusion, & Diversity

The Biology Department is committed to improving equity, inclusion, and diversity in STEM.

Participation by Faculty in the Review Processes

The Biology Department has the primary responsibility for the evaluation of each candidate's performance, including annual evaluations of probationary faculty members, evaluations of candidates for tenure and/or promotion, evaluations of candidates under post-tenure review, and evaluations of non-tenure track faculty.

- All tenured faculty members are expected to participate in the annual review of assistant professors, submitting an individual written assessment of the candidate's performance along with a completed evaluation form indicating their vote for or against reappointment. The only exception is if an assistant professor is in their first year of their appointment in the Department, in which case the Mentor Team (described under Associate Professor, below) must provide a summary letter that helps inform the Department Chair's first-year evaluation letter.
- All tenured faculty members are expected to participate in evaluations of candidates for tenure and/or promotion, submitting an individual written assessment of the candidate's performance along with a completed evaluation form with a vote for or against tenure and/or promotion. The following procedure is used:
    - By 2 days before the discussion of the candidate, faculty members participating in the review process must evaluate all the materials provided by the candidate, as well as all external letters solicited by the Department Chair. These faculty members fill out the evaluation form (including numerical rankings for teaching, research, and service), but do not vote or sign the form. This form is submitted to the Department Chair prior to the discussion. The tenured faculty then discusses the materials provided by the candidate. This discussion includes a brief summary by one or more of the tenured faculty members of the candidate's research program and accomplishments. By 3 days after the discussion, each tenured faculty member must submit to the Department Chair the evaluation form with the vote and signature. The Department Chair then prepares a draft summary evaluation letter and meets with the Biology Personnel Committee to review the draft, after which the Department Chair may revise the letter based on the committee's feedback prior to sharing it with the candidate for them to have the opportunity to correct errors of fact.
- All tenured faculty members are expected to participate in evaluations of candidates for post-tenure review, submitting an individual written assessment of the candidate's performance along with a completed evaluation form with ratings of the candidate's performance in teaching, research, and service relative to departmental standards.

- A tenured faculty member may be excused from participation in any of the above reviews if the review is to occur during a quarter in which the faculty member is on professional leave. Professional leave status does not preclude participation, but advance arrangements must be made if the faculty member is away from campus.
- Probationary faculty, non-tenure-track faculty, and staff do not submit formal evaluations, rankings, or votes.

ASSISTANT PROFESSOR

Qualifications for appointment to probationary faculty:

A Ph.D. in Biology or related science field is required. The candidate will also show evidence of substantial achievement in teaching (or the promise of attaining substantial achievement in teaching) and research. Additional qualifications are to be spelled out in the position description for each tenure-track faculty search.

ASSOCIATE PROFESSOR

Each tenure-track faculty member will be assigned a Mentor Team composed of tenured faculty members. Policies and procedures relating to Mentor Teams are described in the Biology Department's Operating Policies and Procedures. The Mentor Team's mentorship feedback and Department Chair's annual evaluation letter for each tenure-track faculty member shall be used to guide and assist the candidate in preparing materials for tenure and promotion.

Department standards for tenure and promotion to Associate Professor:

Teaching

A requirement for tenure and promotion to Associate Professor is substantial achievement in teaching or improvement toward that goal (recognizing risks that may be taken for curriculum and course development). Incorporation of evidence-based teaching practices into classes is highly valued. Effective mentorship of students in research is required. Probationary faculty must provide the following evidence to demonstrate these achievements:

- A teaching statement that includes:

    a) teaching goals and a self-assessment of teaching accomplishments for each course taught during the evaluation period,

    b) a description of curriculum and course development done by the candidate,

    c) a description of how the candidate's teaching activities have helped advance strategic goals for teaching identified in the Biology Department Strategic Plan, and

    d) a description of research mentorship approaches used and a reflection on the effectiveness of those approaches.

- Peer observations by tenured faculty members for courses taught as Assistant Professor. Not all courses must be observed, and not all tenured faculty members must observe each candidate, but the primary courses taught by the candidate should be observed on more than one occasion. The Biology Personnel Committee will coordinate these observations.

- All student evaluations (numerical summary and all written comments) from the testing center (or College-approved evaluation) for all iterations of each course taught during the evaluation period.

- Syllabi and representative course materials (examples of lecture slides, handouts, exams, etc.) for each course taught during the evaluation period.

- Representative examples of graded student work from each course (at least 2 examples per course; any information that identifies the student(s) should be redacted) to illustrate the range of performance on exams, papers, and other work, as well as to illustrate typical instructor feedback to students.

Additional evidence of teaching effectiveness may include letters from alumni and evaluations from other professional peers.

Research

Research in biology and intersecting disciplines generally fits into one of two broad categories: a) primary research (in which the researcher gathers new data to address questions), and b) secondary research (in which the researcher summarizes, synthesizes, and/or integrates existing data). Intersecting disciplines include, but are not limited to: biology education research, science communication research, STEM equity and inclusion research, and biology-inspired research in disciplines such as math, chemistry, and computer science.

A requirement for tenure and promotion to Associate Professor is substantial achievement in research as an Assistant Professor. Evidence of research achievement must include research closely related to the sub-discipline for which the candidate was hired; however, it can also include research in other areas of biology and intersecting disciplines. Probationary faculty must provide the following evidence to demonstrate these achievements:

- A statement providing a clear description of their research program and evidence that their research program has contributed to the strategic goals for research as identified in the Biology Department Strategic Plan.

- At least one peer-reviewed publication in biology and/or an intersecting discipline from primary research conducted as an Assistant Professor at Western in which the candidate was a major contributor. Such a publication must be published or accepted for publication (i.e., in press) at the time of the review. The publication may be in the format of a peer-reviewed journal article but alternative peer-reviewed formats would also suffice (e.g., monograph, book, or website). The publication does not have to be in the sub-discipline for which the candidate was hired. The candidate must provide a written explanation of their contribution to this publication.

- Evidence of effective research outcomes from mentorship of students (e.g., Master's theses, honors theses, student co-authored publications or technical reports, publications and/or curricula stemming from integration of authentic research into courses, student-authored grant proposals, grants to students, and student posters at Scholars Week and/or disciplinary conferences), with a description of what the students contributed to these outcomes.

- Evidence of substantial achievement via a combination of the following (the necessary amount of evidence will vary depending on the number and quality of publications as well as on subdisciplinary differences in the opportunities and requirements for publications and grants):

  - Additional publications related to the profession, including journal articles, monographs, books, technical reports, and conference proceedings. Peer-reviewed publications receive greater weight than non-refereed publications. The quality, scope, and number of publications, as well as types of co-authors (student coauthors are especially valued but are not required) and level of involvement by the candidate, will also factor into evaluation of the publication record.

  - Research proposals and grants. Large, funded, external grants receive the greatest weight for this category, with lesser weight for small external grants, internal grants, and non-funded proposals.

  - Additional items with lesser weight than substantial peer-reviewed publications and major external grants include:

    o Creation of online research tools and resources related to the candidate's professional interests.

    o Presentations at disciplinary conferences (invited presentations receive greater weight than contributed presentations, peer-reviewed submissions receive greater weight than non-refereed submissions, and international and national conferences receive greater weight than regional conferences) and invited research seminars at other academic institutions.

    o External faculty fellowships (e.g., at a national laboratory, research center, or university and/or via a foundation).

    o Activities that support the research infrastructure or culture of the department, including:

      ▪ Training undergraduates, graduate students, and faculty members in instrumentation use, analytical approaches, or lab/field methods.

      ▪ Acquiring shared instrumentation through external or internal funding sources.

o   Other evidence that the candidate's research is important to the larger scientific and educational community, such as citation statistics.

External review letters of the candidate's research are required. The Department Chair shall solicit external reviews of the quality of scholarship of candidates to be evaluated for tenure and promotion. The external reviewers must be expert in an area of research overlapping that of the candidate and must be at least at the rank of Associate Professor (or equivalent for non-academic positions). The Department Chair shall provide to the external reviewers the candidate's CV and the scholarship section of the candidate's tenure and promotion file. In addition, the Department Chair shall provide to the external reviewers the teaching schedule of the candidate, a record of the candidate's service, and an overview of how teaching and research at Western compare to a Research-1 university. The Department Chair shall instruct the external reviewers that their reviews are most useful if they take into consideration the strong emphasis upon teaching at Western, including mentoring undergraduate and graduate research students.

To facilitate the identification of a pool of potential external reviewers, the candidate for tenure and promotion will submit a list of qualified reviewers to the Department Chair, annotated to describe how the candidate knows each suggested reviewer and to detail any potential conflicts of interest. Candidates are encouraged to submit suggested reviewers from PUIs as well as Research-1 institutions. Candidates may also submit a list of unacceptable reviewers and the reasons why those individuals are unacceptable for inclusion as potential reviewers. The Department Chair will solicit additional names of qualified reviewers from experts within the candidate's sub-discipline. From the combined pool of potential reviewers, the Department Chair shall select three reviewers, with the exclusion of the reviewers whom the candidate considered unacceptable.

Service

A requirement for tenure and promotion to Associate Professor is fulfilling the basic departmental service, as evidenced by each of the following:

- A statement describing how the candidate's service activities have helped advance strategic goals identified in the Biology Department Strategic Plan.

- Attendance at and contribution to departmental meetings and programs.

- Submitting mandatory reports by the deadlines.

- Effectively participating in assigned department committees.

- Effectively attending to academic advising responsibilities.

Other service to the department that is valued, but not required, includes contributions to department curricula such as lab upgrades, new course development, and preparation of undergraduate and/or graduate teaching assistants. In addition, the department values efforts to accomplish strategic goals outlined in the Biology Department Strategic Plan. Particularly valued is substantive work toward strategic goals identified as high priority by the Biology Department.

Service beyond the department is also valued, but not required for advancement to tenured Associate Professor status. Such service may include:

- Serving on and participating in College and/or University committees, including the faculty union.

- Serving the profession via work such as reviewing manuscripts, books, or grants; convening topical sessions at regional or national conferences; taking leadership in regional or national organizations; and service on editorial boards.

- Significant involvement in local outreach or community service related to the profession.

Equity, inclusion, and diversity

A further requirement for tenure and promotion to Associate Professor is a substantial commitment to improving equity, inclusion, and diversity in STEM. This commitment must be described under an Equity, Inclusion, & Diversity subsection in at least one of the three reflection statements (Teaching, Research, or Service). A substantial commitment to improving equity, inclusion, and diversity in STEM may be demonstrated by, but is not limited to, any of the following:

- Efforts to alter course design, materials discussed in courses, and/or modes of instruction to incorporate evidence-based teaching practices that actively engage students and foster inclusivity and/or to develop course materials or design curricula that focus on intersections between biology and topics (e.g., race, sex, gender, scientific ethics) that relate to issues of equity and inclusion.

- Inclusive mentorship of students in research, including but not limited to: activities such as running research lab meetings that encourage active participation by all lab members, mentoring research students from underserved populations, hosting scientists from underrepresented groups to meet with one's lab group, discussing alternate career paths with research students, using a lab journal club to discuss research papers by diverse scientists, etc.

- Conducting climate assessments of one's own and/or another instructor's course(s) or research lab.

- Submission of proposals to external agencies for funding focused on improving STEM equity, inclusion, and diversity (successful, substantial proposals receive more weight).

- Biology education research focused on understanding barriers to equity, inclusion, and diversity or how to mitigate such barriers.

- Adoption of inclusive advising practices, including but not limited to: proactive outreach to struggling advisees, participation in mentorship programs focused on

improving the success and retention of underrepresented students in STEM, providing resources for career planning, and coordination of professional development workshops for students.

- Active engagement with student clubs, groups, or associations at Western.

- Participation in outreach efforts designed to encourage STEM-interested students from underrepresented groups to seek education and careers in science.

- Participation in professional development workshops and training courses designed to improve awareness of issues relating to equity, inclusion, and diversity.

- Participation in committees, task forces, and other service groups focused on policies and practices designed to improve equity, inclusion, and diversity at departmental, college, university, or professional levels.

PROFESSOR
Department standards for promotion to Professor:

Teaching

A requirement for promotion to Professor is substantial achievement in teaching (recognizing risks that may be taken for curriculum and course development). Incorporation of evidence-based teaching practices into classes is highly valued. Effective mentorship of students in research is required. Candidates must provide the following evidence to demonstrate these achievements:

- A teaching statement that includes:

  a) teaching goals and a self-assessment of teaching accomplishments for each course taught during the evaluation period,

  b) a description of curriculum and course development done by the candidate,

  c) a description of how the candidate's teaching activities have helped advance strategic goals for teaching identified in the Biology Department Strategic Plan, and

  d) a description of research mentorship approaches used and a reflection on the effectiveness of those approaches.

- Peer observations by tenured faculty members for courses taught as an Associate Professor. Not all courses must be observed, and not all tenured faculty members must observe each candidate, but the primary courses taught by the candidate should be observed on more than one occasion. The Biology Personnel Committee will coordinate these observations.

- All student evaluations (numerical summary and all written comments) from the testing center (or College-approved evaluation) for all iterations of each course taught during the evaluation period.

- Syllabi and representative course materials (examples of lecture slides, handouts, exams, etc.) for each course taught during the evaluation period.

- Representative examples of graded student work from each course (at least 2 examples per course; any information that identifies the student(s) should be redacted) to illustrate the range of performance on exams, papers, and other work, as well as to illustrate typical instructor feedback to students.

Additional evidence of teaching effectiveness may include letters from alumni and evaluations from other professional peers.

Research

Research in biology and intersecting disciplines generally fits into one of two broad categories: a) primary research (in which the researcher gathers new data to address questions), and b) secondary research (in which the researcher summarizes, synthesizes, and/or integrates existing data). Intersecting disciplines include, but are not limited to: biology education research, science communication research, STEM equity and inclusion research, and biology-inspired research in disciplines such as math, chemistry, and computer science.

A requirement for promotion to Professor is substantial achievement in research as an Associate Professor. Evidence of research achievement must include research closely related to the candidate's research program; however, it can also include research in other areas of biology and intersecting disciplines. Candidates must provide the following evidence to demonstrate these achievements:

- A statement providing a clear description of their research program and evidence that their research program has contributed to the strategic goals for research as identified in the Biology Department Strategic Plan.

- At least one peer-reviewed publication in biology and/or an intersecting discipline from primary research conducted as an Associate Professor at Western in which the candidate was a major contributor. Such a publication must be published or accepted for publication (i.e., in press) at the time of the review. The publication may be in the format of a peer-reviewed journal article but alternative peer-reviewed formats would also suffice (e.g., monograph, book, or website). The publication does not have to be in the sub-discipline for which the candidate was

hired. The candidate must provide a written explanation of their contribution to this publication.

- Evidence of effective research outcomes from mentorship of students (e.g., Master's theses, honors theses, student co-authored publications or technical reports, publications and/or curricula stemming from integration of authentic research into courses, student-authored grant proposals, grants to students, and student posters at Scholars Week and/or disciplinary conferences), with a description of what the students contributed to these outcomes.

- Evidence of substantial achievement via a combination of the following (the necessary amount of evidence will vary depending on the number and quality of publications as well as on subdisciplinary differences in the opportunities and requirements for publications and grants):

  - Additional publications related to the profession, including journal articles, monographs, books, technical reports, and conference proceedings. Peer-reviewed publications receive greater weight than non-refereed publications. The quality, scope, and number of publications, as well as types of co-authors (student coauthors are especially valued but are not required) and level of involvement by the candidate, will also factor into evaluation of the publication record.

  - Research proposals and grants. Large, funded, external grants receive the greatest weight for this category, with lesser weight for small external grants, internal grants, and non-funded proposals.

  - Additional items with lesser weight than substantial peer-reviewed publications and major external grants include:

    - Creation of online research tools and resources related to the candidate's professional interests.

    - Presentations at disciplinary conferences (invited presentations receive greater weight than contributed presentations, peer-reviewed submissions receive greater weight than non-refereed submissions, and international and national conferences receive greater weight than regional conferences) and invited research seminars at other academic institutions.

    - External faculty fellowships (e.g., at a national laboratory, research center, or university, and/or via a foundation).

    - Activities that support the research infrastructure or culture of the department, including:

      - Training undergraduates, graduate students, and faculty members in instrumentation use, analytical approaches, or lab/field methods.

- Acquiring shared instrumentation through external or internal funding sources.

  o Other evidence that the candidate's research is important to the larger scientific and educational community, such as citation statistics.

External review letters of the candidate's research are required. These letters will be obtained by the same procedure used by probationary faculty applying for tenure and promotion.

Service

A requirement for tenure and promotion to Professor is fulfilling the basic departmental service, as evidenced by each of the following:

- A statement describing how the candidate's service activities have helped advance strategic goals identified in the Biology Department Strategic Plan.

- Attendance at and contribution to departmental meetings and programs.

- Submitting mandatory reports by the deadlines.

- Effectively participating in assigned department committees, which may include Mentor Teams.

- Effectively attending to academic advising responsibilities.

An additional requirement for promotion to Professor is a record of significant leadership in department committees, program development, or significant efforts to accomplish strategic goals outlined in the Biology Department Strategic Plan. Particularly valued is substantive work toward strategic goals identified as high priority by the Biology Department.

In addition, at least some of the following is required:

- Significant service to the College or University, including the faculty union, as demonstrated by effective committee leadership or active participation in committee work.

- Leadership in efforts to improve equity, inclusion, and diversity.

- Leadership in the profession, including organizing meetings or symposia for regional, national and international organizations, editorial duties for scientific journals, and membership in scientific advisory boards.

- Significant involvement in local outreach or community service related to the profession.

Equity, inclusion, and diversity

A further requirement for promotion to Professor is a substantial commitment to improving equity, inclusion, and diversity in STEM. This commitment must be described under an Equity, Inclusion, & Diversity subsection in at least one of the following sections: Teaching, Research, or Service. A substantial commitment to improving equity, inclusion, and diversity in STEM may be demonstrated by, but is not limited to, any of the following:

- Efforts to alter course design, materials discussed in courses, and/or modes of instruction to incorporate evidence-based teaching practices that actively engage students and foster inclusivity and/or to develop course materials or design curricula that focus on intersections between biology and topics (e.g., race, sex, gender, scientific ethics) that relate to issues of equity and inclusion.

- Inclusive mentorship of students in research, including but not limited to: running research lab meetings that encourage active participation by all lab members, mentoring research students from underserved populations, hosting scientists from underrepresented groups to meet with one's lab group, discussing alternate career paths with research students, using a lab journal club to discuss research papers by diverse scientists, etc.

- Conducting climate assessments of one's own and/or another instructor's course(s) or research lab.

- Submission of proposals to external agencies for funding focused on improving STEM equity, inclusion, and diversity (successful, substantial proposals receive more weight).

- Biology education research focused on understanding barriers to equity, inclusion, and diversity or how to mitigate such barriers.

- Adoption of inclusive academic advising practices, including but not limited to: proactive outreach to struggling advisees, participation in mentorship programs focused on improving the success and retention of underrepresented students in STEM, providing resources for career planning, and coordination of professional development workshops for students.

- Active engagement with student clubs, groups, or associations at Western.

- Participation in outreach efforts designed to encourage STEM-interested students from underrepresented groups to seek education and careers in science.

- Participation in professional development workshops and training courses designed to improve awareness of issues relating to equity, inclusion, and diversity.

- Participation in committees, task forces, and other service groups focused on policies and practices designed to improve equity, inclusion, and diversity at departmental, college, university, or professional levels.

POST TENURE REVIEW

Faculty members will be evaluated based on standards for their rank, making allowances for fluctuations in the relative emphasis on teaching, scholarship, and service across the professional life-cycle of the individual faculty member.

Department standards for post-tenure review:

Teaching

For a rating of "meets department standards" in teaching, evidence for sustained and effective engagement in teaching and research mentorship is required during the review period, as evidenced by:

- A teaching statement that includes:

  a) teaching goals and a self-assessment of teaching accomplishments for each course taught during the evaluation period,

  b) a description of curriculum and course development done by the candidate,

  c) a description of how the candidate's teaching activities have helped advance strategic goals for teaching identified in the Biology Department Strategic Plan, and

  d) a description of research mentorship approaches used and a reflection on the effectiveness of those approaches.

- Peer observations by tenured faculty members for courses taught since the candidate's last evaluation. Not all courses must be observed, and not all tenured faculty members must observe each candidate, but the primary courses taught by the candidate should be observed on more than one occasion. The Biology Personnel Committee will coordinate these observations.

- All student evaluations (numerical summary and all written comments) from the testing center (or College-approved evaluation) for all iterations of each course taught during the evaluation period.

- Syllabi and representative course materials (examples of lecture slides, handouts, exams, etc.) for all courses taught during the evaluation period.

- Representative examples of graded student work from each course (at least 2 examples per course; any information that identifies the student(s) should be redacted) to illustrate the range of performance on exams, papers, and other work, as well as to illustrate typical instructor feedback to students.

Additional evidence of teaching effectiveness may include letters from alumni and evaluations from other professional peers.

For a rating of "exceeds department standards" in teaching, in addition to the requirements for "meets department standards", there must be evidence that the candidate has substantively advanced the teaching mission of the department. Such evidence must include the evidence required for "meets departmental standards", in addition to evidence of some of the following:

- Leadership in curricular reform (e.g., developing evidence-based learning activities, new labs, integrating quantitative skills and/or writing into courses).

- Teaching evaluations that often describe the candidate's teaching as effective and of high quality, while considering information about the course (e.g., level of course, and requirement vs elective course).

- Other significant efforts that enhance the strategic goals for teaching, as described in the Biology Department Strategic Plan.

Research

Research in biology and intersecting disciplines generally fits into one of two broad categories: a) primary research (in which the researcher gathers new data to address questions), and b) secondary research (in which the researcher summarizes, synthesizes, and/or integrates existing data). Intersecting disciplines include, but are not limited to: biology education research, science communication research, STEM equity and inclusion research, and biology-inspired research in disciplines such as math, chemistry, and computer science.

A complete post-tenure review dossier must include a statement describing how the candidate's scholarly activities have helped advance strategic goals for research identified in the Biology Department Strategic Plan.

For post-tenure review, external review letters of the candidate's research are neither required nor expected.

The level of expectation in research is reduced during the later years of a faculty member's professional life cycle, provided that there is commensurate growth in the candidate's teaching or service in a manner that substantively advances the strategic goals of the Department, College, or University.

For a rating of "meets department standards" in research, we expect evidence of continued engagement in research during the review period, as evidenced by:

- A statement providing a clear description of their research program and evidence that their research program has contributed to the strategic goals for research as identified in the Biology Department Strategic Plan.

- Publication of primary or secondary research in biology and/or intersecting disciplines, typically in the form of journal articles, monographs, books, or websites. Peer-reviewed publications receive greater weight than non-refereed publications. The quality, scope, and number of publications, as well as types of co-authors (student coauthors are especially valued but are not required) and level of involvement by the candidate, will also factor into evaluation of the publication record.

- Evidence of effective research outcomes from mentorship of students (e.g., Master's theses, honors theses, student co-authored publications or technical reports, publications and/or curricula stemming from integration of authentic research into courses, student-authored grant proposals, grants to students, and student posters at Scholars Week and/or disciplinary conferences), with a description of what the students contributed to these outcomes.

- Research proposals and grants. Large, funded, external grants receive the greatest weight for this category, with lesser weight for small external grants, internal grants, and non-funded proposals.

- Additional items with lesser weight than substantial peer-reviewed publications and major external grants include:

  - Creation of online research tools and resources related to the candidate's professional interests.

  - Presentations at disciplinary conferences (invited presentations receive greater weight than contributed presentations, peer-reviewed submissions receive greater weight than non-refereed submissions, and international and national conferences receive greater weight than regional conferences) and invited research seminars at other academic institutions.

  - External faculty fellowships (for example, at a national laboratory, research center, or university and/or via a foundation).

  - Activities that support the research infrastructure and/or culture of the department, including:

    - Training undergraduates, graduate students, and faculty members in instrumentation use, analytical approaches, or lab/field methods.

    - Acquiring shared instrumentation through external or internal funding sources.

  - Other evidence that the candidate's research is important to the larger scientific and educational community, such as citation statistics.

For a rating of "exceeds department standards" in research, there must be evidence of significant research productivity, beyond the expectations to "meet department standards". Such evidence must include the evidence required for "meets departmental standards", in addition to evidence of some of the following:

- Publication of a paper for which the candidate was a major contributor in a notable, high impact scientific journal.

- Multiple peer-reviewed papers for which the candidate was a major contributor. Papers with student coauthors are especially valued.

- Contribution as PI or Co-PI to a substantial, funded external grant.

- Substantial books, monographs, or online research tools/resources relating to the profession.

Service

For a rating of "meets department standards" in service, candidates must demonstrate a commitment to basic departmental service, as evidenced by each of the following:

- A statement describing how the candidate's service activities have helped advance strategic goals identified in the Biology Department Strategic Plan. This statement must include a subsection on Equity, Inclusion, & Diversity detailing any service activities done to enhance STEM equity, inclusion, and diversity (including work related to teaching or research)—see information on Equity, Inclusion, & Diversity below.

- Attendance at and contribution to departmental meetings and programs.

- Submitting mandatory reports in a timely fashion.

- Effectively participating in assigned department committees, which may include Mentor Teams.

- Effectively attending to academic advising responsibilities.

- A statement describing how the candidate's service activities have helped advance strategic goals identified in the Biology Department Strategic Plan.

For a rating of "meets department standards" in service, we also expect evidence for effective service to the College, University (including the faculty union), profession, and/or community. Evidence for such service may include, but is not limited to:

- Service to the College and/or University, including the faculty union, via committee work.

- Service to the profession, including reviewing manuscripts, books, or grants; participation in running meetings and/or symposia for regional, national and international organizations.

- Local outreach or community service related to the profession.

For a rating of "exceeds department standards", there must be a record of significant commitment to service, beyond the expectations to "meet department standards". Such evidence must include evidence of significant leadership in department committees, program development, and/or efforts to accomplish strategic goals outlined in the Biology Department Strategic Plan. Particularly valued is substantive work toward strategic goals identified as high priority by the Biology Department. Evidence of significant leadership may include:

- Significant service to the Department, or College or University, including the faculty union, as demonstrated by effective committee leadership and/or active participation in committee work.

- Leadership in efforts to improve equity, inclusion, and diversity.

- Leadership in the profession, including organizing meetings and/or symposia for regional, national and international organizations, editorial duties for scientific journals, and membership in scientific advisory boards.

- Significant involvement in local outreach or community service related to the profession.

Equity, inclusion, and diversity

A further requirement for successful PTR is evidence of a substantial commitment to improving equity, inclusion, and diversity in STEM. This commitment must be described under an Equity, Inclusion, & Diversity subsection in at least one of the following sections: Teaching, Research, or Service. A substantial commitment to improving equity, inclusion, and diversity in STEM may be demonstrated by, but is not limited to, any of the following:

- Efforts to alter course design, materials discussed in courses, and/or modes of instruction to incorporate evidence-based teaching practices that actively engage students and foster inclusivity and/or to develop course materials or design curricula that focus on intersections between biology and topics (e.g., race, sex, gender, scientific ethics) that relate to issues of equity and inclusion.

- Inclusive mentorship of students in research, including but not limited to: activities such as running research lab meetings that encourage active participation by all lab members, mentoring research students from underserved populations, hosting scientists from underrepresented groups to meet with one's lab group, discussing alternate career paths with research students, using a lab journal club to discuss research papers by diverse scientists, etc.

- Conducting climate assessments of one's own and/or another instructor's course(s) or research lab.

- Submission of proposals to external agencies for funding focused on improving STEM equity, inclusion, and diversity (successful, substantial proposals receive more weight).

- Biology education research focused on understanding barriers to equity, inclusion, and diversity or how to mitigate such barriers.

- Adoption of inclusive advising practices, including but not limited to: proactive outreach to struggling advisees, participation in mentorship programs focused on improving the success and retention of underrepresented students in STEM, providing resources for career planning, and coordination of professional development workshops for students.

- Active engagement with student clubs, groups, or associations at Western.

- Participation in outreach efforts designed to encourage STEM-interested students from underrepresented groups to seek education and careers in science.

- Participation in professional development workshops and training courses designed to improve awareness of issues relating to equity, inclusion, and diversity.

- Participation in committees, task forces, and other service groups focused on policies and practices designed to improve equity, inclusion, and diversity at departmental, college, university, or professional levels.

- Other activities relevant to enhancing STEM equity, inclusion, and diversity.

Evaluation of Faculty Members with Joint Appointments in Biology and the Science Education Group

Faculty members with joint appointments in Biology and the Science Education Group will be reviewed according to rank-defined departmental standards for tenure, promotion, and post-tenure review with these caveats:

- The Biology Department will review courses taught for both Biology and for the Science Education Group, with the exception of courses that contain limited Biology content and are exclusively teaching-methods courses (these latter courses will be reviewed by the Science Education Group).

- Some or all scholarship may be on science education. Such scholarship will be reviewed by the Science Education Group.

- Some or all extra-departmental service may be on behalf of the Science Education Group or professional science education organizations.

- Service to the Biology Department is expected, as described above under the criteria set for promotion to the relevant rank.

The Department Chair will request that the Science Education Group Director provide a letter summarizing the Science Education Group evaluation of the candidate.

NON-TENURE-TRACK FACULTY

The goal of the Biology Department is for NTT positions to provide opportunities for professional advancement. NTT faculty members are encouraged to discuss their professional development goals with the Department Chair, the department's Personnel Committee chair, and other members of the faculty; to the degree possible, the Biology Department will try to provide avenues by which NTT faculty members can pursue such goals.

With the exception of Senior Instructors (see below), non-tenure-track faculty shall be reviewed annually on the basis of expectations defined in the letter of offer. For each course (though not all iterations of a given course) taught, members of the Department's Personnel Committee (or, if necessary, other tenure-track faculty members acting in their stead) will collectively attend lectures, review exams, assignments, activities, and other course materials, and discuss (in writing and verbally) with the non-tenure-track faculty member the instructor's learning goals and the effectiveness of their teaching approaches for achieving those goals. The written feedback is to be shared with the chair of the Personnel Committee. In addition, after completed student evaluations have been returned to instructors and upon request from the Personnel Committee chair, non-tenure-track faculty members must submit the full complement of student course evaluations (numerical summaries and written comments; using WWU- or CSE-approved evaluation forms) for all courses taught during the previous quarter.

Near the end of spring quarter, or within one quarter after the appointment ends, whichever comes first, the Personnel Committee chair will submit a summary evaluation to the Department Chair. This evaluation will form the basis for the annual evaluation letter to be submitted by the Department Chair to the Dean. Prior to submitting this evaluation, the non-tenure-track faculty member will have the opportunity to respond to the annual evaluation letter. A copy of the final version of the annual evaluation letter submitted to the Dean will be provided to the non-tenure-track faculty member.

Teaching effectiveness for all non-tenure-track faculty members will be evaluated on the basis of:

- Course materials (content and/or skills)

- Effectiveness of lecture content and presentation in relation to learning goals.

- Effectiveness of student-centered teaching methods used, if relevant, in relation to learning goals.

- Course rigor and expectations

- Student evaluations (numerical summaries and individual written comments) for all sections of all courses taught during the review period

Senior Instructor positions may include specific tasks or roles beyond teaching activities as outlined in the letter of appointment. Performance in all such areas must be

satisfactory. Senior Instructors shall be evaluated only in the final year of their current appointment, following the process outlined above for the review of non-tenure-track faculty members.

The Collective Bargaining Agreement between WWU and UFWW discusses specifics relating to the duration of contractual appointments for NTT faculty members.

DEPARTMENT ADDENDUM – CHEMISTRY

Approved by the College of Science and Engineering Policy, Planning and Budget Council, April 30, 2009 - updates approved January 7, 2010, Jun 2 2016, Jun 8 2017, May 26, 2022.

Updates adopted by the Chemistry Department Academic Year 2017-2018

This document outlines the Chemistry Department's expectations for faculty appointments, promotions, and review.

Chemistry Department Expectations

It is expected that all faculty members contribute to the goals of the strategic plans for the department and college. We value efforts to foster inclusive, student-centered classroom, laboratory, and research environments that cultivate lifelong learning. Chemistry students, faculty, and staff contribute to the scientific enterprise and broader community through outreach and a program of student-focused scholarship.

The elements of a successful tenure track faculty career as a member of the chemistry department at WWU are teaching, scholarship, and service. The indicators of success in each of these areas and for tenure and promotion are broadly described below. It is also expected that the candidate contributes towards accessibility, diversity, equity, and inclusion.

The primary element of a successful instructional non-tenure track faculty career as a member of the chemistry department at WWU is effective teaching in an environment that promotes diversity, equity, and inclusion. Other activities may also include scholarship and/or service. These expectations and metrics of success for instructional non-tenure track faculty members are described below.

Effect of Covid19 on Evaluation of Faculty

The evaluation process for faculty should be equitable when considering access to resources, in-person teaching experience and access to research activities. The evaluating faculty acknowledge and will take into account that the Covid19 pandemic and associated quarantine may have had disproportionate negative impacts on individual faculty members. The department encourages the impacted faculty members under review to describe how their efforts in teaching, scholarship and/or service have been impacted by the Covid19 pandemic. The evaluation of faculty for tenure, promotion and PTR will be compliant with Covid-related MOUs between WWU and the UFWW.

Teaching

Faculty of the chemistry department are committed to providing high quality educational opportunities while promoting accessibility, diversity, equity, and inclusivity. A member of the faculty must be considered by their colleagues to be an effective, inclusive teacher in core courses as well as electives or specialty courses. Assessment of teaching effectiveness is based on direct classroom observation by other faculty, teaching evaluations by students, and relevant ancillary documents.

Contributions to the department curriculum are highly valued. Examples may include creating new courses, revising existing courses or adding new content, preparation of teaching assistants, securing grants to support teaching activities, and/or the implementation of inclusive or student-centered practices. The contribution may be made as an individual or as a member of a larger body charged with such responsibility. In the latter case, the contribution of the individual to the group effort will be considered.

Scholarship

Members of the chemistry tenure track faculty are expected to be engaged in scholarship while adhering to safety standards relevant to the discipline, with the following basic purposes:

- to advance knowledge in the field

- to keep the faculty member up to date in their specialty

- to provide inclusive training and mentorship for undergraduate and graduate students

- to contribute to the scholarly activity of the department

Scholarly accomplishment may be demonstrated in several ways, but the most specific and compelling evidence is peer-reviewed publications resulting from work undertaken while a member of the faculty of WWU. Primary examples of such publications are original papers in refereed journals, books, and review articles. Activities and publications which involve undergraduate and/or graduate students are especially valued. Delivering research presentations and securing resources to support scholarly activities are also highly valued. Also considered significant are the authorship of textbooks and relevant instructional materials, software, and patents. Scholarly contributions may be made as an individual or as a member of a group. In the latter case, the contribution of the individual to the group effort will be weighed.

Service

Members of the chemistry tenure track faculty are expected to participate in service to the department and the community, and participation should increase with rank. Activities and professional development associated with advancing diversity, equity, inclusion and accessibility are encouraged at all levels of service. Primary areas of service include the following:

- Membership on departmental, college and university committees and active participation in university affairs

- Activities on behalf of professional organizations, as officers or members of regional or national committees

- Peer review of grant proposals, journal manuscripts, etc.

- Community engagement as a scientist-educator before public or professional gatherings

- Professional development that supports continued growth as a faculty member

Service of jointly appointed faculty to the Chemistry Department is expected relative to the fraction of their appointment. Some or all extra-departmental service may be on behalf of the secondary appointment.

Contributions to Accessibility, Diversity, Equity, and Inclusion (ADEI)

Faculty members in the Chemistry Department are expected to be actively engaged in fostering ADEI efforts. These activities must be explicitly described in at least one of the personal reflections within the three categories of teaching, scholarship, or service.

Participation by Faculty in the Review Process

Unless they are on leave, all tenured faculty members are expected to submit an individual written assessment of each candidate's dossier and to vote. Tenured faculty on leave may, but are not required to, submit an individual written assessment of the candidate's dossier and vote. Personnel who participate in the review of candidates and voting on decisions of tenure, promotion and post-tenure review are defined by the UFWW CBA.

For cases involving promotion to Associate or Full Professor, tenured faculty will meet to confidentially discuss the qualifications of the candidate. The procedure for the review process is:

1. The Chair solicits external reviews of the quality of scholarship of faculty members to be evaluated for tenure and/or promotion. The external reviewers must be expert in an area of scholarship overlapping that of the faculty member. The candidate

for tenure and promotion will submit a list of qualified reviewers to the Chair. Candidates are encouraged to submit potential reviewers from primarily undergraduate institutions as well as research intensive institutions. Candidates may also submit a list of unacceptable reviewers. The Chair may solicit additional names of qualified reviewers from colleagues within the sub-discipline. From this pool of potential reviewers, the Chair will select three reviewers, with the exclusion of the reviewers whom the candidate considered unacceptable. The Chair will provide to the external reviewers a scholarship summary statement prepared by the candidate of their tenure and promotion dossier. In addition, the Chair will outline for the external reviewers WWU's teaching, scholarship and service expectations and how these compare to research-intensive universities. This letter will outline some details about the faculty member's teaching load and other instructional responsibilities, as well as a record of their service, to aid the reviewer in evaluating the faculty member's scholarship activities.

2. A minimum of one week before the discussion of the candidate, faculty members participating in the review process evaluate the external letters and all the materials provided by the candidate, complete the evaluation form, and turn it in to the Chair.

3. The Chair tallies the numerical results of the evaluation forms and prepares a draft of the departmental summary evaluation of the candidate based on the narrative section of the completed peer evaluation forms.

4. The Chair prepares their personal recommendation of the candidate.

5. Participating faculty conduct a discussion of the materials and qualifications of the candidate as well as the Chair's draft summary evaluation.

6. The Chair prepares the final departmental summary evaluation of the candidate, including any changes to the draft that were approved during the faculty discussion of the candidate.

7. The Chair discusses the departmental summary evaluation with the candidate.

8. All candidate materials, external letters, departmental summary evaluation, and Chair's recommendation are forwarded to the dean.

Assistant Professor

Qualifications for appointment to probationary faculty:

A Ph.D. in Chemistry or related science field is required, and postdoctoral or equivalent industrial experience is highly desirable. The candidate will also show evidence of research and demonstrate the potential for substantial achievement in teaching, research and advancement of the college and department goals in equity and inclusion.

Conditions for annual reappointment:

The chair will draft an annual evaluation letter, informed by reviews from the tenured faculty, of each tenure track faculty member. These letters shall be used to guide and assist the candidate in preparing the materials for tenure and promotion.

Associate Professor

For appointment or promotion to the rank of associate professor, a candidate must be judged to be an effective teacher in courses that they have taught during the review period. In addition, substantial scholarly accomplishment is expected; this will generally take the form of peer-reviewed publications resulting from work undertaken while a member of the faculty of Western Washington University and pursuit of resources to support an independent and sustainable research program. The candidate must also demonstrate engagement in service.

Department standards for tenure and promotion to Associate Professor:

Teaching

Evidence of effective teaching or improvement towards that goal includes:

- A minimum average of one peer evaluation by faculty members per year for the range of courses taught by the faculty member being evaluated, which will be assigned by either the Department Chair or the Chemistry Department Assessment Committee. Peer evaluations should be from multiple tenured faculty members. Candidates may request that the evaluation is based on multiple class sessions and may recommend peer evaluators to include or exclude.

- Evidence of efforts toward facilitating student learning and inclusive teaching practices. This should include statement of learning goals/objectives for each class, self-assessment of achievement of those goals, and may include examples of student products.

- Student evaluations from the WWU Office of Institutional Effectiveness or other assessment tool approved by the Chemistry Department Assessment Committee (both numerical and narrative responses are required) for all courses taught during the evaluation period (subject to exceptions outlined in memoranda of

understanding (MOU) between the UFWW and WWU). Alternative assessment tools must be submitted to the Assessment Committee one month prior to its intended use. The department recognizes the risks inherent in curricular development and innovations as well as the subjective nature of student evaluations for instructors based on identity.

- Syllabi and selected course materials (for example: exams, developed lab exercises, student-centered exercises, study materials, etc.) for each course taught during the evaluation period, except for chemistry labs for which the instructor is not the instructor of record.

Scholarship

Evidence of substantial achievement in scholarship includes a combination of:

- Peer-reviewed publications in non-predatory scientific or education journals with student co-authors based on work performed at WWU. The scope, number and contributions by the candidate will all factor into evaluation of the publication record.

    o Collaborative publications are encouraged. Individual contributions to collaborative publications should be clearly explained in the dossier.

- Establishment of an active, sustainable research program involving undergraduate students. Sustainable research programs are most often supported by external grants. Pursuit of grants commensurate with the size and scope of a candidate's research program is expected; securing external grants is encouraged. Other resources that support research productivity may also be considered in lieu of external grants, with examples such as 'in kind' support from companies in the form of equipment or funds dedicated to research-related activities, computational resource awards, or access to instrumentation awards (national laboratory facilities or other centralized instrumentation centers).

    o External grants receive more weight than internal grants
    o Research grants receive more weight than equipment grants
    o Collaborative grants are encouraged. For disciplines that require collaborations for grants, these may serve as equivalent to independent grants. Individual contributions to collaborative grants should be clearly explained in the dossier.

- External review letters from experts in the respective field of study that address the candidate's contributions to the field (solicited by the department with input from the candidate).

Evidence of substantial achievement in scholarship may be augmented by some combination of:

- Evidence of ongoing research in the form of reviewed grant proposals

- Mentorship of undergraduate honors and/or graduate student thesis projects

- Publications in discipline-specific preprint servers (such as bioRxiv or chemRxiv) or conference proceedings

- Internally funded grants, including the mentorship of student-led fellowship and/or scholarship applications and awards of support for research-related activities

- Publication of software, review articles, patents, textbooks and instructional materials

- External faculty fellowships (for example, at a national laboratory or research center)

- Ongoing research involving undergraduates and/or graduate students resulting in oral or poster presentations at internal and/or external meetings

- Collaborative scholarly efforts that support research aims of the broader community

Service

Evidence of effective service contribution includes some combination of:

- Basic departmental service is expected, including regular attendance at and contribution to department meetings, committees, activities, and events.

- The Chemistry Department values service to college-wide or university-wide committees, including the UFWW.

- Advising of students is expected after the second year of appointment.

- Supporting the professional development of students is expected, which may include writing letters of recommendation and participating in student-focused panels and workshops.

- Some additional service to profession and/or community is encouraged and may include, but is not limited to, reviewing manuscripts, books, or grant proposals;

convening topical sessions at regional or national conferences; assuming leadership in regional or national organizations; being active in regional recruitment, mentoring, and community outreach.

Full Professor

Promotion to the rank of professor is recognition that the candidate has demonstrated substantive impact within the academic community. The candidate must provide evidence of excellence in teaching and sustained, productive scholarship. Increased contributions with a leadership emphasis in the area of service to the university and the department are expected as well.

Teaching

Department standards for promotion to Full Professor include the criteria listed under promotion to Associate Professor (except for peer teaching evaluations), plus significant new curricular development and/or demonstrated investment in improving established courses. For peer teaching evaluations, promotion to full professor requires evaluations from multiple tenured faculty members that are representative of the candidate's teaching repertoire. Peer teaching evaluations may be solicited by the candidate or assigned by the Department Chair or the Chemistry Department Assessment Committee at the candidate's request.

Scholarship

Department standards for promotion to Full Professor are the criteria listed under promotion to Associate Professor. The candidate should demonstrate sustained scholarly activity during the period of review.

Service

Department standards for promotion to Full Professor include the criteria listed under promotion to Associate Professor, plus some combination of the following:

- Increased service to the College and/or University, including the UFWW, as demonstrated by committee leadership and active participation in committee work

- Mentorship of probationary faculty and performing peer teaching evaluations

- Leadership in departmental activities and program development

- Leadership in the profession, including regional, national and international professional organizations

- Involvement in local outreach or community service related to faculty professional activities

Post Tenure Review

Post-tenure review is required every five years. Reviews for promotion, as described above, may substitute and resets the PTR timeline. Department standards will provide flexibility in the relative emphasis on teaching, scholarship, and service across the career life cycle of an individual faculty member.

Teaching

For a rating of "meets standards" in this category, evidence for sustained engagement in and attention to teaching must be included, as evidenced by:

- Multiple faculty peer evaluations representative of courses taught are required since the last evaluation. Peer teaching evaluations may be solicited by the candidate or assigned by the Department Chair or the Chemistry Department Assessment Committee.

- Evidence of efforts toward facilitating student learning and inclusive teaching practices, which should include statement of learning goals/objectives for each class and self-assessment of achievement of those goals.

- Student evaluations from the WWU Office of Institutional Effectiveness or other assessment tool approved by the Chemistry Department Assessment Committee (both numerical and narrative responses are required) for all courses taught since the last evaluation, except for general chemistry labs for which the instructor is not the instructor of record (subject to exceptions outlined in memoranda of understanding (MOU) between the UFWW and WWU). Alternative assessment tools must be submitted to the Assessment Committee one month prior to its intended use.

For a rating of "exceeds standards" in teaching, the candidate should demonstrate substantial initiative in curricular development and/or demonstrated investment in improving established courses.

Scholarship

For a rating of "meets standards" in this category, the candidate must demonstrate evidence of sustained scholarship during the five-year interval. Research mentorship of undergraduate and/or graduate student projects resulting in internal student presentations and/or honors or graduate thesis projects is expected. The candidate must also show evidence of scholarship in the form of faculty- and/or student-led external presentations, such as oral or poster presentations at regional, national and/or international scientific meetings.

For a rating of "exceeds standards" in this category, the candidate must demonstrate some combination of the following:

- Published peer-reviewed manuscripts, software, books, patents and review articles

- Funded research grant proposals

    o External grants receive more weight than internal grants
    o Research grants receive more weight than equipment grants
    o Collaborative grants are encouraged. For disciplines that require collaborations for grants, these may serve as equivalent to independent grants. Individual contributions to collaborative grants should be clearly explained in the dossier.

- Not funded research grant proposals (proposals considered for funding receive more weight than unscored or triaged proposals)

Service

For a rating "meets standards" in this category, evidence for continued engagement with colleagues in the University and beyond must be included, as evidenced by some combination of:

- Basic departmental service, including regular attendance at and contribution to department meetings, committees, activities, faculty mentoring, peer teaching evaluations, and events

- Service to college-wide or university-wide committees, including the UFWW

- Continued advising and supporting the professional development of students

- Some additional service to profession and/or community may include reviewing manuscripts, books, or grant proposals; convening topical sessions at regional or national conferences; assuming leadership in regional or national organizations; being active in regional recruitment, mentoring, and community outreach.

For a rating of "exceeds standards" in service, the candidate should demonstrate sustained, effective leadership in one or more service categories described above.

Evaluation of Faculty with Joint Appointments

It is expected that faculty who hold joint appointments in Chemistry and other WWU programs (e.g. SMATE, MACS, IES, AMSEC, etc.) will meet departmental standards for tenure, promotion, and general merit (post-tenure review) with these considerations:

- The Chemistry Department will review courses taught for both Chemistry and the jointly appointed program, with the exception of courses that are specific to that program and contain limited Chemistry content. These courses will be reviewed by the relevant program.

- Scholarship may be associated with the joint program. Such scholarship will be reviewed by the relevant program as well as by Chemistry.

- Service may be on behalf of the candidate's jointly appointed program. While it is recognized that service contributions will fluctuate between programs year-to-year, service to the Chemistry Department relative to the fraction of their appointment during the evaluation period is expected.

The Chair will request that the joint program director or chair provide a letter summarizing the program's evaluation of the candidate. This letter should be available to the tenured faculty prior to their evaluation.

Evaluation of Non-Tenure Track Faculty

INSTRUCTOR

Instructors will be reviewed annually on the basis of expectations defined in the letter of offer. For instructors with annual appointments, the department Chair, designee, or committee will provide the review.

SENIOR INSTRUCTOR

NTT faculty with a minimum of five years of experience at 0.5 FTE or greater at the University with satisfactory evaluations in each of those five years shall be appointed Senior Instructor effective the following September. Senior Instructor positions may include specific tasks or roles beyond teaching activities as outlined in their contract.

Performance in all such areas must be satisfactory. Senior Instructors will be evaluated during the final year of their contract.

Standards for NTT instructors with an annual FTE of 0.5 or greater are as follows. Expectations are proportional to the percent FTE of the faculty member.

Teaching

Evidence of effective teaching or improvement towards that goal includes all of the following:

- Peer evaluations by a tenured faculty member or an NTT senior instructor at a minimum of one per year for representative courses taught by the faculty member being evaluated, which will be assigned by either the Department Chair or the Chemistry Department Assessment Committee. The NTT instructor may request that the evaluation is based on multiple class sessions and may recommend peer evaluators to include or exclude. NTT instructors with a contract shorter than one full year will also be evaluated,

- Student evaluations from the WWU Office of Institutional Effectiveness or other assessment tool approved by the Chemistry Department Assessment Committee (both numerical and narrative responses are required) for all courses taught during the evaluation period (subject to exceptions outlined in memoranda of understanding (MOU) between the UFWW and WWU). Alternative assessment tools must be submitted to the Assessment Committee one month prior to its intended use. The department recognizes the risks inherent in curricular development and innovations as well as the subjective nature of student evaluations for instructors based on identity.

- Syllabi and selected course materials (for example: exams, developed lab exercises, student-centered exercises, study materials, etc.) representative of each different course taught during the evaluation period, except for chemistry labs for which the instructor is not the instructor of record. Evidence of efforts toward facilitating student learning and inclusive teaching practices should also include self-assessment of achievement of those goals and/or student products.

Service

Service efforts are not required for NTT faculty members, but encouraged in areas of critical need, unique expertise, and/or professional interest. Any service expectations are outlined in the NTT faculty member's contract. Evaluation of any service to the department will occur during the annual review. *Ad hoc* contributions on behalf of the department will also be evaluated.

Scholarship

NTT instructional faculty are not hired under the obligation to conduct research activities. Research and/or scholarly activity is encouraged for NTT instructional faculty, but not required unless specified in their contract. Any scholarly efforts that are supported and compensated by WWU will be evaluated during the annual review.

DEPARTMENT ADDENDUM – COMPUTER SCIENCE

Approved by the College of Science and Engineering Policy, Planning and Budget Council – last updates approved April 29, 2021

1.   Purpose

This document specifies the departmental procedures and standards in the evaluation of faculty in the Computer Science Department. These procedures and standards are supplemental to those specified in the College of Science and Engineering (CSE) College Operations and Evaluation Plan (COPEP), which is supplemental to the UFWW Collective Bargaining Agreement (CBA).

2.   Qualification for Appointment as Assistant Professor

A doctorate or equivalent degree in computer science or a closely related field is required. The candidate must demonstrate evidence of potential for excellence in teaching and productive scholarship and have professional goals and interests aligned with the wider instructional and professional objectives of the Computer Science Department.

3.   Faculty Participation in Reviews

During a probationary faculty member's first year, the chair alone performs the review. The chair may visit classes, review student evaluations and course materials, examine works of scholarship, and have discussions with departmental colleagues regarding the candidate. Subsequently, the chair and the candidate meet to discuss overall progress. Then the chair prepares a written evaluation and shares it with the candidate. In subsequent years, all tenured faculty must participate in all professional reviews of their tenured and tenure-track departmental colleagues. A faculty member is excused from participating if the review occurs during a quarter in which the faculty member is on approved leave; in that case the tenured faculty member may choose to participate if suitable arrangements can be made. Tenure-track (probationary) faculty and non-tenure-track faculty (Instructors and Senior Instructors) do not participate in any reviews or decisions regarding appointment, tenure, or promotion of tenured or tenure-track faculty, but may submit a letter of support at the request of the faculty member under review. Spouses and domestic partners, or other individuals with whom there is an extra-professional conflict of interest, may not participate in decisions that affect each other. The outcome of the annual review shall be a letter, written by the chair, which summarizes the tenured faculty feedback. Regarding the review of non-tenure-track faculty, the chair will select members of the department to participate in these reviews.

4.   Overall Review Principles and Guidelines

In all aspects of performance and at all levels of professional standing, faculty members are expected to interact in a constructive and cooperative manner with

students, fellow faculty, staff members, and the departmental and college leadership regarding all professional matters, and to behave in accordance with relevant professional ethical standards.

It is important that faculty being reviewed provide explicit evidence of accomplishments in teaching, research and service. Failure to supply explicit evidence will have a negative impact on the review process. On a similar note, creating the dossier in such a way as to make it easy to navigate is highly desirable, which allows the reviewers to conduct the review in a timely manner.

The faculty performing a review will fully consider the materials presented by the candidate in the dossier, in the context of guidelines described in the following sections.

5.   **Review Process for Probationary and Tenured Faculty**

The faculty undergoing review must prepare a dossier and share it with department faculty by the announced date. The dossier must include evidence of achievement in each of the required teaching, scholarship, and service categories. In addition, the dossier must include all documents that are required per CSE rules (see the CSE COPEP), as well as any available evaluation letters from any academic unit in which the candidate has a joint appointment.

The tenured faculty will conduct teaching observations of classroom lectures, and complete the CSE's Observation of Teaching forms, which will be given to the candidate for inclusion in their dossier.
Each tenured faculty member participating in the review shall present their review of the candidate to the department chair on the designated CSE faculty evaluation form by the announced date.

For probationary faculty, the *review period* refers to the time since the most recent probationary review or since joining Western Washington University, if no previous review. However, the evidence should be cumulative, and encompass all past review periods, making it clear which materials are new to the review period. For Tenure and Promotion to Associate, the *review period* encompasses all years since joining the faculty. For Post Tenure Review, *review period* refers to the time since the most recent successful Post Tenure Review or Tenure and Promotion.

The department chair shall prepare a summary of the evaluations provided by the reviewing faculty. The chair will meet with the tenured faculty of the department to review a draft of the letter. This meeting will be purely informational, and no vote will be taken. The chair may revise the letter based on feedback from the tenured faculty, which will then be shared with the candidate and the tenured faculty. The candidate shall be permitted five working days to review the letter and submit a response to the chair correcting any factual errors.

Evidence of scholarship, teaching and service

The following lists enumerate teaching, scholarship, and service activities that are referred to in subsequent sections. These lists are non-exhaustive and are being provided to offer examples of evidence that a candidate might include as part of their dossier. Whenever possible, a dossier must provide documents in support of this evidence; for example, copies of manuscripts or grant proposals accepted, rejected, or in review. A dossier should also include relevant context for understanding the significance of this evidence; for example, by citing acceptance rates, if available, for publication venues.

Teaching

- **Teaching Reflection.** Thoughtful reflections on one's approach to teaching. This document must include a list of the courses taught and a discussion of the teaching activities that were employed, and a reflection on those activities. As described in subsequent sections in this document, for various types of review the reflection may also need to include the following content, although candidates may organize the content however they feel most effective:
    - **Course Improvement.** Proposals for potential improvements for at least two courses taught during the review period. At least one of these courses must be a required course from one of the department's degree programs. This proposal should be a product of self-reflection by the candidate, in consideration of the level of student achievement of course outcomes, and addressing any substantive comments made in the chair's summary of the formative peer evaluations and faculty observation of teaching forms. For example, a proposal for improving a course might include improvements to course content, assessment items, and/or mode of delivery.
    - **Diversity & Inclusion.** A description of the candidate's work to incorporate activities that contribute to and advance Diversity, Equity, and Inclusion (DEI) efforts through teaching.
    - **Student-Centered Learning and Risks Taken.** If you have used any student-centered learning techniques, or have taken any risks in your teaching in pursuit of excellence, please describe them. Your reflection should provide the context needed for any active-learning activities and other pedagogical techniques to be understood by the reviewers. We value student-centered teaching practices and recognize that excellence in teaching often involves taking risks.
    - **Teaching Goals**. A statement of teaching goals.
    - **Teaching Accomplishments.** A self-assessment of teaching accomplishments, if not already addressed in other required components.
    - **Course Outcomes Reflection.** A self-assessment of the extent to which course outcomes were met for each course taught in the

review period. The candidate may include a statement about each instance of a class taught, or a single statement for each course.

- ○ **Course Content Maintenance**. Evidence to show the candidate is engaged in keeping courses and/or the curriculum up to date (e.g. dissemination to, and use by, other faculty of the candidate's course materials, updates to course topics and materials, contribution to curriculum development, participation in education-focused conferences or workshops, advising students conducting independent study).
- **Student Evaluations.** Student evaluations, including both numerical ratings and student comments, for all courses taught in the review period (unless unusual circumstances exist, which should be explained in the reflection). Comments on student evaluations should be generally positive, although negative comments in response to risks taken in pursuit of teaching excellence will not be counted against the candidate. Student testimonials or statements of support may also be included.
- **Teaching Honors and Awards.**
- **Peer Observation of Teaching.** All CSE faculty observations of teaching forms received, which should number at least two and include at least some observations of required courses from one of the department's degree programs. If submission of peer observation of teaching forms is not possible, those circumstances must be explained.
- **Course Materials.** Syllabi and course materials for each quarter of all courses taught during the review period. The syllabi must include department approved course outcomes. Not all assessment items need be included, but the included items must total at least 75% of the graded coursework for the course. A sampling of additional materials can also be included. Additionally, for each course taught, the candidate must list which coursework items are used to assess each course outcome. Cumulatively, assessment items should be rigorous and aligned with student learning outcomes.

Scholarship

- **Publications.** Publication of original research in reputable peer reviewed journals, conference proceedings and workshop proceedings. To help the reviewers assess the value of a publication venue, candidates may include rejection rates, impact factor, indexing, and details about sponsoring organizations. This is the primary form of scholarship and some evidence of this must be given for promotion to Associate Professor. Peer reviewed publications with student co-authors are particularly valued.
- **Research Mentorship.** Active research mentorship of WWU students.
- ○ Providing authentic research experiences to students, both undergraduate and graduate, is highly valued, particularly those resulting in peer-reviewed publications. Mentorship on research projects resulting in student presentations (including oral and

poster) is also valued, and demonstrates a commitment to the faculty-mentored student scholarship culture of the department.

- **Research Reflections.** Thoughtful reflections on one's approach to research. This must include a research plan. Research agendas should be plausible, and those that address and are adaptable to changing societal, community and student needs are particularly valued. Other suggested sections include discussions about development of one's research program, evolving approach to research mentorship, and promotion of diversity and inclusion through scholarship.
- **Research Honors and Awards.**
- **Presentations.** Presentations of one's work at academic conferences, workshops and professional meetings, whether presented by the faculty member or other co-authors.
    - Presentations at more prominent venues carry additional weight.
    - Invited presentations carry additional weight.
    - Other active participation (e.g., serving as a panelist) is also valued.
- **Funding.** Proposals for funding.
    - Proposals for external funding carry more weight than proposals for internal funding.
    - Funded proposals carry more weight than proposals in review or unfunded proposals. Support for faculty, students, travel and/or equipment is highly valued.
    - High quality, competitive proposals carry more weight than less competitive ones. Evidence of the competitiveness of an unfunded proposal could include the scores and reviews from the review process, but inclusion of these reviews is not strictly required.
- **Collaboration.** Strong, diverse and on-going research collaboration. Collaborations within the department, with other departments and with external researchers are all highly valued.
- **Citations.** Number of citations during the review period of publications, placed into the context of the norms of the sub-field.
- **Books and Book Chapters.** Publication of books or chapters of books by a recognized academic publisher or professional body.
- **Software Artifacts.** For artifacts released outside of the department we will consider evidence of merit including acceptance by the open source community, association with a publication, or a measure of high utility (e.g., web site hits, user reviews). For an artifact within the department we will evaluate merit by peer evaluation of the software based on its utility in coursework or research projects.

Service

- **Departmental Committees**. Constructive contributions to departmental faculty meetings and committees. Chairing is particularly valued.

- **College and University Committees**. Constructive contributions to college and university committees. Chairing is particularly valued.
- **Stewardship Responsibilities**. Constructive contributions to the on-going business of the university, examples of which would include: organizing and/or facilitating student workshops, support and mentorship of clubs, TA coordinating, course coordinating, coordinating visits and talks, promoting alumni engagement, fostering internship opportunities, etc. Certainly, this includes serving in key departmental roles such as Graduate Advisor, Transfer Advisor, and Department Chair, as well as other key roles in the university, including serving on the Faculty Senate, or as the UFWW steward.
- **Academic advising**. Advising students in matters of class schedule, progress toward degree, etc.
- **Service to the Profession**. Professional service, such as the review of manuscripts and grant proposals; chairing and organizing workshops, conferences or sessions therein; and participation in professional organizations.
- **Overloads**. Teaching courses above and beyond the agreed-upon course load set by the department chair, which contributes to the department's ability to offer required courses in the event that faculty schedules are altered.
- **Project Mentorship.** Advising senior capstone groups on software engineering projects whose focus is not within the scope of the candidate's research and not tallied in their teaching load.
- **Faculty Mentorship.** Mentoring WWU faculty colleagues.
- **Diversity & Inclusion**. Service contributions to the department's efforts to promote diversity and inclusion both within the department and in the discipline as a whole.
- **Relevant Community Service**. Community outreach that is related to the discipline.
- **Service Honors and Awards.**

6.   **Departmental Standards for Reappointment of Probationary Faculty**

The department shall perform an annual evaluation of probationary (tenure-track) faculty. The purpose of the annual review is to provide regular feedback to the candidate regarding their progress toward tenure and promotion.

In evaluating a candidate at the rank of Assistant Professor with a view toward eventual tenure and promotion to the rank of Associate Professor, evaluating faculty should regard the standards defined in Section 7 as the objectives to be achieved by the candidate. This evaluation should emphasize performance in the review period but can be informed by the candidate's accomplishments that precede the review period.

7.   **Departmental Standards for Tenure and Promotion to Associate Professor**

We expect both excellent teaching and productive scholarship. While some

service contributions are expected, service plays a substantially less significant role in faculty evaluations at this level than do teaching and scholarship. Scholarship plays a very significant role and a good publication record is expected, but excellence in scholarship does not replace the need for excellence in teaching. Conversely, excellence in teaching does not replace the need for a record of active and productive scholarship. It is recognized that the lines between teaching, scholarship and service may be uncertain and that scholarship may take a wide variety of different forms. The candidate must include a reflection on their role fostering and advancing equity, inclusion and diversity in at least one of these categories: Teaching, Scholarship, and Service. We refer readers to the CSE's DEI Matrix for guidance on these activities.

Teaching

Faculty will maintain appropriate levels of course content and academic and intellectual standards, and seek active involvement in other aspects of instruction such as the development of course content, innovation in means and mode of delivery, and overall curricular and program development. That is, we seek a clear commitment and contribution to excellent instruction in a wide sense.

The candidate will provide evidence of teaching excellence or improvement towards that goal by including in their dossier all the mentioned categories in Section 5, *Teaching,* excepting Teaching Honors and Awards, but including all components of Teaching Reflections. Discussions of **Course Improvement** and **Course Content Maintenance** are optional in the first few years of probationary review, but evidence of contributions to both of these categories is required for promotion to Associate Professor. The candidate may omit the Diversity & Inclusion subsection of the reflection if an analogous reflection is included in the scholarship or service materials.

Scholarship

The candidate is expected to present a record of productive scholarly, creative and professional activity, and of participation to the active scholarly life of the department, the university and the profession. Work completed prior to appointment at Western will contribute to such a record, but the record should include several works during the period of employment at Western. The candidate's scholarly contributions will be assessed in quantity and quality relative to their area of specialization, recognizing that different sub-disciplines have different norms. Probationary faculty are considered to be satisfactory if, referring to the categories of evidence of scholarship enumerated in Section 5, they demonstrate two or more significant items from **Publications**, an established record of **Research Mentorship**, evidence of a thoughtful approach to scholarship in the **Research Reflections**, and at least three additional items from any of the categories prior to coming up for tenure.

Service

Teaching and scholarship are generally weighed far more heavily than service in the tenure and promotion process unless specified in the letter of appointment.

But service as a good citizen of the department and the university and contributions to the day-to-day functioning of the department are required. Probationary faculty are considered to be highly satisfactory if, referring to the categories of evidence of service enumerated in Section 5, they demonstrate meaningful contributions to **Department Committees** and **Academic Advising**, and at least one additional item from the remaining categories.

8.   **Departmental Standards for Promotion to Professor**

We expect a record of continued success and sustained excellence in teaching and productive scholarship along with significant contributions to service in order to be promoted to Professor. Compared to the expectations for promotion to Associate Professor, continued scholarly productivity is of great importance and a record of significant contributions to service at a number of levels is expected. However, the Computer Science Department recognizes that careers at the senior level can be distinguished in several ways and for this reason standards for promotion to Full Professor are necessarily less precise than promotion from Assistant to Associate professor.

Recognizing the University's support of interdisciplinary and collaborative scholarship, candidates for full professor are encouraged to take advantage of the freedom afforded by tenure to pursue their scholarly interests whether they fall within or across traditional disciplinary boundaries. An associate professor may also have more opportunities for productive collaboration than a candidate for tenure, though it continues to be expected that the individual's contribution should be original and significant.

Number of years in rank is not part of the requirements for promotion to full professor. The timing is individual, and a dossier put forward for promotion sooner does not need to meet any enhanced standard. The assessment of a candidate comprises their entire career, taking into special account accomplishments since promotion to Associate Professor. Most associate professors can expect to submit their dossier for promotion to full professor no sooner than at the start of their fourth year as associate professor.

The candidate must include a reflection on their role fostering and advancing equity, inclusion and diversity in at least one of these categories: Teaching, Scholarship, and Service. We refer readers to the CSE's DEI Matrix for guidance on these activities.

Teaching

We expect evidence of continued success and sustained excellence in teaching, demonstrated in the same manner as the teaching expectations for promotion to Associate Professor. Evidence of teaching excellence must be demonstrated by addressing all elements in Section 5, *Teaching,* excepting Teaching Honors and Awards, but including all components of the Teaching Reflections. The candidate may omit the Diversity & Inclusion subsection of the reflection if an analogous reflection is included in the scholarship or service materials.

Scholarship

We expect evidence of continued productivity and sustained productivity in scholarship leading to a substantial body of work that includes several of the components listed under the scholarship expectations for tenure and promotion to Associate Professor and demonstrated in the same manner. Evidence that the scholarship is significant to the broader professional community (e.g. external grants, citations, invitations to conference panels or other universities) is particularly desirable. Ultimately, the Associate professor's full body of work at WWU, including accomplishments prior to promotion to Associate, will be considered. However, promotion to Full Professor requires additional, significant accomplishments. Associate professors are considered to be satisfactory if, referring to the categories of evidence of scholarship enumerated in Section 5, Scholarship, after promotion to Associate but prior to coming up for promotion to Full Professor they demonstrate two or more significant items from **Publications**, a continued record of **Research Mentorship, evidence of a thoughtful approach to research in the Research Reflections**, and at least three additional items from any of the categories.

Service

A candidate seeking promotion to professor must discuss and provide evidence demonstrating sustained contributions in the following categories described in Section 5, *Service*: Departmental Committees, College & University Committees, Stewardship Responsibilities, Academic Advising, and Service to the Profession. Ideally, chairing a committee is especially valued.

9.   **Departmental Standards for Post Tenure Review**

Review is required every five years in accordance with the UFWW Faculty Contract. Reviews for promotion may serve as a substitute. In accordance with the UFWW Faculty Contract, a candidate must meet or exceed departmental standards in teaching, scholarship, and service for a successful review.

Faculty will be evaluated on departmental standards for their rank, making allowance for fluctuations in the relative emphasis on teaching, scholarship, and service across the professional life cycle of the individual faculty member.

To either meet or exceed standards, the candidate must include a reflection on their role fostering and advancing equity, inclusion and diversity in at least one of these categories: Teaching, Scholarship, and Service. We refer readers to the CSE's DEI Matrix for guidance on these activities.

Teaching

To meet department standards in teaching, we require evidence of continued success and sustained excellence in teaching. Evidence of meeting department standards includes addressing the **Teaching Reflection**, **Student Evaluations**,

Course Materials, **Teaching Goals**, **Peer Observation of Teaching**, and the **Course Outcomes Reflection** items in Section 5, *Teaching*.

To exceed department standards in teaching, we require evidence of excellence beyond those enumerated above to meet department standards, including evidence from the **Course Improvement, Teaching Accomplishments** and **Diversity & Inclusion** categories from Section 5, *Teaching*.

Scholarship

Expectations in this category may be reduced during the later years of an individual faculty member's professional life cycle, if there is commensurate growth in contributions to teaching and service.

To meet department standards, we expect evidence of continued engagement in research during the five-year interval, as evidenced by one significant item or multiple minor items from any of the categories of evidence enumerated in Section 5, *Scholarship*.

To exceed department standards, among the categories of evidence enumerated in Section 5, *Scholarship*, two significant items from the following categories during the five year review period are required: **Publications**, **Research Mentorship**, **Research Honors and Awards**, **Presentations**, **Funding**, **Collaboration**, **Books and Book Chapters**, and **Software Artifacts**.

Service

To meet department standards, the candidate must demonstrate leadership on a department committee at least once during any single 5-year period or be a member of a college or university committee, in addition to serving as a member of one or more department committees. The candidate must continue to perform academic advising duties.
To exceed department standards, in addition to meeting department standards, the candidate must demonstrate a leadership role for at minimum one additional item identified in Section 5, *Service*.

10. **Review of Non-Tenure-Track Faculty**

Reviews will be performed annually for Instructors and every three years for Senior Instructors in accordance with the policies and procedures of the UFWW Contract and the CSE College Operations and Evaluation Plan (COPEP). Those aspects of professional performance that are directly related to the duties specified in the offer letter – which are primarily instructional duties in most cases – are the focus of the review. However, other contributions beyond those specified will be welcomed and acknowledged.

For non-tenure-track faculty with annual appointments less than 0.5 FTE, the department chair or designee will provide the review. For instructors with annual appointments of 0.5 FTE or greater, an annual review by selected members of the department will take place. The members participating in the review are

chosen by the chair or designee.

Teaching

To facilitate improvement of a candidate's teaching, the selected faculty will review student evaluations, review class materials, visit classes, perform formative peer evaluations using the department approved teaching observation form and report to the chair. The chair will summarize the results and supply a summary to the candidate.

Scholarship

Non-tenure-track faculty may engage in scholarship and research, but this will play no role in the evaluation process unless it is specified in the letter of appointment.

Service

Service beyond that immediately associated with instructional duties is not required unless specified in the letter of appointment.

Other Duties

Instructor positions may include other specific tasks or roles as outlined in the letter of appointment. Performance in these areas must be satisfactory.

DEPARTMENT ADDENDUM – ENGINEERING & DESIGN

This document outlines the standards for the Engineering & Design Department's expectations and processes for faculty appointments, promotions, and reviews. All standards described in this document are supplementary to those described in the College of Science and Engineering's COPEP, the University Mission, the UFWW faculty contract, and program accreditation standards.

Adopted by the Engineering & Design Department on March 12, 2009. Updated November 19, 2014, May 23, 2018, October 31, 2018, February 20, 2019, May 12, 2021, and October 27, 2021.

PREAMBLE

Members of the faculty are expected to work to support the Engineering & Design Department Mission (https://cse.wwu.edu/engineeringdesign/assessment-and-accreditation). Faculty members must meet ABET-EAC, Criterion 6. (http://www.abet.org/) standards or NASAD for Degree-Granting Institutions, Standard II E. (http://nasad.arts-accredit.org/) as is appropriate for their areas of teaching and research.

THE REVIEW PROCESS

Consistent with the CBA and COPEP, all tenured members of the faculty are required to participate in the review process, including rating the candidate's accomplishments in each of the three categories of teaching, scholarship, and service, as well as providing a letter that justifies the rating given. As the Engineering & Design Department is comprised of independent and nearly-independent programs spanning diverse subject areas, tenured members of the faculty from programs other than the candidate's (non-program faculty members) may not be able to fairly and thoroughly assess all material in a candidate's dossier.

Reviewers are expected to evaluate candidates with a uniform expectation of quality but with effort and evidence quantity commensurate with the candidate's contract during the review period.

In their review letters, non-program faculty members must clearly delineate what, if any, materials in a candidate's dossier were not assessed because reviewers did not believe themselves to be qualified to fairly and thoroughly assess them. For cases involving the annual review of probationary faculty, promotion to Associate or Full Professor, tenure, and PTR, the tenured members of the program faculty shall meet collectively with the Chair to confidentially discuss the materials in the candidate's dossier in order to clarify the match between materials in the dossier and the standards in this addendum. Non-program faculty members may attend this meeting to clarify specific items in the candidate's materials.

TEACHING

Teaching is the primary way that faculty fulfill the Engineering and Design Department Mission of developing industry-ready graduates through a combination of creative problem-solving, analytical skills development, and experiential learning. This includes an emphasis on continuous improvement, incorporating current industry practices, using evidence-based learning approaches, and developing and maintaining hands-on laboratory experiences.

Substantial achievement in teaching is expected for all candidates. Candidates under any type of review must demonstrate that they are:
- Assessing and evaluating student learning and working to meet course and program outcomes,
- Engaging in continuous improvement,
- Using evidence-based learning approaches,
- Developing and maintaining relevant, hands-on experiences for courses with laboratories,
- Maintaining technical currency and incorporating current industry practices to the degree which equipment and budgets allow, and
- Developing and maintaining learning environments that are equitable and inclusive of students with diverse social identities and backgrounds.

Evidence of substantial achievement in teaching or improvement towards that goal (recognizing risks that may be taken for curriculum development) includes the following required elements:
1. A teaching statement and self-assessment of teaching achievements during the evaluation period that includes reflection on students' learning relative to course learning outcomes. Items must be consistent with documented course specifications and show an appropriate level of rigor. Candidates may include supporting materials beyond those that are required in item 3 below.
2. All peer evaluations received during the review period.
3. Syllabi for every class taught and sufficient course materials for the last offering of a course taught during the review period to demonstrate that the course was taught at the appropriate level with sufficient rigor and met the requirements listed above. Course materials may be provided by providing additional access to course sites to all reviewers.
4. All student evaluations for lecture and laboratory classes during the evaluation period with summaries that include ratings cover sheets and comment sheets.

SCHOLARSHIP

The Engineering and Design department expects active, sustainable, and discipline relevant scholarship, and values both technical and pedagogical research and the meaningful involvement of undergraduates. The results of such a scholarship program are expected to lead to externally/peer-reviewed works, such as:
- Peer reviewed journal publications
- Peer reviewed scholarly work in conference proceedings at a national or international level for professional societies or organizations
- Externally funded projects/grants

- Issued Patents
- Books or book chapters within the discipline
- Faculty fellowships (e.g. at national laboratories)
- Submission of major grant proposals as PI, even if the proposals are not funded
- For Industrial Design only – invited/juried gallery shows and multimedia productions

Evaluation of scholarship will be based upon the quantity of work, the quality of the work, the degree of contribution to team efforts, and the degree to which the body of work indicates that the scholarship program is active, sustainable, and discipline-relevant.

A scholarship portfolio may be strengthened by supplemental works that demonstrate works towards building and maintaining sustainable, discipline-relevant scholarship such as funded internal grant proposals, unfunded external grant proposals (except as noted above), and non-peer reviewed presentations at regional or national professional meetings.

SERVICE

Faculty members in the Engineering & Design Department are expected to actively participate in the development, management, and continuous improvement of programs and policies for academic programs, the department, and the University. Service to the profession and, when related to one's area of expertise, the community also count as service activities.

Evaluation of service will be based on the amount of involvement and degree of contribution.

Required Service activities:
- Service within the program, including:
  - Student advisement
  - Service for accreditation
  - Attendance at and participation in meetings
- Department committee participation
- College, interdisciplinary program, or university committee participation

Examples of service activities that enhance the service portfolio include, but are not limited to:
- Mentoring tenure track and non-tenure track faculty
- Service to the profession: examples include serving as a guest journal editor, a special session organizer or a moderator for professional society conferences, a paper reviewer for a professional organization, as an officer in professional societies, or as a faculty advisor for a student chapter of a professional organization
- Assisting with university events
- Curricular development at the program level
- Public presentations and community projects
- K-12 and community outreach

- Development of program or departmental marketing and outreach materials/websites.
- Participation in university interdisciplinary programs
- Efforts to arrange resources for the Department, such as arranging gifts in kind or working with the Western Foundation, and/or opportunities for students, such as arranging internships
- Membership on a thesis committee

Service activities displaying leadership include, but are not limited to:
- Department Chair
- Program Director
- Organizing a professional conference, conference section, or conference session
- Peer review for government agencies such as NSF, DOE, or DOD
- Program evaluator for accreditation of academic programs
- Chairing college or university committees or professional bodies external to the University
- Member of a working group that has a significant impact and leadership role in the field
- Development of interdisciplinary programs
- Regular journal editor

ASSISTANT PROFESSOR

Qualifications and expectations for appointment to probationary faculty:

Engineering and Industrial Technology Faculty
- An earned PhD in engineering or a closely related discipline, received from an accredited institution, or
- An earned MS degree in engineering or a closely related discipline, and significant, recent, and relevant industry-based professional experience.

Industrial Design Faculty
- An earned MID, MS, or MFA degree in industrial design or a related field is required

ASSOCIATE PROFESSOR

Teaching

Faculty members at the Assistant Professor level are expected to establish themselves as effective teachers. For tenure and promotion to Associate Professor, candidates must demonstrate that they are meeting expectations in teaching as stated above.

Scholarship

Faculty members at the Assistant Professor level are expected to develop sustainable programs of discipline-relevant scholarship. For tenure and promotion to Associate Professor, candidates must present a body of work that indicates that their scholarship program is active, sustainable, and discipline-relevant.

Service

Faculty members at the Assistant Professor level must show development of service activities over time and build to the level of participation in all required service activities by time of application for tenure and promotion to Associate Professor. The application can be strengthened with the addition of other relevant service activities. Participation in service activities displaying leadership is not expected during a faculty member's probationary period, though it will count and be valued in situations where it does occur.

FULL PROFESSOR

Candidates applying for promotion to Professor who have been on sabbatical since their last review shall include a copy of their sabbatical report in the relevant section of their dossier.

Teaching

For promotion to Professor, candidates must demonstrate that they have consistently and continue to meet expectations in teaching as stated above, and provide evidence of significant curriculum development.

Scholarship

For promotion to Professor, candidates must present a body of work that indicates an active, sustained, and discipline-relevant program of scholarship since promotion to Associate Professor and tenure.

Service

For promotion to Professor, candidates must participate in service activities that display leadership and have made significant contributions through service activities.

POST TENURE REVIEW

It is expected that there will be fluctuations in the relative emphasis on teaching, scholarship, and service across the career of an individual faculty member, so candidates for PTR should be assessed holistically over the review period rather than against rigid expectations in each of the categories.

Similar to the procedures for probationary and promotion reviews, the Chair shall share and discuss a copy of the draft letter with the tenured members of the faculty before the draft letter goes to the candidate. The chair may revise the letter based on feedback from the tenured members of the faculty.

Candidates who have been on sabbatical since their last review shall include a copy of their sabbatical report in the relevant section of their dossier.

Teaching

To meet department standards, candidates must demonstrate that they are continuing to meet the teaching expectations stated above. To exceed department standards, candidates must demonstrate that they are continuing to meet the teaching expectations stated above and must also provide evidence of significant curriculum development.

Scholarship

To meet department standards, candidates must present evidence that indicates continued involvement in discipline-relevant scholarship. To exceed department standards, candidates must present a body of work that indicates an active and sustained program of discipline-relevant scholarship during the review period.

Service

For faculty members to meet department standards, candidates must participate constructively in the required service activities. To exceed department standards, candidates must participate in service activities that display leadership and have made significant contributions through service activities.

DEPARTMENT ADDENDUM – GEOLOGY

Approved by the College of Science and Engineering Policy, Planning and Budget Council

Revised and adopted by the Geology Department on April 2, 2019.
This document outlines Geology Department expectations supplemental to those presented in the College of Science and Engineering Operating Procedures and Evaluation Plan (COPEP) for faculty appointments, promotions, and review.

Participation by Faculty in the Review Process
All tenured faculty are expected to participate in the review of their Geology Department colleagues. A faculty member may be excused from participation if the review is to occur during a quarter in which the faculty member is on leave. Leave status does not preclude participation, but advance arrangements must be made if the faculty member is away from campus. Probationary (tenure-track) and limited term faculty do not vote. However, they are invited to provide comments. Spouses may not participate in decisions that affect each other's appointment, promotion, and/or salary.

ASSISTANT PROFESSOR
Qualifications for appointment to probationary faculty:

A Ph.D. in geological sciences or related science/engineering field is required. The candidate will also show evidence of excellence in teaching and research.

ASSOCIATE PROFESSOR
Department standards for tenure and promotion:

Teaching
Evidence of teaching excellence or improvement towards that goal (recognizing risks that may be taken for curriculum development) as demonstrated by:

- A teaching reflection that includes a statement of teaching goals for each course taught with self-assessment of teaching accomplishments and whether course outcomes have been met. This should include responses to student assessment data and any course improvements and/or curricular changes. It should also include any evidence for the use of active learning and other inclusive teaching methods
- Syllabi and examples of course materials used to assess student learning for each course taught, such as exams, problem sets, pre- and post-test scores, and/or evidence of student work (with written permission of the student)
- Student evaluations of teaching that show evidence of teaching effectiveness. This should include course evaluations for every class taught, and any omissions should be explained.
- Participation in faculty development to improve teaching or curriculum (optional but encouraged).
- Faculty peer evaluations (not required, but strongly encouraged)

Research
- Evidence for excellence in research as demonstrated by:

1. Publications that are peer-reviewed, first-authored or student-authored and published in national or international journals that present the results of work performed while at WWU. Manuscripts that have been accepted or published are considered with more weight than those in revision, which are considered with more weight than those that have been submitted. For work begun at another institution, explain what portion of the work was performed at WWU.
     a. Multiple peer-reviewed publications in which you are junior author may compensate for a first-authored publication. The candidate should specify her/his percentage contribution to the manuscript.
     b. Multiple publications in non-peer-reviewed journals, conference proceedings, or extended conference abstracts may compensate for a peer-reviewed publication.
     c. Significant efforts towards setting up departmental research facilities and development of research software, techniques, and methodologies for broader scientific application may also compensate for a peer-reviewed publication.
     d. Authorship or contributions to textbooks or validated and publicly distributed software may compensate for a peer-reviewed publication.
2. Ongoing research in the form of published abstracts.
3. Proposals for research grants. Funded grants carry more weight than unfunded grants, and external proposals carry more weight than internal proposals.
4. Outside review letters. The candidate will submit the names of five or more potential reviewers to the chair, who will obtain three letters. Only one reviewer may be a close collaborator.
5. Other evidence that your research is important to the larger community such as science citation index.
- Evidence that the candidate is fostering student research as demonstrated by:

     1. Active advisement of graduate and/or undergraduate students.
     2. One or more completed theses of advised graduate students.
     3. Some of the following: published results of student theses, presentations by students at regional, national, or international meetings, awards to students, and/or research grants awarded to students.

Service
- Basic departmental service is required: attendance at and constructive contribution to faculty meetings and to departmental program development, and service on departmental committees. This also includes proper upkeep and maintenance of individual research facilities and lab space and continued participation in classroom and laboratory safety procedures. Some additional Geology-related service to profession, University, College, and/or community is required. Service on graduate student thesis committees is expected.
- Professional service may include, but is not limited to, reviewing manuscripts, books, grants, convening topical sessions at regional or national conferences, leadership roles in regional or national organizations, etc.
- University and college service may include, but is not limited to, service on

university or college level committees, presentations to the university community, etc.
- Community service may include, but is not limited to, public presentations, participation in scientific outreach, scientific engagement via social media, etc.

FULL PROFESSOR
Department standards for promotion to Full Professor

Teaching
Evidence of teaching excellence as demonstrated by:
- A teaching reflection that includes a statement of teaching goals for each course taught with self-assessment of teaching accomplishments and whether course outcomes have been met. This should include responses to student assessment data and any course improvements and/or curricular changes. It should also include any evidence for the use of active learning and other inclusive teaching methods
- Syllabi and examples of course materials used to assess student learning for each course taught, such as exams, problem sets, pre- and post-test scores, and/or evidence of student work (with written permission of the student)
- Student evaluations of teaching that show evidence of teaching effectiveness. This should include student course evaluations, including comments, for every class taught since the last promotion, and any omissions should be explained.
- Participation in faculty development to improve teaching or curriculum is encouraged.
- Faculty peer evaluations (not required, but strongly encouraged)

Research
- Evidence for sustained excellence in research as demonstrated by:
  1. A substantial body of work that may include the following:
     a. Regular publication in national or international journals.
        i. Peer reviewed senior authored (or second author on student-senior-authored) manuscripts that have been accepted or published are considered with more weight than those in revision, which are considered with more weight than those that have only been submitted.
        ii. Multiple peer-reviewed publications in which you are junior author may compensate for a first-authored publication. The candidate should specify his/her percentage contribution to the manuscript.
        iii. Multiple publications in non-peer-reviewed journals, or those in local journals, may compensate for a peer-reviewed publication.
     b. A research book, textbook, popular publication, or validated and publicly distributed software, which can significantly contribute to this body of work.
     c. Technical reports, which can significantly add to the body of work if they represent original research.
  2. Ongoing research in the form of published abstracts.
  3. Proposals for research grants. Funded grants carry more weight than

unfunded grants, and external proposals carry more weight than internal proposals.

4. Significant contribution to departmental research infrastructure.
5. Outside review letters. The candidate will submit the names of potential reviewers to the chair, who will obtain three letters. Only one reviewer may be a close collaborator.
6. Other evidence that your research is important to the larger community such as science citation index, invited talks at national/international conferences, and guest lectures at other universities.

- Evidence that the candidate is fostering student research as demonstrated by:

7. Active advisement of graduate students, and/or undergraduate students.
8. Completed theses of graduate students advised since last promotion.
9. Some of the following: published results of student theses, presentations by students at regional or national meetings, awards to students, and/or research grants awarded to students.

Service
Promotion to Full Professor requires excellence in departmental service activities (outlined under Associate Professor section above) as well as some combination of the following:

- Substantial service to the College and/or University typically demonstrated by active committee membership.
- Substantial service with professional organizations at the national, regional, or local levels is desired, and can compensate for some (but not all) College/University-level service. This includes editorial positions for academic journals.
- Substantial involvement in local outreach or community service related to faculty professional activities. Such involvement, while not required, may be given weight in this category.
- Efforts to broaden participation and improve equality of opportunity for underrepresented groups in the geosciences, which may include diversity workshops, trainings, and direct research mentorship of minorities, and outreach programs.

Post-Tenure Review

Review is required by the Faculty Contract every five years after promotion. Reviews for promotion, as described above, may substitute. The faculty member's performance shall be determined as having exceeded department standards, having met department standards, or not having met department standards in the areas of teaching, scholarship, and service.

Teaching
To meet department standards in teaching, we require evidence for sustained engagement in and attention to teaching. These materials will be used to judge the quality of teaching:
- A teaching reflection that includes a statement of goals and self-assessment of

accomplishments for each course taught since the last review. This should include reflection on whether course outcomes have been met.
- Syllabi and examples of course materials used to assess student learning for each course taught, such as exams, problem sets, pre- and post-test scores, and/or evidence of student work (with written permission of the student)
- Participation in departmental curricular review/revision efforts
- Student evaluations of teaching that show evidence of teaching effectiveness. This should include student course evaluations, including comments, for every class taught since the last promotion or post-tenure review, and any omissions should be explained.

To exceed department standards in teaching, we require evidence for excellence in teaching. Excellence can be measured by some of the following:
- Clear self-assessment and response to student assessment data, with resulting course improvements and/or curricular changes
- Development of new courses and revision of existing courses
- Participation in teaching workshops and continued training in pedagogy
- Evidence for incorporating student-centered approaches in the classroom
- Evidence for fostering an inclusive classroom environment
- Other evidence of teaching excellence derived from:
    a. Student teaching evaluations
    b. Peer evaluations of teaching
    c. Letters from alumni

Research
To meet department standards in this category, we expect evidence for continued engagement in research including some combination of:

- At least one published manuscript or comprehensive professional report
- At least two presentations at national or regional conferences
- Attempts to secure extramural funding
- Successful mentorship of graduate and/or undergraduate student research in the form of completed theses and/or thesis committee membership

To exceed departmental standards in this category, evidence should include several of the following:
- A body of scholarly work that may include:
    a. Publications in national or international journals
    b. A research book, textbook, or research-based publication for the broader public
    c. Technical reports, if they represent original research
    d. Validated and publicly distributed software
- Ongoing research in the form of published abstracts
- Funded research proposals.
- Significant contribution to departmental research infrastructure
- Other evidence that your research is important to the larger community such as science citation index, invited talks at national/international conferences, and guest lectures at other universities, popular media representation of your research, etc.
- Successful mentorship of graduate and/or undergraduate student research in

the form of published results of student theses, presentations by students at regional or national meetings, awards to students, and/or research grants awarded to students

Service

To meet departmental standards in this category, we expect evidence for continued engagement with colleagues in the University and beyond, including:

- Continued participation in departmental activities, including attendance at faculty meetings and presentations within the department
- College or University service demonstrated by committee membership
- Proper upkeep and maintenance of individual research facilities and lab space. This includes the pertinent safety protocols, training research students, and communicating activities to other faculty and staff.
- Continued participation in classroom and laboratory safety procedures including department trainings, University/College level (e.g., sexual harassment training), and class safety measures (e.g., first aid training, CPR training for field camp instructors).
- Professional service such as manuscript or proposal review

To exceed departmental standards in this category, evidence should include the above plus any of the following:

- Substantial service to the College and/or University demonstrated by active committee membership and leadership.
- Substantial service with professional organizations at the national, regional, or local levels, and can compensate for some (but not all) College-/University-level service
- Substantial involvement in local outreach or community service related to faculty professional activities. Such involvement, while not required, may be given weight in this category.
- Significant efforts to broaden participation and promote equal opportunity for underrepresented groups in the geosciences.

INSTRUCTOR

The CBA specifies that Instructors shall be reviewed on the basis of expectations defined in this document and in the letter of offer. Instructors are reviewed annually; Senior Instructors are evaluated once during their period of appointment (not more than three years). The department chair or designee will provide the review for Instructors.

Expectations for faculty development and service activities are proportional to the fractional FTE and terms of appointment of the faculty member

Teaching

Evidence of teaching excellence or improvement towards that goal (recognizing risks that may be taken for curriculum development) as demonstrated by:

- A teaching reflection that includes a statement of goals and self-assessment of accomplishments for each course taught since the last review. This should include reflection on whether course outcomes have been met.
- Student evaluations of teaching that show evidence of teaching effectiveness.

This should include all student evaluations, including comments, for all courses taught during the review period, and any omissions should be explained.
- Syllabi and course materials used to assess student learning for each course taught.
- Participation in faculty development to improve teaching or curriculum (optional but encouraged).

Research
Limited term faculty are welcome to conduct research, but research is not required.

Service
Service is not required unless otherwise specified in the letter of offer. However, basic departmental engagement is welcome, such as attendance at department faculty meetings and contributions to academic program development.

Other

Instructor positions may include other specific tasks or roles outlined in the candidate's letter of offer. Performance in these areas must be satisfactory.

SENIOR INSTRUCTOR
An instructor who has taught a minimum of five separate academic years at 0.5 annual FTE or more at the University with satisfactory evaluations (criteria listed above) in each of those five years shall be appointed senior instructor effective the following September. The 0.5 annual FTE is based upon a nine-month appointment at the University and on the teaching of credit bearing and/or degree applicable courses. Appointment to Senior Instructor does not require additional duties without compensation beyond the senior instructor salary increase.

Evaluation of Senior Instructors

Senior Instructors are evaluated during a three-year appointment. A satisfactory review (see criteria above) results in the candidate being eligible for reappointment as Senior Instructor.

Evaluation of Faculty with Joint Appointment in SMATE
It is expected that faculty who hold joint appointments in Geology and in Science, Math, and Technology Education will meet departmental standards for tenure, promotion, and post tenure review, with these caveats:

- The Geology Department will review courses taught for both Geology and for SMATE, with the exception of courses that are exclusively teaching-methods courses and contain no Geology content. These courses will be reviewed by SMATE.
- The Chair will request the SMATE Director to provide a summary (for the Chair), representing an evaluation of the candidate by SMATE.
- We recognize geoscience education as a sub-discipline in geology. Thus, some or all research activities may be in the field of geoscience education. Research products may differ from those specified above, such as development of a nationally-distributed curriculum.

101

- We recognize that some or all extra-departmental service may be on behalf of SMATE or professional science education organizations. Basic service to the Geology Department is expected.

Evaluation of Faculty with Joint Appointment In AMSEC
Faculty hired into the Advanced Materials Science and Engineering Center will hold a split appointment between two science departments. It is expected that faculty who hold joint appointments in Geology and another AMSEC department will meet departmental standards for tenure, promotion, and post tenure review, with these caveats:

- The Geology Department will review courses taught for both Geology and for AMSEC, with the exception of courses that contain no Geology content. These courses will be reviewed by AMSEC.
- The Chair will request the AMSEC Director to provide a summary (for the Chair), representing an evaluation of the candidate by AMSEC.
- We recognize that some or all extra-departmental service may be on behalf of AMSEC. Basic service to the Geology Department is expected.

Timeline of Evaluation Procedures
This timeline applies only to promotions to Associate and Full Professor.

August 15: The chair will request letters from outside reviewers. The candidate will supply the chair with a CV and statement of research to include.

DEPARTMENT ADDENDUM – MATHEMATICS

Approved by the College of Science and Engineering Policy, Planning and Budget Council, February 19, 2009 – most recent updates approved Jan 20, 2022.

This document specifies the policies, procedures and expectations of the Department of Mathematics regarding faculty appointments, promotions and review. This document serves as a supplement to the College of Science and Engineering Unit Evaluation Plan; it does not replace or supersede any stipulations in the CSE Unit Evaluation Plan, the UFWW Faculty Contract or the Faculty Handbook.

Participation by Faculty in the Review Process

All tenured faculty are expected to participate in all professional reviews of their tenured and tenure-track departmental colleagues. A faculty member is excused from participation if the review occurs during a quarter in which the faculty member is on professional leave, but may choose to participate if suitable arrangements can be made.

Tenure-track (probationary) faculty and non-tenure-track faculty (Instructors and Senior Instructors) do not participate in any reviews or decisions regarding the reappointment, tenure or promotion of tenured or tenure-track faculty, but may submit a letter of support at the request of the faculty member under review.

ASSISTANT PROFESSOR
Qualifications for appointment as probationary faculty.

A doctorate or equivalent degree in mathematics, mathematics education, statistics or an appropriate closely related field is required, except in exceptional circumstances. The candidate must show evidence of potential or continued excellence in both teaching and research and have professional goals and interests aligned with the wider educational and professional objectives of the Department of Mathematics.

ASSOCIATE PROFESSOR
Departmental standards for tenure and promotion.

Faculty will be evaluated based on their teaching, scholarship and service. We expect, as a minimum, both excellent teaching and productive scholarship. It is recognized that there may be blurring of the lines between teaching, scholarship and service, and that scholarship may take a wide variety of forms. The totality of contributions across all three of these areas will determine the overall outcome of the evaluation. Any missing elements from the following prescriptions need to be explained and documented by the candidate.

All faculty members are expected to interact in a constructive and cooperative manner with students, fellow faculty and the departmental leadership in a way that promotes equity, inclusivity, and diversity. All faculty are required to behave in accordance with all the relevant professional ethical standards.

Teaching

The candidate must demonstrate a clear commitment to excellent teaching. Evidence of this begins with the candidate providing for review all of the following items:

1. Student teaching evaluations for all sections taught (except independent study courses). In an exceptional circumstance when an evaluation cannot be provided, the candidate must explain the reason for this.

2. A representative selection of course materials from each course taught. This should include syllabi, assignments, examinations, and other assessment materials from each course.

3. A written reflection and self-assessment of the candidate's past teaching and future teaching goals. It is recognized that instructional and curricular innovation, which are encouraged, carry risk and that such risks do not immediately result in success. Such experiences should be addressed here.

4. At least five evaluations by peers in the department, using the department's observation protocol. These observations need to be from three different academic years, or from each academic year since appointment, whichever is less.

Teaching excellence requires more than these items can encompass; further evidence is required. Such evidence can be demonstrated by items in the following non-exhaustive list.

1. Evidence of curricular or instructional innovation.

2. Supplemental course or instructional materials generated by the faculty (e.g., lecture notes, solutions, etc.).

3. Copies of student work (with student permission or with identifying material redacted).

4. Participation in professional development activities specifically related to teaching.

5. Student letters of support.

6. Archived online course content.

7. Materials generated by independent study courses, graduation with distinction projects, or graduate student projects.

8. Materials generated by undergraduate student research projects.

9. Distributions of final grades assigned.

Scholarship

Evidence of active and productive scholarship is required to be eligible for promotion to Associate Professor. Work completed prior to appointment at Western will contribute to such a record, but the record should include several substantial works completed and accepted for publication during the period of employment at Western. Both quality and quantity of publications will be assessed.

Scholarship consists, primarily, of original work published in reputable journals, following peer review. Generally speaking, journals in which work is published should be listed on a professional index (e.g. MathSciNet, etc.). In cases where the journal is not listed in such an index, the candidate should provide an explanation as to why the journal was chosen.

The following are considered in the assessment of scholarly activity:

1. Dissemination of scholarly work, through publication and public presentations at professional meetings. In the case of joint work, the candidate should indicate the extent of their contribution to the work.

2. As a guideline, a publication rate in reputable journals of two substantial single-authored papers in three years, or (for joint work) one paper per year to which the candidate has made a significant contribution, is regarded as being highly satisfactory.

3. Manuscripts under revision carry less weight than published articles, while submitted manuscripts carry considerably less weight.

4. Papers in particularly highly rated journals will carry enhanced weight.

5. Significant high-level involvement in service in a professional capacity to external professional bodies.

6. Inter-disciplinary and applied scholarly work.

7. Only upon request of the candidate, or the Department Chair (representing the department), external letters of evaluation of the candidate's scholarship will be sought, in accordance with the relevant CSE policies.

The candidate may also show evidence of scholarship, as suggested in the following non-exhaustive list:

1. Funded research grants. Significant state, federal or otherwise externally funded grants are extremely highly valued. Such grants contribute substantially to the candidate's record of scholarship and are viewed as of comparable value to publications.

2. Research presentations or invited participation at professional meetings, especially at the national or international level, with additional weight given to invited presentations at major meetings.

3. Supervision of undergraduate, or graduate, original work research projects.

4. Publication by a recognized academic publisher or professional body, of books or chapters in books.

5. On-going research and scholarship as evidenced by:
    a. abstracts, work in progress and submitted manuscripts,
    b. proposals submitted (but not necessarily funded) for grant funding,
    c. active, productive collaborations with established scholars,
    d. professional contributions to external projects and reports, including work done as an outside consultant,
    e. expository writing, book reviews, non-peer reviewed publications are encouraged but do not, alone, suffice.
6. In the case of the Director of First Year Mathematics Instruction (DFYMI) position, institutional research that is disseminated within the department, college, and/or university and is used to inform evidence-based changes to the first year mathematics program can count toward the scholarly record, but this alone will not suffice and carries less weight than refereed publications.

Service

With the exception of the DFYMI, for probationary faculty some service within the department is required. Other forms of service are valuable contributions to the candidate's record. When specified in the letter of offer, service may carry enhanced weight, but otherwise teaching and scholarship are generally weighed more heavily than service in the tenure and promotion process. In the early years of appointment less service is expected, but as the candidate approaches promotion, a more substantive record is expected. Service will be evaluated based on contributions to the department, the university, the profession, and the community. Examples of such service appear below.

Specifically for the DFYMI, substantial departmental service is required throughout the appointment. The quality and effectiveness of this service will be evaluated and constitutes a significant component of the DFYMI's application for promotion.

Service to the department:

1. Departmental committees (Curriculum, Graduate, Undergraduate, Elections, First Year Mathematics Steering).

2. Graduate student project advising.

3. Undergraduate student advising.

4. Recruitment of students (both undergraduate and graduate).

5. Colloquium organizer.

6. Curricular development.

7. Library representative, Math Club adviser, etc.

8. Examinations, contests, and related activities.

9. First year mathematics professional learning organizer.

Service to the university:
1. Representation of the department on a college or university committee, or making presentations to such committees on behalf of the department.

2. Service to the department or university as a faculty union representative.

Service to the profession:
1. Involvement in professional activities, such as review of publications or refereeing of papers.

2. Active participation in a number of local or national professional meetings.

3. Review of scholarly or instructional materials or grants (refereeing);

4. Organizing of conferences, meetings, etc.

Service to the community:
1. Presentations to the community.

2. Educational outreach to school children.

3. Contributions to public relations and fund-raising efforts, such as alumni events etc.

Equity, Inclusion, and Diversity

A further requirement for tenure and promotion to Associate Professor is a substantial commitment to improving equity, inclusion, and diversity at Western. This commitment must be described in an Equity, Inclusion, and Diversity section of at least one of the candidate's teaching, scholarship, or service reflections. This commitment may be demonstrated by, but is not limited to, any of the following:

1. Participation in training or professional development focused on diversity;

2. Implement proven inclusive teaching practices in one's own classroom;

3. Obtaining climate evaluations of one's own classroom, and demonstrating efforts to respond to the evaluations;

4. Providing extra guidance, mentoring, and supervision, for at-risk students;

5. Serving as an advisor to, or otherwise actively engaging with, student clubs or groups related to supporting underrepresented students;

6. Publishing peer-reviewed articles or giving presentations on diversity, equity, and inclusion;

7. Service on professional, university, or college diversity committees, initiatives, and programs.

FULL PROFESSOR
Department standards for promotion to Full Professor.

We expect a record of continued success and excellence in both teaching and scholarship, together with significant contributions to service. Any missing elements from the following prescriptions need to be explained and documented by the candidate.

Teaching

We expect evidence of continued success and sustained excellence in teaching, demonstrated in the same manner as the teaching expectations for tenure and promotion to Associate Professor. Evidence of service as adviser to students conducting graduate projects, independent study or research is required.

The candidate is required to provide the following items generated in years since promotion to Associate Professor, or from the last five years, whichever is smaller:

1. Student teaching evaluations for all sections taught (except independent study courses). In an exceptional circumstance when an evaluation cannot be provided, the candidate must explain the reason for this.

2. A representative selection of course materials from each course taught. This should include syllabi, assignments, examinations, and other assessment materials from each course.

3. A written reflection and self-assessment of the candidate's past teaching and future teaching goals. It is recognized that instructional and curricular innovation, which are encouraged, carry risk and that such risks do not immediately result in success. Such experiences should be addressed here.

4. At least five evaluations by peers in the department, using the department's observation protocol. These observations need to be from three different academic years, or from each academic year since promotion or appointment, whichever is less.

5. Evaluation of peers' teaching at an average rate of two observations per academic year, adjusted when necessary for time on leave.

Teaching excellence requires more than these items can encompass; further evidence is required. Such evidence can be demonstrated by items in the following non-exhaustive list.

1. Evidence of curricular or instructional innovation.

2. Supplemental course or instructional materials generated by the faculty (e.g., lecture notes, solutions, etc.).

3. Copies of student work (with student permission or with identifying material redacted).

4. Participation in professional development activities specifically related to teaching.

5. Student letters of support.

6. Archived online course content.

7. Materials generated by independent study courses, graduation with distinction projects, or graduate student projects.

8. Materials generated by undergraduate student research projects.

9. Distributions of final grades assigned.

Scholarship

Evidence of continued productivity and excellence in scholarship since promotion to Associate Professor is required. This must be demonstrated by a substantial body of work. Both quality and quantity of publications will be assessed.

Scholarship consists, primarily, of original work published in reputable journals, following peer review. Generally speaking, journals in which work is published should be listed on a professional index (e.g. MathSciNet, etc). In cases where the journal is not listed in such an index, the candidate should provide an explanation as to why the journal was chosen.

The following are considered in the assessment of scholarly activity:

1. Dissemination of scholarly work, through publication and public presentations at professional meetings. In the case of joint work, the candidate should indicate the extent of their contribution to the work.

2. Manuscripts under revision carry less weight than published articles, while submitted manuscripts carry considerably less weight.

3. Papers in particularly highly rated journals will carry enhanced weight.

4. Inter-disciplinary and applied scholarly work.

5. Only upon request of the candidate, or the Department Chair (representing the department), external letters of evaluation of the candidate's scholarship will be sought, in accordance with the relevant CSE policies.

The candidate may also show evidence of scholarship, as suggested in the following non-exhaustive list:

1. Funded research grants. Significant state, federal or otherwise externally funded grants are extremely highly valued. Such grants contribute substantially to the candidate's record of scholarship and are viewed as of comparable value to publications.

2. Research presentations or invited participation at professional meetings, especially at the national or international level, with additional weight given to invited presentations at major meetings.

3. Supervision of undergraduate, or graduate, original work research projects.

4. Publication by a recognized academic publisher or professional body, of books or chapters in books.

5. On-going research and scholarship as evidenced by:
    a. abstracts, work in progress and submitted manuscripts,
    b. proposals submitted (but not necessarily funded) for grant funding,
    c. active, productive collaborations with established scholars,
    d. professional contributions to external projects and reports, including work done as an outside consultant,
    e. expository writing, book reviews, non-peer reviewed publications are encouraged but do not, alone, suffice.

6. In the case of the Director of First Year Mathematics Instruction (DFYMI) position, institutional research that is disseminated within the department, college, and/or university and is used to inform evidence-based changes to the first year mathematics program can count toward the scholarly record, but this alone will not suffice and carries less weight than refereed publications.

Service

Substantial service is required for promotion to Full Professor. Service to the department, College, University, profession and community all contribute to the candidate's record. No single area is sufficient, but it is not required that all areas are addressed. Below are some examples of such service. Generally speaking, significant service to the department and representation of the department in College committees is expected.

Specifically for the DFYMI, substantial departmental service is required throughout the appointment. The quality and effectiveness of this service will be evaluated and constitutes a significant component of the DFYMI's application for promotion.

Service to the department:

1. Leadership role in departmental committees (Executive, Curriculum, Graduate, Undergraduate, First-Year Math Steering).

2. Graduate student project advising.

3. Undergraduate student advising.

4. Recruitment of students (both undergraduate and graduate).

5. Colloquium organizer.

6. Curricular development.

7. Library representative, Math Club adviser, etc.

8. Examinations, contests, and related activities.

9. First year mathematics professional learning organizer.

Service to the university:
10. Representation of the department on a college or university committee, or making presentations to such committees on behalf of the department.

11. Service to the department or university as a faculty union representative.

Service to the profession:
12. Involvement in professional activities, such as review of publications or refereeing of papers.

13. Active participation in a number of local or national professional meetings.

14. Review of scholarly or instructional materials or grants (refereeing).

15. Service on national review panels.

16. Organizing of conferences, meetings, etc.

17. Editor of a professional journal.

Service to the community:
18. Presentations to the community.

19. Educational outreach to school children.

20. Contributions to public relations and fund-raising efforts, such as alumni events etc.

Equity, Inclusion, and Diversity

A further requirement for promotion to Full Professor is a substantial commitment to improving equity, inclusion, and diversity at Western. This commitment must be described in an Equity, Inclusion, and Diversity section of at least one of the candidate's teaching, scholarship, or service reflections. This commitment may be demonstrated by, but is not limited to, any of the following:

1. Participation in training or professional development focused on diversity;

2. Implement proven inclusive teaching practices in one's own classroom;

3. Obtaining climate evaluations of one's own classroom, and demonstrating efforts to respond to the evaluations;

4. Providing extra guidance and mentoring for at-risk students;

5. Serving as an advisor to, or otherwise actively engaging with, student clubs or groups related to supporting underrepresented students;

6. Publishing peer-reviewed articles or giving presentations on diversity, equity, and inclusion;

7. Service on professional, university, or college diversity committees, initiatives, and programs.

Post Tenure Review

Review is required every five years in accordance with the UFWW Faculty Contract. Reviews for promotion may serve as a substitute. In accordance with the UFWW Faculty Contract, a candidate must meet or exceed departmental standards in each of the three areas of evaluation (teaching, scholarship and service) for a successful review.

Faculty will be evaluated based on departmental standards for their rank, making allowance for fluctuations in the relative emphasis on teaching, scholarship and service across the professional life cycle of the individual faculty member.

Any missing elements from the following prescriptions need to be explained and documented by the candidate.

Teaching

We expect evidence of continued success and sustained excellence in teaching. Evidence of service as adviser to students conducting graduate projects, independent study or research is required.

The candidate is required to provide the following items generated since their last review:

1. Student teaching evaluations for all sections taught (except independent study courses). In an exceptional circumstance when an evaluation cannot be provided, the candidate must explain the reason for this.

2. A representative selection of course materials from each course taught. This should include syllabi, assignments, examinations, and other assessment materials from each course.

3. A written reflection and self-assessment of the candidate's past teaching and future teaching goals. It is recognized that instructional and curricular innovation, which are encouraged, carry risk and that such risks do not immediately result in success. Such experiences should be addressed here.

4. At least five evaluations by peers in the department, using the department's observation protocol. These observations need to be from three different academic years.

5. Evaluation of peers' teaching at an average rate of two observations per academic year, adjusted when necessary for time on leave.

Teaching excellence requires more than these items can encompass; further evidence is required. Such evidence can be demonstrated by items in the following non-exhaustive list.

1. Evidence of curricular or instructional innovation.

2. Supplemental course or instructional materials generated by the faculty (e.g., lecture notes, solutions, etc.).

3. Copies of student work (with student permission or with identifying material redacted).

4. Participation in professional development activities specifically related to teaching.

5. Student letters of support.

6. Archived online course content.

7. Materials generated by independent study courses, graduation with distinction projects, or graduate student projects.

8. Materials generated by undergraduate student research projects.

9. Distributions of final grades assigned.

Schlolarship

Evidence of continued productivity in scholarship contributes substantially to the candidate's record. It is recognized that the expectations here may be reduced when the candidate's contributions to teaching and service are accordingly increased.

Scholarship consists, primarily, of original work published in reputable journals, following peer review. Generally speaking, journals in which work is published should be listed on a professional index (e.g. MathSciNet, etc.). In cases where the journal is not listed in such an index, the candidate should provide an explanation as to why the journal was chosen.

The following are considered in the assessment of scholarly activity:

1. Dissemination of scholarly work, through publication and public presentations at professional meetings. In the case of joint work, the candidate should indicate the extent of their contribution to the work.

2. Manuscripts under revision carry less weight than published articles, while submitted manuscripts carry considerably less weight.

3. Papers in particularly highly rated journals will carry enhanced weight.

4. Inter-disciplinary and applied scholarly work.

The candidate may also show evidence of scholarship, as suggested in the following non-exhaustive list:

1. Funded research grants. Significant state, federal or otherwise externally funded grants are extremely highly valued. Such grants contribute substantially to the candidate's record of scholarship and are viewed as of comparable value to publications.

2. Research presentations or invited participation at professional meetings, especially at the national or international level, with additional weight given to invited presentations at major meetings.

3. Supervision of undergraduate, or graduate, original work research projects.

4. Publication by a recognized academic publisher or professional body, of books or chapters in books.

5. On-going research and scholarship as evidenced by:
    a. abstracts, work in progress and submitted manuscripts,
    b. proposals submitted (but not necessarily funded) for grant funding,
    c. active, productive collaborations with established scholars,
    d. professional contributions to external projects and reports, including work done as an outside consultant,

e. expository writing, book reviews, non-peer reviewed publications are encouraged but do not, alone, suffice.

6. In the case of the Director of First Year Mathematics Instruction (DFYMI) position, institutional research that is disseminated within the department, college, and/or university and is used to inform evidence-based changes to the first year mathematics program can count toward the scholarly record, but this alone will not suffice and carries less weight than refereed publications.

Service

Continued service is required to meet expectations. Service to the department, College, University, profession and community all contribute to the candidate's record. No single area is sufficient, but it is not required that all areas are addressed. Below are examples of such service.

Service expectations differ between Associate and Full Professors. The candidate's rank will be considered when assessing the contributions.

Specifically for the DFYMI, substantial departmental service is required throughout the appointment. The quality and effectiveness of this service will be evaluated and constitutes a significant component of the DFYMI's post-tenure review.

Service to the department:

1. Leadership role in departmental committees (Executive, Curriculum, Graduate, Undergraduate, First-Year Math Steering).

2. Graduate student project advising.

3. Undergraduate student advising.

4. Recruitment of students (both undergraduate and graduate).

5. Colloquium organizer.

6. Curricular development.

7. Library representative, Math Club adviser, etc.

8. Examinations, contests, and related activities.

9. First year mathematics professional learning organizer

Service to the university:
10. Representation of the department on a college or university committee, or making presentations to such committees on behalf of the department.

11. Service to the department or university as a faculty union representative.

Service to the profession:
12. Involvement in professional activities, such as review of publications or refereeing of papers.

13. Active participation in a number of local or national professional meetings.

14. Review of scholarly or instructional materials or grants (refereeing).

15. Service on national review panels.

16. Organizing of conferences, meetings, etc.

17. Editor of a professional journal.

Service to the community:
18. Presentations to the community.

19. Educational outreach to school children.

20. Contributions to public relations and fund-raising efforts, such as alumni events etc.

Equity, Inclusion, and Diversity

A further requirement for post tenure review is a substantial commitment to improving equity, inclusion, and diversity at Western. This commitment must be described in an Equity, Inclusion, and Diversity section of at least one of the candidate's teaching, scholarship, or service reflections. This commitment may be demonstrated by, but is not limited to, any of the following:

1. Participation in training or professional development focused on diversity;

2. Implement proven inclusive teaching practices in one's own classroom;

3. Obtaining climate evaluations of one's own classroom, and demonstrating efforts to respond to the evaluations;

4. Providing extra guidance, mentoring, and supervision, for at-risk students;

5. Serving as an advisor to, or otherwise actively engaging with, student clubs or groups related to supporting underrepresented students;

6. Publishing peer-reviewed articles or giving presentations on diversity, equity, and inclusion;

7. Service on professional, university, or college diversity committees, initiatives, and programs.

INSTRUCTOR and SENIOR INSTRUCTOR

Reviews will be performed annually for Instructors and every three years for Senior Instructors in accordance with the policies and procedures of the UFWW Contract and CST Unit Evaluation Plan. Those aspects of professional performance that are directly related to the duties specified in the letter of offer – primarily instructional duties, in most cases – are the focus of the review, but professional contributions beyond those specified will be welcomed and acknowledged. Expectations for a successful review are as follows:

Teaching

The candidate must demonstrate a clear commitment to excellent teaching. Evidence of this begins with the candidate providing for review all of the following items:

1. Student teaching evaluations for all sections from the past three years, or since first appointment, whichever is fewer.

2. A representative selection of course materials from each course taught from the past three years, or since first appointment, whichever is fewer. This should include syllabi, assignments, examinations, and other assessment materials from each course.

3. A one to two page written reflection and self-assessment of the candidate's past teaching and future teaching goals. It is recognized that instructional and curricular innovation, which are encouraged, carry risk and that such risks do not immediately result in success. Such experiences should be addressed here.

4. All peer evaluations as prescribed in the candidate's contract of employment using the department's observation protocol.

Participation in professional development activities related to instruction or relevant mathematical content is strongly encouraged.

Research

Instructors may conduct scholarship or research activities, but this will play no role in the evaluation process unless otherwise specified in the letter of offer.

Service

Service contributions as outlined in the contract of employment should be documented in a brief exposition.

Other Duties

Instructor positions may include other specific tasks or roles as outlined in the contract of employment. Performance in all such areas must be satisfactory.

DEPARTMENT ADDENDUM – PHYSICS AND ASTRONOMY

Approved by the College of Sciences and Technology Policy, Planning and Budget Council, December 4, 2008 - updates approved January 7, 2010, June 2 2016, April 27, 2023

Updates adopted by the Physics and Astronomy Department in AYs 2018-2019 (voted on and approved in department on May 23, 2019) and 2022-2023 (voted on and approved in department on April 17, 2023).

This document outlines the Physics and Astronomy Department's expectations for faculty appointments, promotions, and review.

Participation by Faculty in the Review Process

All tenured faculty are expected to participate in the review of their Physics and Astronomy Department colleagues. A faculty member may be excused from participation if the review is to occur during a quarter in which the faculty member is on leave. Leave status does not preclude participation, but advance arrangements must be made if the faculty member is away from campus. Instructors and probationary (tenure-track) faculty are not eligible to vote on tenure or promotion of ranked faculty. Spouses may not participate in decisions that affect each other's appointment, promotion or salary.

The tenured faculty shall meet for discussion in cases of tenure and promotion. The meeting should occur after the candidate's dossier materials have been made available to the department, but before the final evaluations are due to the department chair.

ASSISTANT PROFESSOR

Qualifications for appointment to probationary faculty:

A Ph.D. in physics or astronomy or related field is required. The candidate will show evidence of (or potential for) impactful and effective teaching. The candidate will also show evidence for achievement in research and the potential for establishing an active independent research program at WWU.

ASSOCIATE PROFESSOR

The department chair's annual evaluation of each tenure track faculty shall be used to guide and assist the candidate in preparing the materials for tenure and promotion.

Department standards for tenure and promotion to Associate Professor:

Teaching

Evidence of teaching effectiveness or improvement towards that goal (recognizing risks that may be taken for curriculum development) as demonstrated by the contents of:

1. All components of all student teaching evaluations for all instances of every course taught during the review period, except for evaluations specifically exempted by the CBA or any applicable MOU between the UFWW and the University.

2. Peer evaluations by three or more faculty members. All peer evaluations received during the evaluation period must be included.

3. At least one syllabus from every course taught during the review period, and selected course materials that best represent the candidate's ability to foster student learning.

4. A teaching reflection statement that includes: teaching goals for each course taught, self-assessment of accomplishments around those goals, and any changes made or planned around the goals and self-assessment.

- Assessment of student learning using assessment instruments or questionnaires is one way of demonstrating accomplishments in teaching and is an optional part of the self-assessment of teaching goals.

Research

Evidence of excellence in research as demonstrated by some combination of:

1.   Peer-reviewed publications in national or international journals or peer reviewed conference proceedings that describe the results of research undertaken while employed by WWU. Manuscripts that have been accepted or actually published are considered with more weight than those in revision, which are considered with more weight than those that have only been submitted. Publication of research that includes contributions of WWU undergraduate research students is considered with more weight than publication of research that does not include undergraduate participation. Multiple publications in widely distributed non-peer-reviewed journals or conference proceedings may compensate in part for a peer-reviewed publication. Significant efforts towards setting up departmental research facilities or mentoring student research may compensate in part for a peer-reviewed publication.

2.   Evidence of ongoing research in the form of proposals for grants or funded grants. External grants are considered with more weight than internal grants.

3.   Faculty fellowships (for example, at a national laboratory, research center, or observatory).

4.   Other evidence that the candidate's research is important to the larger community such as science citation index or invited presentations.

5.   Outside review letters (optional). The candidate may submit the names of potential reviewers to the department chair, who will obtain letters from the outside reviewers.

Service

Basic departmental service is required, including attendance at and contribution to faculty meetings and departmental programs.

Serving on and participating in at least one college-wide or university-wide committee is required.

Advising and mentoring students is expected.

Lasting contributions to department curriculum such as lab upgrades, new course development, or preparation of undergraduate teaching assistants are valued.

Some additional service to profession and/or community is desired and may include, but is not limited to, reviewing manuscripts, books, or grants; convening topical sessions at regional or national conferences; taking leadership in regional or national organizations; being active in regional recruitment, mentoring, and outreach including planetarium shows, etc.

Equity, inclusion, and diversity

A further requirement for tenure and promotion to Associate Professor is a substantial commitment to improving equity, inclusion, and diversity in STEM. This commitment must be described under an Equity, Inclusion & Diversity subsection in at least one of the following sections: Teaching, Research, or Service. A substantial commitment to improving equity, inclusion, and diversity in STEM may be demonstrated by, but is not limited to, any of the following:

- Participate in on-campus training or off-campus professional development focused on diversity
- Bring outside training to one's own classroom, lab, or department on issues of diversity and equity
- Implement proven inclusive teaching practices in one's own classroom
- Use of equitable methods for recruiting research students, and provide an active approach to create an inclusive culture within one's own student research group
- Consistently obtain climate evaluation of one's own classroom and/or research group, showing changes based on outcomes of evaluation
- Implement best practices of inclusion in managing students as teaching assistants and research assistants and provide equitable opportunities for all students

- Provide substantial mentoring to underrepresented students
- Serve as advisor to, or otherwise actively engage with student club/group related to professional development and retention of underrepresented students
- Publish peer-reviewed article or presentation on (or receive funding for) diversity, equity, and inclusion
- Develop or provide leadership for professional, university, or college diversity committees, initiatives, and programs

FULL PROFESSOR

Department standards for promotion to Full Professor:

Teaching

Evidence of effectiveness in classroom teaching since promotion to Associate Professor (recognizing risks that may be taken for curriculum development) as demonstrated by the contents of:

1. All components of all student teaching evaluations for all instances of every course taught during the review period, except for evaluations specifically exempted by the CBA or any applicable MOU between the UFWW and the University.

2. Peer evaluations by three or more faculty members. All peer evaluations received during the evaluation period must be included.

3. At least one syllabus from every course taught during the review period, and selected course materials that best represent the candidate's ability to foster student learning.

4. A teaching reflection statement that includes: teaching goals for each course taught, self- assessment of accomplishments around those goals, and any changes made or planned around the goals and self-assessment.

- Assessment of student learning using assessment instruments or questionnaires is one way of demonstrating accomplishments in teaching and is an optional part of the self-assessment of teaching goals.

In addition to the effectiveness in classroom teaching that is expected for promotion to associate professor, promotion to full professor requires contributions to teaching effectiveness at the department level.

5. Evidence of contributions to teaching effectiveness at the department level, such as:

    a. Substantial course development;

    b. Development of infrastructure for department teaching;

    c. Mentorship of teaching assistants and/or faculty in their teaching efforts;

d. Facilitating professional development for other department faculty, or attending professional development and sharing that information with other department faculty..

Research

Evidence of sustained excellence in research as demonstrated by:

1.   A substantial body of work that may include:
    a)   Publications in peer-reviewed national or international journals or conference proceedings.
    b)   Published monographs, textbooks, or popular articles.
    c)   Invited showcase presentations.
2.   Ongoing research that includes active collaboration, proposals for external funding, and involving undergraduates in research.

Service

In addition to continued excellence under the criteria set for promotion to the Associate Professor level, some of the following are also required:

1.   Significant service to the College and/or University as demonstrated by committee leadership and active participation in the work of the committee.
2.   Leadership in departmental activities and program development.
3.   Leadership in profession, including regional and national organizations.
4.   Significant involvement in local outreach or community service related to faculty professional activities, while not required, can be given weight in this category.

Equity, inclusion, and diversity

A further requirement for promotion to Full Professor is a substantial commitment to improving equity, inclusion, and diversity in STEM. This commitment must be described under an Equity, Inclusion & Diversity subsection in at least one of the following sections: Teaching, Research, or Service. A substantial commitment to improving equity, inclusion, and diversity in STEM may be demonstrated by, but is not limited to, any of the following:

- Participate in on-campus training or off-campus professional development focused on diversity
- Bring outside training to one's own classroom, lab, or department on issues of diversity and equity
- Implement proven inclusive teaching practices in one's own classroom
- Use of equitable methods for recruiting research students, and provide an active approach to create an inclusive culture within one's own student research group

- Consistently obtain climate evaluation of one's own classroom and/or research group, showing changes based on outcomes of evaluation
- Implement best practices of inclusion in managing students as teaching assistants and research assistants and provide equitable opportunities for all students
- Provide substantial mentoring to underrepresented students
- Serve as advisor to, or otherwise actively engage with student club/group related to professional development and retention of underrepresented students
- Publish peer-reviewed article or presentation on (or receive funding for) diversity, equity, and inclusion
- Develop or provide leadership for professional, university, or college diversity committees, initiatives, and programs

Post-Tenure Review

At a minimum, the department requires performance that "meets standards" in each of three areas: teaching, research/scholarly activity, and service to the institution and profession.

Teaching

A rating of "meets standards" in this category requires sustained engagement in and attention to teaching as demonstrated by:

1. Statement of goals and self-assessment of accomplishments for classes currently taught.
2. All student teaching evaluations for every course taught during the evaluation period.
3. Additional evidence may include peer evaluations of teaching and/or letters from alumni.

Research

A rating of "meets standards" in this category requires continued engagement in research during the five-year interval as demonstrated by some combination of:

1. Published manuscripts.
2. Presentations at national and/or regional conferences.
3. Proposals for external funding.
4. Mentorship of undergraduate projects and research.
5. Faculty fellowships (for example, at a national laboratory, research center, or observatory).

Service

A rating of "meets standards" in this category requires continued engagement with colleagues in the University and beyond, demonstrated by:

1. Continued participation in departmental activities, including attendance at and participation in faculty meetings and contribution to programs within the department.
2. College or University service demonstrated by active committee participation.

Equity, inclusion, and diversity

A further requirement for "meeting standards" for PTR is a substantial commitment to improving equity, inclusion, and diversity in STEM. This commitment must be described under an Equity, Inclusion & Diversity subsection in at least one of the following sections: Teaching, Research, or Service. A substantial commitment to improving equity, inclusion, and diversity in STEM may be demonstrated by, but is not limited to, any of the following:

*   Participate in on-campus training or off-campus professional development focused on diversity
*   Bring outside training to one's own classroom, lab, or department on issues of diversity and equity
*   Implement proven inclusive teaching practices in one's own classroom
*   Use of equitable methods for recruiting research students, and provide an active approach to create an inclusive culture within one's own student research group
*   Consistently obtain climate evaluation of one's own classroom and/or research group, showing changes based on outcomes of evaluation
*   Implement best practices of inclusion in managing students as teaching assistants and research assistants and provide equitable opportunities for all students
*   Provide substantial mentoring to underrepresented students
*   Serve as advisor to, or otherwise actively engage with student club/group related to professional development and retention of underrepresented students
*   Publish peer-reviewed article or presentation on (or receive funding for) diversity, equity, and inclusion
*   Develop or provide leadership for professional, university, or college diversity committees, initiatives, and programs

Evaluation of Faculty with Joint Appointment in SMATE

It is expected that faculty who hold joint appointments in Physics and Astronomy and in Science, Math, and Technology Education (SMATE) will meet departmental standards for tenure, promotion, and post-tenure review, with these caveats:

- The Physics and Astronomy Department will review courses taught for both Physics and Astronomy and for SMATE, with the exception of courses that are exclusively teaching-methods courses and contain limited Physics and Astronomy content. These courses will be reviewed by SMATE.

- Some or all extra-departmental service may be on behalf of SMATE or professional science education organizations. Basic service to the Physics and Astronomy Department is expected.

The Chair will request that the SMATE Director provide a letter summarizing the SMATE evaluation of the candidate.

Evaluation of Faculty with Joint Appointment In AMSEC

Faculty hired into the Advanced Materials Science and Engineering Center will hold a split appointment between two science departments. It is expected that faculty who hold a primary appointment in Physics and a secondary appointment in another AMSEC department will meet Physics departmental standards for tenure, promotion, and post tenure review, with these caveats:

- The Chair will request that the AMSEC Director provide a summary, representing an evaluation of the candidate by AMSEC and the secondary department, which will be forwarded with the faculty member's dossier.

- Some extra-departmental service may be on behalf of AMSEC. Basic service to the Physics Department is expected for faculty with a primary appointment in Physics.

- For faculty with a secondary appointment in Physics, the Chair will solicit evaluations from tenured and probationary faculty, using Physics departmental standards, the substance of which will be summarized in a letter to the AMSEC director to be forwarded with the faculty member's dossier.

Non-Tenure Track Faculty

INSTRUCTOR

Instructors shall be reviewed on the basis of expectations defined in the letter of offer. Instructors are reviewed annually; Senior Instructors are evaluated once during their period of appointment (not more than three years). The department chair or designee will provide the review for Instructors with annual appointments of less than 0.5 FTE. For

faculty with annual appointments of 0.5 FTE or greater, the department chair selects a tenured or tenure-track faculty member to participate in the review.

Department standards for Instructors, with annual FTE 0.5 or greater, follow. Expectations are proportional to the fractional FTE of the faculty member.

Teaching

Evidence of teaching effectiveness or improvement towards that goal as demonstrated by the contents of:

1. All components of all student teaching evaluations for all instances of every course taught during the review period, except for evaluations specifically exempted by the CBA or any applicable MOU between the UFWW and the University.

2. One or more peer evaluation per year of the review period. All peer evaluations received during the evaluation period must be included.

3. At least one syllabus from every course taught during the review period, and selected course materials that best represent the candidate's ability to foster student learning.

4. A teaching reflection statement that includes teaching goals for each course taught and self-assessment of accomplishments around those goals.

- Assessments of student learning using assessment instruments or questionnaires is one way of demonstrating accomplishments in teaching and is an optional part of the self-assessment of teaching goals.

Research
Non-tenure-track faculty are encouraged to conduct research, but research is not required.

Service
Basic departmental service is encouraged, such as attendance at department faculty meetings and contributions to academic program development.

Other
Instructor positions may include other specific tasks or roles outlined in the candidate's letter of appointment. Performance in these areas must be satisfactory.

SENIOR INSTRUCTOR
Non-Tenure-Track faculty with a minimum of five years of experience at 0.5 FTE or greater at the University with satisfactory evaluations in each of those five years shall be appointed Senior Instructor effective the following September. Senior Instructors shall be evaluated once during the period of their appointment.

PROGRAM ADDENDUM – SCIENCE, MATHEMATICS AND TECHNOLOGY EDUCATION PROGRAM (SMATE)

Approved by the College of Science and Engineering Policy, Planning and Budget Council, November 13, 2008 – updated Academic Year 2012-2013

This document outlines expectations for the Science Education Program supplemental to those presented in the College of Science and Engineering Unit Evaluation Plan for faculty appointments, promotions, and review.

Introduction

Western Washington University has a long-standing policy of shared responsibility among colleges and departments for the preparation of teachers. This document refers to faculty who participate in the preparation of future teachers of science. Each of the science departments, Biology, Chemistry, Geology and Physics, and the Elementary and Secondary Education departments in the Woodring College of Education has faculty who are hired to devote a major portion of their time and teaching (nominally 50%) to the preparation of future teachers of science. These faculty members bear the general obligation to engage in scholarly and/or creative activity of recognized quality. This activity may be distributed between scholarship in the disciplines and in science education. Criteria to be used in the evaluation of science education faculty members by their science education peers are discussed in the following paragraphs along with the procedures that will be used in the evaluations.

Since the mathematics and technology preparation of future teachers is contained within the mathematics and engineering technology departments respectively, decisions concerning faculty in those departments will be governed by the faculty's home department Unit Evaluation Plans and are not addressed by this plan.

Review Procedures for Faculty Members in Science Education

The evaluation process for Science Education faculty for annual reappointment, promotion, tenure, and Post-tenure review will be done by the faculty member's home department. Science Education tenured faculty will assess the quality of the individual's science education endeavors in teaching, scholarship and service by voting and writing a letter of evaluation. Tenured faculty on leave may submit their vote and a letter of evaluation if desired, but have to submit both. Probationary faculty and non-tenure-track faculty do not vote; however, they are welcome to provide comments.. Science Education faculty members will submit their evaluations to the director of SMATE who will then summarize the evaluations and submit a single summary letter to the relevant chair for consideration. The letter will be submitted by the director to the CSE Personnel

Committee, or the appropriate WCE committee or Dean along with materials from the department. The Director of SMATE may submit a separate letter.

Qualifications for Appointment to Probationary Faculty

ASSISTANT PROFESSOR

A terminal degree in one of the sciences or related science/engineering or science education field is required. The candidate will also show evidence of excellence in teaching and research.

ASSOCIATE PROFESSOR
Program standards for tenure and promotion

Teaching

Evidence of teaching excellence or improvement towards that goal (recognizing risks that may be taken for curriculum development) in both disciplinary and science education courses as demonstrated by:

- Evidence of student learning (should include statement of learning goals/objectives for each class and self-assessment of achievement of those goals)
- Evidence of successful supervision of students' practicum and internship experience in the schools (if applicable)
- Peer observation and evaluations by several faculty members
- Syllabi and course materials
- Student evaluations in all courses taught

Scholarship

It is expected that the candidate contribute to scholarship in science education as evidenced by any of the activities below. However, the proportion of effort allotted to scholarship may be shared between science education and the candidate's scientific discipline. The candidate must clearly outline how his/her scholarship effort is allocated between those disciplines (with a sum total of 1 FTE). Thus, evaluation of candidate's scholarship will be based on this allocation, using the appropriate quality/quantity of the activities below as evidence.

- Published work in books or scholarly journals that seeks to interpret, synthesize or bring new insight on original research in science or the teaching and learning of science to enhance science education at the K-12, undergraduate and graduate levels.

- Peer-reviewed first-author or student-authored publications in national or international science education journals. Manuscripts that have been accepted or actually published are considered with more weight than those in revision, which are considered with more weight than those that have only been submitted.
    - Multiple peer-reviewed publications as junior author may compensate for a first-authored publication. Contribution to the manuscript should be indicated.
    - Multiple publications in non-peer-reviewed journals or local journals may compensate for a peer-reviewed publication.
- Funded research or program development grants (external grants are considered with more weight).
- Ongoing research in the form of abstracts and proposals for external funding.
- Publication and/or dissemination of textbooks or curriculum materials.
- Participation in workshops, review panels, commissions, etc.
- Presentation of scholarly work at professional conferences or workshops.
- Fostering undergraduate or graduate student scholarship as evidenced by published results of student projects, presentations made by students at regional or national meetings, awards to students and/or research grants awarded to students.

Service

Basic program service is required – attendance and participation at faculty meetings and to program development. Some additional service to the profession, university and/or community is required. Professional service may include, but is not limited to:
- Active advisement of graduate and undergraduate students.
- Service to the College and/or University as demonstrated by committee membership.
- Involvement in science education programs for in-service teachers.
- Supervising or participating in science education organizations.
- Participating in SMATE outreach activities.
- Work in the K-12 schools and classroom.
- Work with K-12 districts on policy issues.
- Member of panel reviews for funding agencies.
- Reviewing manuscripts, books or grants.
- Participating in topical sessions at regional or national conference.
- Active participating in regional or national organizations.

FULL PROFESSOR
Program standards for promotion to Full Professor

Teaching

Evidence of excellence in teaching as demonstrated by:

- Evidence of student learning (should include statement of learning goals/objectives for each class and self-assessment of achievement of those goals)
- Evidence of successful supervision of students' practicum and internship experience in the schools (if applicable).
- Peer observation and evaluations by several faculty members.
- Syllabi and course materials.
- Student evaluations in all courses taught for the last five years.

Scholarship

It is expected that the candidate contribute to scholarship in science education as evidenced by any of the activities below. However, the proportion of effort allotted to scholarship may be shared between science education and the candidate's scientific discipline. The candidate must clearly outline how his/her scholarship effort is allocated between those disciplines (with a sum total of 1 FTE). Thus, evaluation of candidate's scholarship will be based on this allocation, using the appropriate quality/quantity of the activities below as evidence.

- Published work in books or scholarly journals that seeks to interpret, synthesize or bring new insight on original research in science or the teaching and learning of science to enhance science education at the K-12, undergraduate and graduate levels.
- Peer-reviewed first-author or student-authored publications in national or international science education journals. Manuscripts that have been accepted or actually published are considered with more weight than those in revision, which are considered with more weight than those that have only been submitted.
    - Multiple peer-reviewed publications as junior author may compensate for a first-authored publication. Contribution to the manuscript should be indicated.
    - Multiple publications in non-peer-reviewed journals or local journals may compensate for a peer-reviewed publication.
- Funded research or program development grants (external grants are considered with more weight).
- Ongoing research in the form of abstracts and proposals for external funding.
- Publication and/or dissemination of textbooks or curriculum materials.
- Participation in workshops, review panels, commissions, etc.
- Presentation of scholarly work at professional conferences or workshops.
- Fostering undergraduate or graduate student scholarship as evidenced by published results of student projects, presentations made by students at regional or national meetings, awards to students and/or research grants awarded to students.

Service

In addition to expectations for promotion to the Associate Professor level, some of the following are also required:

- Significant service to the College and/or University as demonstrated by committee membership and active participation in the work of the committee.
- Leadership in SMATE activities and program development.
- Leadership in science discipline or science education, including regional and national organizations.
- Significant involvement in local outreach or community service related to faculty professional activities, while not required, can be given weight in this category.

Post-Tenure Review

Review is required by faculty contract each five years after promotion. The faculty member's performance shall be determined as having exceeded department standards, having met department standards, or not having met department standards in the areas of teaching, scholarship, and service.

Teaching

To achieve a rating of "meets department standards" in this category, we require evidence for sustained engagement in and attention to teaching as evidence by:

- An overview statement of teaching, including teaching philosophy and objectives.
- Syllabi and course materials.
- Student evaluations for all courses currently taught since the last review.
- Evidence of successful supervision of students' practicum and internship experience in the schools (if applicable).
- Additional evidence is welcomed including peer evaluations of teaching, and/or letters from alumni.

For an "exceeds department standards" rating, the above items should demonstrate outstanding performance.

Scholarship

For "meets department standards" in this category, we expect evidence for continued engagement in research including some combination as outlined in the scholarship section of promotion to full professor.

For an "exceeds department standards" rating, the above items should demonstrate outstanding performance.

Service

For "meets department standards" in this category, we expect evidence for continued engagement with colleagues in the University and beyond, such as:

- Continued participation in departmental activities, including attendance at faculty meetings
- College or University service demonstrated by committee membership and/or extramural professional service.

For an "exceeds department standards" rating, the above items should demonstrate outstanding performance.

Non-Tenure Track Faculty

INSTRUCTOR

Instructors shall be reviewed annually on the basis of expectations defined in the letter of offer. For instructors with annual appointments of 0.5 FTE or less, the department chair or designee will provide the review. For instructors with annual appointments of 0.5 FTE or greater, a review by the department, similar to annual reviews for probationary faculty, is required.

SMATE standards for instructors with an annual FTE of 0.5 or greater are as follows. Expectations are proportional to the percent FTE of the faculty member.
Teaching

Evidence of teaching excellence or improvement towards that goal (recognizing risks that may be taken for curriculum development), as demonstrated by:
- Evidence of student learning (should include statement of learning goals/objectives for each class and self-assessment of achievement of those goals)
- Evidence of successful supervision of students' practicum and internship experience in the schools (if applicable)
- Peer observation and evaluations by several faculty members
- Syllabi and course materials
- Student evaluations (a representative set for all courses currently taught)

Scholarship

Instructors are encouraged to conduct research, but research is not required.

Service

Basic departmental service is strongly encouraged, including attendance at department faculty meetings and contributions to academic program development. Service outside the department is not required.

SENIOR INSTRUCTOR

Non-Tenure-Track faculty with a minimum of five years of experience at 0.5 FTE or greater at the University with satisfactory evaluations in each of those five years shall be appointed Senior Instructor effective the following September. Senior Instructors positions may include specific tasks or roles beyond teaching activities as outlined in the letter of appointment. Appointment to Senior Instructor shall not result in additional duties without compensation beyond the senior instructor salary increase. Performance in all such areas must be satisfactory. Senior Instructors shall be evaluated once every three years.

ADDENDUM TO PROGRAM BYLAWS – ADVANCED MATERIALS SCIENCE & ENGINEERING CENTER (AMSEC)

Approved by the College of Science and Engineering Policy, Planning and Budget Council, March 12, 2009, June 2, 2016

Adopted by AMSEC membership on April 29, 2009.

This document outlines AMSEC expectations supplemental to those presented in the College of Science and Technology Unit Evaluation Plan for faculty appointments, promotions, and review.

Overview

Faculty hired by the AMSEC program have joint appointments, split between a home and secondary department. The position is rostered and tenure is held in the home department, but both departments, as well as AMSEC, participate in their evaluation. Professional review for all AMSEC faculty members takes place in their home departments, according to the procedures and standards in their home department Unit Evaluation Plans. For faculty hired by the AMSEC program, three additional provisions also apply: 1) the Director and secondary department Chair provide letters of evaluation to the home department Chair and Dean, as described below; 2) their review must include external letters, as described below; 3) for probationary faculty, at each annual evaluation the home department Chair shall convene a meeting of the AMSEC Director and secondary department Chair to discuss the candidate's progress and professional development. These provisions only apply to faculty members hired by AMSEC.

Letters of Evaluation from the AMSEC Director and Secondary Department Chair

The Director and secondary department Chair provide letters of evaluation to the home department Chair for incorporation into the candidate's *dossier* at the time of application for tenure/promotion and at the time of application for promotion to the rank of Full Professor. The purpose of these letters is to provide information on the candidate's teaching, research, and service in the secondary department and AMSEC.

The letter of evaluation from the secondary department Chair shall address the candidate's teaching, research, and service, if any, in the secondary department, assessed according to the standards described in the secondary department's Unit Evaluation Plan. In preparing his/her letter, the secondary department Chair shall solicit input from faculty in the secondary department. Faculty in the secondary department are encouraged to review the candidate's materials, which shall be made available to them in the candidate's home department.

The letter from the AMSEC Director shall address the three areas listed below. In preparing his/her letter, the Director shall seek input from AMSEC faculty, who will be encouraged to review the candidate's materials.

1) *The candidate's record of teaching in AMSEC courses.* If the candidate has taught AMSEC courses, the Director's letter shall address the quality of the Candidate's teaching in those courses. Evidence for excellence in teaching is demonstrated by peer evaluations by other faculty members, evidence of student learning; student evaluations from the testing center for all AMSEC courses taught during the evaluation period; and syllabi and course materials for each AMSEC course taught during the evaluation period.

2) *The candidate's record of scholarship.* Scholarly accomplishment may be demonstrated in several ways but the most specific and compelling evidence is publications of stature resulting from work undertaken while a member of the faculty of Western Washington University. Primary examples of such publications are original papers in refereed journals, scholarly monographs, books, and review articles. Activities and publications which involve undergraduate or graduate students are especially valued. Also considered significant are the authorship of textbooks and relevant instructional software, awards of research grants, papers presented at professional meetings, and seminar presentations. Scholarly contributions may be made as an individual or as a member of a group. In the latter case, the contribution of the individual to the group effort will be weighed. In all three instances, however, the stature and significance of the scholarship is of paramount importance.

3) *The candidate's record of service to AMSEC.* The candidate's AMSEC service contributions are expected to be similar to all other AMSEC faculty. Service to AMSEC is demonstrated by membership on AMSEC committees; participation in AMSEC meetings; development of new AMSEC courses, laboratory experiments, or curricula; contribution to proposals for AMSEC initiatives and/or equipment; activities on behalf of professional organizations, including service as an officer or member of regional or national committees, peer reviewing of grant proposals, and journal manuscripts, and activities before public or professional gatherings.

Letters from External Reviewers

Confidential external letters are required for faculty hired by AMSEC at the time of application for tenure/promotion and at the time of application for promotion to the rank of Full Professor. The external letters become part of the applicant's materials and shall be made available to those reviewing the materials.

The letters shall be obtained either by the Director or the candidate's home department Chair. If the AMSEC faculty member's home department Unit Evaluation Plan requires external letters, then they shall be obtained according to the procedures described therein, otherwise the Director shall obtain them. The external reviewers must be expert in an area

of research overlapping that of the faculty member. Both the candidate and the candidate's home department Chair shall submit a list of qualified reviewers to the Director. They are encouraged to submit potential reviewers from predominately undergraduate as well as research intensive institutions. Candidates and their Chair may also submit a list of unacceptable reviewers. The Director may solicit additional names of qualified reviewers from experts within the sub-discipline. From this pool of potential reviewers, the Director shall select three reviewers, with the exclusion of the reviewers whom the candidate or home department Chair considered unacceptable. The Director shall provide to the external reviewers the scholarship section of the faculty member's tenure and promotion *dossier*. In addition, the Director shall provide to the external reviewers the teaching schedule of the faculty member, a record of the faculty member's service, and an overview of how teaching and research at WWU compare to a research intensive university.

VIII. FORMS

Updated and approved by the College of Science and Engineering
Policy, Planning and Budget Council
May 31, 2012,
Updated approved Jan 6, 2022

COLLEGE OF SCIENCE AND ENGINEERING

Observation of Teaching

This form is provided as a mechanism to provide feedback to faculty members after observing classroom teaching. It is only a guideline, and may be modified as appropriate for individual departmental use.

Instructor: _____   Course: _____

Date: _____   Time Observed: _____

Evaluator: _____   Rank: _____

Comments on student engagement:

Comments on use of classroom time:

Concerns or suggestions for improvement:

Signature of Evaluator: _____ Date: _____

Thank you for participating in the on-going review of faculty members and their teaching. This form should be returned to the instructor and included in that faculty member's dossier for future tenure, promotion, or post-tenure review.

COLLEGE OF SCIENCE AND ENGINEERING

Evaluation of Non-Tenure-Track Instructors

This form is provided as a mechanism to acquire input from other faculty members in the non-tenure-track faculty member's evaluation process. It should be used as a guideline and may be modified as appropriate for individual departmental use.

Instructor: _____ Department: _____

Period of Review: Academic Year: _____ Fall: ☐ Winter: ☐ Spring: ☐

Evaluator: _____ Rank: _____

This evaluation is based on the expectations and duties defined in the letter of offer.

Teaching (required)

	Superior	Satisfactory	Unsatisfactory
Knowledge of subject (s)	☐	☐	☐
Course organization	☐	☐	☐
Prepared teaching materials (syllabi, exams, etc.)	☐	☐	☐
Achievement of appropriate educational goals	☐	☐	☐
Ratings and comments on student evaluation forms	☐	☐	☐
Ratings and comments of faculty evaluators	☐	☐	☐
Engagement of students in critical thinking, active learning	☐	☐	☐

COLLEGE OF SCIENCE AND ENGINEERING

Faculty Evaluation of Probationary Faculty for Progress Towards Tenure

Note: This form is not to be used for Non-Tenure-Track Faculty, Post-Tenure Review or Tenure and/or Promotion.

Candidate: _____   Rank: _____

Department: _____

Period of Review: _____   From date of last review until and including current year

Per Section 7.6.2.2.2. of the CBA - *Unless they are on leave, all tenured faculty (except the chair) are expected to submit an individual written assessment of the dossier and to assess whether the candidate is progressing or not progressing toward tenure. Tenured faculty on leave may, but are not required to, submit an individual written assessment of the dossier and assess whether the candidate is progressing or not progressing toward tenure. Probationary faculty, non-tenure-track faculty, and staff do not submit an assessment of the candidate's progress.*

Evaluator: _____   Rank: _____

Department: _____

The candidate is to be evaluated according to the standards as defined in the Department Addendum to the College Operating Procedures and Evaluation Plan. Please review the appropriate COPEP Department Addendum. Evaluations should be based on whether or not the candidate is on an appropriate trajectory toward meeting requirements for tenure and promotion.

	Below Trajectory	On or Above Trajectory
Teaching:	☐	☐
Research/Scholarship:	☐	☐
Service:	☐	☐

Overall Recommendation:

☐   The candidate is progressing towards tenure.

☐   The candidate is NOT progressing towards tenure.

A letter with specific detail that justifies the ranking and recommendation must be submitted with this form.

Signature of Evaluator: _____ Date: _____

The candidate is to be evaluated according to the standards as defined in the Department Addendum to the College Operating Procedures and Evaluation Plan. Please review the COPEP Department Addendum selected by the candidate and included in the dossier.

Written evaluations of probationary faculty indicate whether the candidate is on an appropriate trajectory toward meeting the requirements for tenure. They do not, directly, indicate whether or not a candidate has already met such requirements, nor should they make a recommendation on whether or not a candidate is ready to apply for promotion and/or tenure.

Please comment on the candidate's progress towards meeting expectations for tenure in the categories of teaching, scholarship and service. An evaluation during any given year should focus on the year of review, but in the context of the candidate's overall trajectory toward promotion and tenure. Separate and clear statements on the total body of work can also be provided. Significant achievements and deficiencies should be addressed in written comments. If deficiencies are listed, the written evaluation should include recommendations for remedies. Stipulations for improvement should also be clearly indicated.

Justification Letter for: Candidate

COLLEGE OF SCIENCE AND ENGINEERING
Faculty Evaluation of Faculty for Tenure, and/or Promotion

Note: This form is not to be used for Non-Tenure-Track Faculty or for Post-Tenure Review.

Candidate: _____   Rank: _____

Department: _____

Evaluation for consideration of: *check all that apply*

☐ Tenure

☐ Promotion to Associate   ☐ Promotion to Full

Period of Review: _____   From date of last review/promotion until and including current year

The candidate is to be evaluated according to the standards as defined in the selected Department Addendum to the College Operating Procedures and Evaluation Plan. Please review the appropriate COPEP Department Addendum.

Evaluator: _____   Rank: _____

Department: _____

Rate the candidate using the following numerical system:

1   Very Poor   Reviewer objects to renewal/tenure/promotion.
2   Poor   Reviewer recommends against renewal/tenure/promotion.
3   Fair   Reviewer would recommend renewal/tenure/promotion only after certain improvements.
4   Good   Reviewer recommends renewal/tenure/promotion even though some areas should be improved.
5   Very Good   Reviewer recommends renewal/tenure/promotion.
6   Excellent   Reviewer find the candidate exceptionally well suited for renewal/tenure/promotion.

Teaching:	Research/Scholarship:	Service:

Recommendation:

☐   I recommend the candidate be renewed/tenured/promoted.

☐   I recommend the candidate *not* be renewed/tenured/promoted.

A letter with specific detail that justifies the ranking and recommendation must be submitted with this form. Stipulations for improvement must be clearly indicated. Please review the COPEP Guidelines for Faculty Review Letters.
