

Biol 495 ~ Biology Communication (1-4)

Biol 495 is for analysis and communication of results from individual scientific research. Communication can be in the form of a full scientific paper, poster, or an oral presentation.

Instructions

- Please complete this form after you and a Biology faculty member have discussed the research activities in which you will be involved.
- Have the Research Professor sign this form, and return the completed form into the Biology Office, BI 315. An override for BIOL 495 will be entered and you will be given the CRN to use for registration.
- Failure to add this course by the end of Phase III Registration will result in the assessment of a late registration fee by the Registrar's office.
