Electrical Engineering, BS
Electronics Concentration

Plan of Study 2017-2018 Academic Year
146-150 Total Credits for Major

*All students must initially declare as a pre-major in Electrical Engineering; students cannot apply for the Major unless all pre-major prerequisites have been satisfied with a grade of C- or better. Admission to the program is competitive.

*Course offerings/schedule are subject to change

NOTES:
1. EE courses are offered once per year and have a strong prerequisite structure. Not following the sequence may delay graduation.
2. Students not enrolled in MATH 125 and PHYS 162 by Winter of Year 1 will not be able to complete the degree in four years.
3. All EE courses in years 2, 3, and 4 require admission to the EE Major (see reverse).
4. The EE program satisfies the SCI/LSCI, QSR, and Writing Proficiency (WP) General University Requirements (GURs). The GUR categories listed on this Planning Guide are what a student would need to complete beyond what the Major fulfills. Refer to the WWU Degree Planning Guide for further information and a list of GUR course options. [http://www.wwu.edu/depts/registrar/gurs.shtml](http://www.wwu.edu/depts/registrar/gurs.shtml)

11.06.17
Admissions—

Program Admissions: Admission to the Electrical Engineering major is a two-phase process. When students initially declare, they are designated as pre-majors. Students must complete the courses listed below in order to apply to the major. Admission to full major status is determined by academic performance and other factors including an application questionnaire about the applicant’s experience, motivation, and goals. Admission to the major is competitive. Neither completion of the prerequisites nor attainment of any specific GPA guarantees admission.

Major Prerequisite courses: MATH 124, MATH 125, MATH 204, PHYS 161, PHYS 162, CSCI 140, EE 110, and EE 111. Students must obtain at least a C- in the above courses and an overall GPA in them of 2.0 or higher to be considered. AP scores are converted to GPA as follows: 5 = A; 4 = B; 3 = C. Decisions are based on cumulative GPA in the prerequisite courses, and other required Major courses, overall GPA, and questionnaire responses.

Spring Quarter: Applications are due by Noon on the Friday of Dead Week to ET 204. Only complete, on-time applications will be considered. Applicants will be notified by the end of the week following finals week. Students who are accepted must register for Fall quarter EE courses before the end of Phase I registration. Students who do not register by the end of Phase I registration may lose their major status.

Fall Quarter: Applications are also accepted at the beginning of Fall quarter on a space available basis. In order to be considered, applications are due to ET 204 by Noon on the Friday before the start of classes. Accepted students will be notified by the start of Phase III registration.

Transfer Students: A transfer student that will be transferring into Fall quarter, Year 2, will be designated as a pre-major and will need to follow the standard application process above except for EE 110, which must be taken at the first opportunity on-campus. A transfer student that has previous coursework that can be transferred to EE core courses and will be entering the program sequence after Fall quarter, Year 2, may apply at any time. Acceptance will be based on space availability and academic performance. Transfer students who are interested in pursuing the EE program should meet with the department Program Coordinator early to discuss their options.

Approved Technical Electives (6 credits total required): Other courses may be accepted; see program advisor.

BIOL 204, 205, 206 INTRODUCTORY SERIES (4)
BIOL 348 HUMAN ANATOMY AND PHYSIOLOGY (5)
