## Plan of Study 2020-2021 Academic Year

### 146-150 Total Credits for Major

- **ABET accredited**
- All students must initially declare as a pre-major in Electrical and Computer Engineering; students cannot apply for the major unless all pre-major prerequisites have been satisfied with a grade of C- or better. Admission to the program is competitive.
- Course offerings/schedule are subject to change
- Shaded areas below are pre-major courses

### NOTES:

1. EECE courses are offered once per year and have a strong prerequisite structure. Not following the sequence may delay graduation.
2. Students not enrolled in MATH 125 and PHYS 162 by Winter of Year 1 will not be able to complete the degree in four years.
3. EECE 109 is waived for transfer students. EECE 108 must be taken during the first winter quarter at WWU.
4. MATH 341 may be substituted for MATH 345, the recommended course.
5. CSCI 141 may be substituted for CSCI 140, the recommended course.

Admissions

Program Admissions: Admission to the Electrical and Computer Engineering major is a two-phase process. When students initially declare, they are designated as pre-majors. Students must complete the courses listed below in order to apply to the major. Admission to full major status is determined by academic performance and other factors including an application questionnaire about the applicant’s experience, motivation, and goals. Admission to the major is competitive. Neither completion of the prerequisites nor attainment of any specific GPA guarantees admission.

Major Prerequisite courses: MATH 124, MATH 125, MATH 204, PHYS 161, PHYS 162, CSCI 140, EECE 108/9, and EECE 111. Students must obtain at least a C- and an overall GPA of 2.0 or higher in these courses to be considered. Advanced Placement (AP) scores are converted to GPA as follows: 5 = A; 4 = B; 3 = C. Decisions are based on the cumulative GPA in the prerequisite courses, and other required major courses, overall GPA, and questionnaire responses.

Spring Quarter: Applications are due on the Friday before finals week. Only complete, on-time applications will be considered. Applicants will be notified by the end of the week following finals week. Students who are accepted must register for Fall quarter EECE courses before the end of Phase I registration. Students who do not register by the end of Phase I registration may lose their major status.

Fall Quarter: Applications are also accepted at the beginning of Fall quarter on a space available basis. Check the department website for application due date. Accepted students will be notified by the start of Phase III registration.

Transfer Students: Transfer students who will be transferring into Fall quarter, Year 2, will be designated as a pre-major and will need to follow the standard application process above except for EECE 108, which must be taken at the first opportunity on-campus, and EECE 109 which is waived for transfer students. Transfer students who have previous coursework that can be transferred to EECE core courses and will be entering the program after Fall quarter, Year 2, may apply at any time. Acceptance will be based on space availability and academic performance. All transfer students who are interested in pursuing the EECE program should meet with the department pre-major advisor early to discuss their options.

Approved Technical Electives (6 credits total required): Other courses may be accepted; see program advisor.
