Science Education 480  
Science Methods and Curriculum for the Elementary School  
*Preparing thoughtful, knowledgeable, and effective educators for a diverse society.*

**When:** Winter 2016, Monday & Wednesday, 5 Fridays 10-11:50  
**Where:** SL230 (SMATE)  
**Credit Hours:** 5 credits  
**Prerequisites:** Completion of natural science GURs, including SCED 201. ELED 370, ECE 372 or SPED 420  
**Instructor:** Dr. Tammy Q. Tasker  
**Office & Phone:** SMATE Office  Cell: 206.604.3445  
**Email:** tammy.tasker@wwu.edu  
**Text:** NONE  
**READINGS:** Course materials are available through Canvas

**Course Description:** Classroom/laboratory study of theory, curriculum, science content, processes and effective teaching methods in the context of national standards in science including activities appropriate for the elementary classroom.

**Requirements:**  
Science Education 480 demands active participation and a willingness to learn and explore teaching and learning science. It is an investigation-intensive class and will require all students to be prepared each day. Excellent attendance is essential for success in this course.

1. Attendance and promptness are essential. The class is organized around many small and large group class activities during class sessions. Your attendance is necessary not only for your learning but also for the learning of others. If you are not in class, your group suffers. Three absences, for whatever reason, can result in a grade that is one whole step lower (e.g., from a B to a C). You should contact me in the event you need to miss class due to an illness, injury or an emergency. While absence from class should be a rare occurrence, the Western Washington University Student Health Center encourages students to make mature decisions when they are too sick to attend class. All decisions about the impact of an absence, as well as any arrangements for making up work, rest with the instructor.

2. Late work is not accepted unless you have spoken to me about an unusual situation PRIOR to the due date. Unless otherwise arranged, assignments are due before class.

3. Written assignments must model appropriate grammar, spelling, usage and punctuation. All written work is to be word-processed (double-spaced, 12 point font). Proofread your papers as you would if you were developing a handout for students. If an assignment contains more than 3 errors per page, it will be dropped a
letter grade (for example, from an A to a B). **All assignments are to be turned in via Canvas.**

4. You must complete all of the assignments listed in the course syllabus to receive credit for this course.

5. At least two lesson plans must have passing learning targets, proper structure or the student may receive an incomplete or fail the course.

6. There may be occasional, in-class, unannounced assignments and quizzes. If a student is absent, these points cannot be made up.

**Goals & Outcomes:** (PST - pre-service teacher)

**PST** will use documents such as standards & curriculum, to organize a unit of study around a big idea

A. Identify big idea/concept
B. Develop a storyline/learning progression of sub-concepts that will lead to big idea
C. Help students connect the sub-concepts to build the bigger idea

**PST** will define NOS, explain importance to science instruction, integrate into teaching

**PST** will describe similarities and differences between engineering and science

**PST** will describe design process in engineering

**PST** will develop assessment plan for unit and lessons incorporating pre-assessment, formative assessment and summative assessment

**PST** will design effective science lessons that:

A. State clear learning targets (for NOS and for content) for lesson
B. Elicit initial ideas
C. Communicate learning target
D. Engage students with phenomena/data
E. Use evidence to create claims and critique claims of others
F. Lead students to make sense of the lesson
G. Apply science concepts in a new context

**PST** will differentiate instruction for individual learners through appropriate teaching of academic language

**Student Evaluation:**

- **In-Class assignments** (unannounced) 0-20
- **Reading Assignments**
  - Nature of Science 10
  - How People Learn 10
  - Big Ideas 10
- **Lesson Plans**
  - Lesson 1 - 3 drafts (5pts each) 15
  - Lesson 1 - Final 28
  - Lesson 2 28
  - Lesson 3 34
  - Final Essay 15

**TOTAL POINTS: 150 – 170**
Grades: The grading scale is as follows:
A 95-100%  A- 90-94%  B+ 87-89%  B 84-86  B- 80-83%
C+ 77-79%  C 74-76%  C- 70-73%  D+ 67-69%  D 64-66%
D- 60-63%  F <60%
Any student who receives less than a C grade must retake this course for certification.

Academic Honesty Policy:
Western Washington University Students are responsible for reading, understanding, and following the policy and procedures regarding academic dishonesty as set forth in the WWU Academic Honesty Policy and Procedure (see Appendix D of the University Bulletin).

Reasonable Accommodation Policy:
It is the policy of Western Washington University to provide reasonable accommodation to the known physical, sensory, or mental limitations of qualified individuals except where such accommodation would impose undue hardship on the institution. To request accommodation, Students must contact WWU disability Resources for Students at 360-650-3844 or www.wwu.edu/depts/drs/
