

SUMMER 2019 BIOLOGY UNDERGRADUATE COURSE REGISTRATION INFORMATION

Course	Instructor(s)	Pre-req(s)	Registration Restrictions
BIOL 101: Intro to Biology w/ Lab	Donovan, D.	None	Open to all majors, no restrictions.
BIOL 321: Genetics	Schwarz, D.	BIOL 204, 205 and 206	Registration is open to all majors who meet the prerequisites EXCEPT for Phase I majors in biology, biochemistry and behavioral neuroscience.
BIOL 323: Cell & Molecular Biology	Singh-Cundy, A.	CHEM 351 & 352 (or concurrent) or CHEM 251	Registration is open to all majors who meet the prerequisites EXCEPT for Phase I majors in biology, biochemistry and behavioral neuroscience.
BIOL 348: Human Anatomy & Physiology	Serrano-Moreno, J.	BIOL 101 or BIOL 205	Registration is open to all majors who meet the prerequisites EXCEPT for Phase I majors in biology.
BIOL 395: Biology Research Participation	Faculty	Phase II Biology Major	Must have instructor approval – override required. Complete the BIOL 395 web form available on the biology department website.
BIOL 400: Independent Study	Faculty	Phase II Biology Major	An Independent Study form must be approved by both the instructor and the Biology Department Chair. (Form available from the Biology Department Office, BI 315)
BIOL 402: Wetland Identification and Delineation	Binney, E.	BIOL 325 or ESCI 325	Open to all majors who meet the prerequisites. Course dates are June 24-28, 2019. This is a field study course; contact the instructor for more information.
BIOL 473: Molecular Biology	Schulze, S.	BIOL 321 or 323; CHEM 471 or instructor permission	Registration is open to all majors who meet the prerequisites EXCEPT for Phase I majors in biology, biochemistry and behavioral neuroscience. CHEM 471 may be taken concurrently with instructor approval.
BIOL 494: Biology Research	Faculty	Phase II Biology Major	Must have instructor approval – Override Required. Complete the BIOL 494 web form available on the biology department website.
BIOL 495: Research Communication	Faculty	Phase II Biology Major	Must have instructor approval – Override Required. Complete the BIOL 495 web form available on the biology department website.
BIOL 496: Professional Work Experience	Faculty	Phase II Biology Major	Must have instructor approval – Override Required. Complete the BIOL 496 web form available on the biology department website.
BIOL 498: Teaching Practicum	Faculty	Phase II Biology Major	Must have instructor approval – Override Required. Complete the BIOL 498 web form available on the biology department website.

IMPORTANT: (1) Attendance at the first class meeting for all upper-division courses is mandatory; failure to attend may result in having to forfeit your seat in the course if a waitlist exists. **(2)** All pre-requisite courses must be completed with a C- or higher. If you register for a course but have not satisfied the pre-requisites, you will be asked to withdraw. **(3)** During the second phase of registration, major restrictions will NOT be lifted. Students must still request an instructor override for access to the course.

A Note to Pre-Health Students: If you are a Pre-Health student, but not a declared biology major, you will need to request an override from the instructor for access to biology courses. Although NOT guaranteed, special consideration will be made for those students who may need the following courses to prepare for professional schools: BIOL 321, 322, 345, 346, 348, and 349.

Biology Minors: Students who are declared biology minors will have the same priority as Phase II general biology majors during the first phase of registration as long as those courses are not restricted to specific emphases within the biology major (i.e., marine biology). If restricted, minors must wait until the course opens to all Phase II biology majors (or to general biology majors) before they may register.
