Transfer Student Advising /Computer Science at WWU 2018-2019

Best Foundation:

- AS-T (students will still need 3 GURs at WWU: BCOM or CCOM, HUM or SSC, and ACGM or BCGM)
- Two introductory computer programming classes (WWU CSCI 141 and 145)
- Calculus I and II (WWU MATH 124 and 125)
- Science Series (WWU CHEM 161, 162, 163; OR PHYS w/ Calculus 161, 162, 163; OR GEOL 211 and 212, or BIOL 204, 205, 206)
- Linear Algebra (WWU MATH 204)

Admission to Major:

- Students are eligible to apply to the major when they have completed CSCI 241, 247 and 301
- There is no direct admission to the major
- Students are admitted to major on a space available basis
- Students earning a 3.0 or better in the 3 required classes are very likely to be admitted to the major. Transferred grades are not included in the GPA calculation

New! We will help transfer students make smooth progress by reserving a few seats for our new transfer students. However, transfer students still need to be flexible and anticipate some delays

- Be prepared to take classes other than CS
- Complete GURs at WWU
- Taking classes that are not on the Best Foundation list may not be helpful and may cause registration delays due to credit restrictions that we place on CS classes

If the delays of getting into CS classes are too significant for you, then we encourage you to explore related majors such as Mathematics or Business Administration – Management Information Systems
